RADIO LEADERS GIVE **IDEAS ON RADIO LAW**

COORDINATINGCOMMITTEE MAKES OFFICIAL REPORT

Asks Duplex Control, Recognition of Stations' Priority and Service Rights and Five Year Licenses

WASHINGTON, D. C.—The National Radio Coordinating Committee has delivered its report to Congress, and while not sensational, the committee's report contains much sensible thought for the legislative solution of the present broadcasting muddle which now demands immediate remedy. The report's high points are:

1. The committee favors a control consisting of two bodies—a rederal Radio commission and the department of commerce, whose functions shall be as determined in the House (White) bill.

mined in the House (White) bill.

2. The Radio law should contain a recognition of rights as between individual broadcasters as distinguished from the vested rights of the United States.

3. The right of priority of operation (meaning the allocation and use of wave lengths) should be thoroughly defined, determining this right on (a) the length of time during which stations existing at the time during which stations existing at the time the proposed Radio act becomes a law, have operated, (b) The character of service rendered by them, and (c) the requirements of their zones and communities for Radio service.

Defend Rights of Discretion

4. The term of broadcast license should

4. The term of broadcast license should be for not less than five years, providing that the licensee is operating his station regularly and properly.

5. Broadcasters should not be deprived of their rights to refuse the advertising or to refuse to render a service at their discretion or to reestablish rates commensurate with the time and character of a program in exactly the same manner as a program in exactly the same manner as newspapers, for reason of dishonesty or false statement may refuse to accept ad-

vertising copy for publication.

6. Unauthorized rebroadcasting of any one station's material by another station should not be permitted.

Committee Represents Whole Industry The coordinating committee of the Radio industry represents all branches of the industry in the present fight for

adequate legislation.

Great care has been taken by the committee to present an organized and coordinated report to Congress, that this session without further ado may know what is required immediately in legislation.

Stations Must Waive Rights When Signing for Relicense

WASHINGTON, D. C.—Since the signing of the emergency Radio resolution by President Coolidge, which passed at the last session of Congress, the Radio section of the department of commerce in renewing old station licenses is making all applicants sign a waiver which is provided for in the law. The waiver follows:
"As required as a part of the application for station hereto attached, the applicant

cant hereby waives any right or claim of right, as against the United States, to any wave length, or to the use of the ether in Radio transmission, because of previous license to use the same or because of the use thereof."

New Stations

New stations licensed by the department of commerce last month include: WWPR, Detroit, Mich., 300m-999.4kc; KGDO, Dallas, Texas, 285m-1052kc; KXL, Portland, Ore., 400m-749.6kc; WLCI, Ithaca, N. Y., 266m-1127kc; WKBU, New Castle, Pa., 238m-1260kc; WEKD, Philadelphia, Pa., 249.9m-1200kc; KFQX, Seattle, Wash., 210m-1428kc; KVOS, Seattle, Wash., 230m-1304kc; WWVM, Newark, N. J., 475.9m-630kc; KGCU, Mandan, N. D., 285m-1052kc; WABF, Pringleboro, Pa., 410.7m-730kc; WPEP, Waukegan, Ill., 212.6m-1410kc; KGDP, Pueblo, Colo., 260.7m-1150kc; KGEA, Seattle Wash., 345m-869kc; WRRS, Racine, Wis., 360m-832.8kc; WPAB, Norfolk, Va., 319m-940kc; KGDR, San Antonio, Texas, 240m-1249kc; WWVA, Wheeling, W. Va., 348.6m-860kc; WLBI, East Wenona, Ill., 296.9m-1010kc. New stations licensed by the depart-

New call letters will be heard from the following stations: WWNC, Asheville, N. C., formerly WABC; KTAP, San Antonio, Texas, formerly KGCM; WTHO, tonio, Texas, formerly KGCM; Ferndale, Mich., formerly WJAF.

The following stations changed wave lengths: WKBO from 309.1m-970kc to 303.9m-980kc; WCOA from 222.1m-1350kc to 252m-1190kc; WSAR from 254.1m-1180kc to 322m-930.1kc; WKBM from 215.7m-1390kc to 285.5m-1050kc; KFVD from 205.4m-1460kc to 208m-1441kc; WOAN

J. LOUIS GUYON

When WGN sued WGES for interference, the Chicago Tribune station reckoned not with the fight in J. Louis Guyon, WGES owner. Story is given in full on page 3.

from 282.8m-1060ke to 356.4m-841.2ke; KGCL from 230.6m-1300kc to 238m-1260kc; WFCI from 299m-1109kc to 258.5m-1160ke; KWTC from 260.7m-1150ke to 2638.5m-263m-1140ke; KRLD from 357.1m-839.6ke to 353m-849.4ke; KSBA from 312.6m-959ke to 260.7m-1150ke.

The Triangle Broadcasters are now the owners of WHFC, Chicago, Ill. KFVR, Denver, Colo., has been taken over by the Olinger Broadcasting Corporation. WWNC, the new call of the old Asheville, N. C., station, WABC, also changes owners and is now managed by the Asheville Chamber of Commerce. The State Teachers College takes over KFKZ. WTAL is now the voice of the Toledo Broadcasting Company.

VICTOR ON AIR AGAIN STARTING EVE JAN. 1

TIONS TO BROADCAST

Program Heralds New "Blue" Network of N. B. C. Embracing WJZ, WBZ, KDKA and KYW

NEW YORK .- The Victor Talking Machine Company will sponsor another series of programs by world famous artists, the opening concert to be broadcast on New Year's night, January I, it has been announced by the National Broadcasting Company.

The opening program will be of two hours' duration, from 9:00 to 11:00 P. M., Eastern Time, and broadcast through more than a score of stations, including WEAF and WJZ in New York.

The opening Victor program also inau-The opening Victor program also inaugurates a new chain of the National Broadcasting Company with WJZ as the "key" station. The chain will be known as the "Blue Network" and will allow simultaneous broadcasting from WJZ through WBZ, KDKA and KYW. For the broadcasting of the first Victor program the "Blue Network" will be joined with the "Red Network," as the WEAF chain is to be known, as well as other stations throughout the country. throughout the country.

Following the New Year's night presentation, Victor concerts will be broadcast bi-monthly on Friday nights from 9:00 to 10:00 o'clock, Eastern time, through the "Blue Network."

FRONT COVER GIRL IS MAYBELLE CARSTENS

UT of the fragrant land of roses and apple blossoms comes the and apple blossoms comes the demure maiden who greets you on the Radio Digest cover this issue. Her name is Miss Maybelle Carstens and she is a favorite with a very large circle of admirers who listen to the programs broadcast by KWSC of the Washington State College at Pullman, Washington. Miss Carstens is a reader and a regular member of the staff and a regular member of the staff

MORE THAN SCORE OF STA

H thanks, awfully, and I wish the same to you. Yes indeedy, the loveliest sort of Christmas and truly I'm fairly bursting with happiness. You can't imagine all the darling things I received and I'm dying to tell you all about them but my desk is heaped high with letters, still unanswered. The greatest happiness Marcella can anticipate for the New Year is a yard or more of space in this semi-monthly compendium to print answers to all the interesting letters she receives. And may the good Lord bless my most

SHORT WAVES

Fred Jeske; "Chubby" Parker; Charlie Schultz and Lee Sims; Arthur F. Edes; "Uncle John" Daggett; Louis

John Johnen; WFAA Favorites; Edith Carpenter and Grace Ingram; Mil-

ton J. Cross; Stuart Dawson; O. D.

Temple; Harry Bailey.

And may the good Lord bless my most intimate circle of regulars. I count Dee of Canaan one of these and here's the best I can do for her. For Request No. 1 she would like to see a t. n. of Fred Jeske. Here he is, Dee. He is a darlin' lookin' man with his dark, wavy hair and pearly teeth hair and pearly teeth—that smile is the most captivatin's mile, too.

And Ben Pratt, the mischievous publicity director of WBBM, Chicago, tells me that Fred simply knocks 'em dead everywhere he goes—and he goes when nights are silent at WBBM. Furthermore Ben says the young gentleman has no conjugal entanglements.

Elsie Swendsen of Pickardsville. N. Dak., writes: "Can you tell me anything about Chubby Parker at WLS, Chicago;

good looking, young, married etc.?" I'm tell-ing you with a thumbnail, Elsie. Yep, he's m. and has a daughter. Chubby writes his own songs and plays a little old five-string 'jo. He finished at Purdue after he had grown up with the tall corn in Iowa.

The best information I can get about Charlie Schultz and Lee Sims is that they are doing some independent booking in vaudeville and there is a rumor that they are working toward Broadway. You are right about G. R.

Although I have not at this moment a letter inquiring about Mr. Arthur F. Edes, chief announcer and program director at WEEI, the publicity director sends me his picture and the argument of the argument.

rector sends me his pic-ture and tho ught you would like to see what a nice looking young chap he is. Like him? Hasn't he a boyish face? Never would suppose he was

would suppose he was experienced enough to announce the intricate tonguetwisting titles and names associated with the selections played by a symphony. But Arthur F. Edes is the boy who can do it and did do it for the Boston Symphony all last season.

Mrs. W. H. Walker at Willows, Cal., would like to know something about Uncle John Daggett at KHJ, Los Angeles. You might still call him a blushing bride-groom and he has a most interesting history—too big and important to be considered in a paragraph sidered in a paragraph like this. When the Los Angeles Times opened up KHJ they looked over the editorial staff to find

the editorial staff to find a man with sufficient knowledge and experience to understand how to amuse the little listeners. You know a newspaper man is supposed to be rather hard boiled but Uncle John found a true vent to a repressed complex and the children took to him like a true uncle. Well it looks as though the up-shot of it all was, Uncle John found the right lady to say "yes."

Yes, Mr. Louis John Johnen has joined the staff of the WFBE station, recently moved to Cincinnati from Seymour, Ind. It is located on the Garfield Hotel and if you wish to find him, Leona E. Fischer, you may do so by turning your dials to 232.4, somewhat down from the old WLW wave. The station has been stepped up to 1,000 watts. Mr. Johnen has asked me to send the season's greetings to you and all of his other friends through this column. You have 'em. by turning your dials to

Elizabeth Walling of Amber, Okla., has been very patiently waiting for information about some of her favorites at WFAA, Dallas. Charles Frederick Baker is tall, handsome and twenty-one. He's rather aloof toward us girls but Mr. L. B.

GUYON PROVES SETS ARE FAULTY

INTERFERENCE VERY OFTEN LONG AERIAL

WGES OWNER PAYS ENGI-NEERS TO REMEDY EVILS

Gains Friendship of Chicago Fans by Educating Them to Proper Use of Radio Sets

CHICAGO.—What is believed to be a world record response by a Radio public to programs broadcast from one station is pouring in these days on Station WGES which is fighting attempts by Station WGN to have it vacate the wave length of 315.6 meters which it

now occupies.
WGN, which occupies a wave length of WGN, which occupies a wave length of 202 meters, forty kilocycles removed from WGES, originally obtained an injunction in court to restrain J. Louis Guyon, proprietor of WGES, from broadcasting on the 315.6-meter wave. Judge Francis Wilson later modified the injunction to permit WGES to broadcast on any wave

YOU complain of interference, but how about shortening your antenna? In nine cases out of ten, Guyon engineers find listeners attempting the impossible; using antenna systems from fifty to 175 feet long—and then expecting to separate power-ful local stations. Here are some tips in brief, given below in full:

1. Shorten your aerial to thirty feet, including lead-in.
2. Change the position of your receiver. Try it in various parts of the room.

3. Loosen your antenna coupling, if your set permits.

4. Make a wave trap. It need not cost over \$1.25.

5. Inspect your tubes and connections. Read the instruction book that came with your receiver.

length that does not materially interfere length that does not materially interfere with WGN. At this Mr. Guyon returned WGES to its 315.6-meter and resumed broadcasting. After some weeks WGN obtained from Judge Wilson an order on J. Louis Guyon to show cause why he was not in contempt of court, the claim of WGN's managers being that WGES was causing interference again.

causing interference again.

Guyon Engineers Fix Faulty Sets

When WGES made its return to the air, J. Louis Guyon made a series of addresses from WGES asking the Radio public to support him in his fight for the freedom support him in his fight for the freedom of the air and asking those persons whose faulty sets caused interference between WGN and WGES, to give him an opportunity to send Radio Engineers to their homes to correct the mechanical errors. Letters from persons who followed Mr. Guyon's instructions in removing interference and who now can get WGES and WGN with plenty of room between, are many.

Fight Beneficial to Public

Mr. Guyon in one of his talks said, "The average Radio set owner who gets a few high-powered stations on his set is content. He does not realize that with care given to his machine and the acquisition given to his machine and the acquisition of a little skill he can bring many more stations. Educate him in the easy and simple ways of eliminating interference and his pleasure and joy in Radio is increased. If my fight to keep on the air and to prevent monopoly of this avenue of free speech has done nothing else, it has at least educated thousands of listeners to a fuller enjoyment of Radio. ers to a fuller enjoyment of Radio.
Guyon Asks Fair Test of Sets

"Boiled down to its essence the contest between WGN and WGES is this: Is forty kilocycles enough separation between sta-

"My answer has been that forty kilocycles is enough separation; that forty kilocycles or LESS separates twenty-five cut of the thirty-one licensed stations in the Chicago field. Scores of authorities and leading engineers bear me out in this. Many authorities specify thirty kilocycles or twenty kilocycles as enough, and some say ten is ample. "Interference exists on faulty sets. My

plea has been to have these sets fixed and my argument has been that no owner of my argument has been that no owner of such a set should allow himself to be drawn into either side of the controversy until he has had engineers look over his Radio to find where its errors lie."

The Guyon engineers were interviewed.

These men, who have been doing a great work in improving Chicago Radio installations so that their owners may separate such stations as WGN and WGES, reported as follows:

EUNICE HOEFFER, WBBM ORGANIST

Like St. Cecelia at the organ, Eunice Hoeffer of WBBM sits serene as she entertains with the Barton of the Stewart-Warner Air Theater. Yes, she's single. Line forms on the right.

Hints to Improve Reception

"In about nine cases out of ten we find that the antenna system is at fault. Most antennas are entirely too long. People buy a set, take it home and hook it to an old aerial. We find aerials up to 175 feet long in use. We would suggest about thirty feet, including the lead-in, and very seldom more than fifty feet. We recommend the use of two antennas with a switch, one long and one short; the short aerial for selectivity, the long for distance.

"We have also learned that by simply changing the position of the receiving set, we have been able to totally eliminat' interference in a number of cases. A set with a metal panel should be placed with the broad side of the panel faced toward the station which the listener wants to eliminate.

"A set using a circuit arrangement similar to the Bremer Tully, with variable antenna circuit.

How to Make \$1.25 Wave Trap

"Finally, we assemble a wave trap from the cheapest parts obtainable for \$1.25; \$1.00 for the 23-plate variable condenser and 25c for the radio frequency transformer. We connect the large coil or secondary of the transformer across the 23-plate condenser, and then hook one end of the small coil or primary to the antenna binding post of the receiver. The other end of the small coil is hooked to the antenna lead-in. It always works.

"For a super-heterodyne, the wave trap's small coil or primary is: put in eliminate.

ing his companion in the cottage at Car-mel-by-the-Sea he answered with "wise cracks" quoted as follows in the Los Angeles Evening Herald:

Q. Were you alone when you left Oakland?

A. That sounds like a new jazz tune by Irving Berlin.
Q. If "Miss X" was not Mrs. McPherson

A. Are you referring to the new Radio Whozit game?
Q. Where is Miss X now?
A. Between W and Y and always was.

A. Between W and Y and always was.
Q. Have you heard from her recently?
A. What do you mean by recently? How
long is a piece of string?
And so it went. And so it goes. A letter
from a vaudeville team in New York requests permission to use the name of
"Whozit" in a stage stunt. The request
was granted.

Still Opportunity to Begin

From Seattle to Jacksonville and from

From Seattle to Jacksonville and from Los Angeles to New York and Boston, twenty-four of the greater broadcasting stations are playing the game for the \$26,000 in prizes to be awarded Whoziteers—those who listen and play.

For those who have not yet joined the game there is still an opportunity. Order the back copies and begin now. One thousand dollars will be awarded by Radio Digest to the winners at each of the twenty-four broadcasting stations. There will Digest to the winners at each of the twenty-four broadcasting stations. There will be two grand prizes of \$1,000 each for the ones who have the highest score of all twenty-four stations. The rules of the game and full information as to conditions appear on page 15 of this issue of Radio Digest. Schedule appears at left. The rules state specifically that all assembled Whozit pictures are to be held until the close of the series. This fact is emphasized here because quite a number of Whozit pictures have been sent in and are, of course, incomplete.

are, of course, incomplete.

Don't Drop Out; Stick to It!

It looks easy to cut the pictures apart and assemble them correctly and it is easy. But one of the qualities for a successful Whoziteer is "stick-to-it-iveness." That may be taken both literally and figuratively. You stick the segments together in their proper order and you stick to the game until the last picture in the eighth game is complete. The losers will be those who drop out before the game is

Whozit clubs and Whozit parties are growing in vogue and many letters are being received from those who have found a neighborhood Whozit party not only a novelty but an intensely interesting game of wits. The host or hostess usually supplies the guests with little game tables scissors, copies of Radio Digest, paste and pencils. The first ones through win the trophies

POWEL CROSLEY, JR., GIVES FANS XMAS PRESENT

East vs. West Game on Air—KJR 20,000 Watter—WOW Heard 1,012 Miles on Crystal Set

NEW YORK .- The middle of December saw the launching of a new and great broadcasting enterprise here when the Atlantic Broadcasting Corporation offi-Atlantic Broadcasting Corporation officially took over the Grebe Radio group of broadcasting stations, including WAHG, whose call has been changed to WABC and equipment provided with the the latest type 5,000-watt Western Electric transmitter, and Station WBOQ, whose power is 500 watts.

The new and spacious studios atop Steinway hall, decorated by George Waters and Company, are done ornately lavish but in the best of taste.

In common with many other high class

In common with many other high class stations, a portion of the programs of the Atlantic Broadcasting Corporation will be made possible through advertising pat-ronage. The officers of the company are Alfred H. Grebe, president, Douglas Rigney, treasurer, and Fay L. Faurote, vice president and general manager.

WLW Studio Organ on Great Chain CINCINNATI.—A gigantic and bountiful Christmas gift to the Radio audience of America was presented Christmas day through a chain of seventeen stations of the WEAF or "Red" network, including WLW, when the Crosley Radio Corpora-tion studio organ was heard in a special afternoon concert played by three distinguished organists, Paul Staderman, Lillian Plogstedt and Johanna Grosse. Powel Crosley was Santa Claus in this case, financing the program.

WBAP Does Remote Control Stunt FORT WORTH, Texas.—On a recent Saturday evening the famous Sunflower Saturday evening the famous Sunflower Girl of WBAP was heard singing via that station by remote control—in fact she was just 111 miles away—in Wichita Falls, Texas. The Hired Hand was there, too, and all because D. L. Fritz, automobile dealer of Wichita Falls, wanted his friends to see the pair in action.

East vs. West Game on Four Stations PASADENA, Calif.—Radio listeners in the West are to have the opportunity New Year's day of hearing a play-by-play word description of the annual East vs. West football game held each year in the Rose Bowl at Pasadena. The two teams are "Pop" Warner's Cardinals of Stanford University undisputed champions of the University, undisputed champions of the Pacific Coast, and the "Crimson Tide" of

HAPPY AL CARNEY IS **FAVORITE ORGANIST**

Here he is again—smiling Al Carney, the bachelor organist of Station WHT, Chicago, who entertains the women in the morning and men at night. He wanted us to show his side "kick," Jean Sargent, but we'll do that later. He takes up too much room—about 200 pounds of it.

the University of Alabama, three times winners of the Southern Conference. These two represent the West and East

These two represent the West and East in the annual grid battle.

Broadcast of the game will be made by KFI, KNX and KPSN beginning at 2 p. m. Pacific time New Year's Day. KPO may also be linked to KFI while the game is on the air. KFI has an unusual daylight range and is being logged quite consistently as far east as Chicago by superior sets during the daylight hours. Glen Rice of KNX, recognized as the West's best sports announcer, will give his version of the game for the Hollywood station.

KJR Dedicates 20,000-Watt Station SEATTLE, Wash.—The night of December 18 marked the first great epoch in ber 18 marked the first great epoch in Pacific Coast broadcasting when KJR in-creased its power to 20,000 watts, becom-ing one of only four great superpower sta-tions in the United States. The dedicatory program began at 7:00 p. m. Pacific time, and continued until 2:00 a. m.

SHORT WAVES By Marcella

(Continued from Page 2)

Henson, the station supervisor, thinks he will be a good catch for somebody—perhaps a "Goody Goody" catch—because he is studying for the ministry. Oh yes, he has brown eyes and dark hair. And Adams Calhoun is an established married man of the newspaper profession, gifted with an extensive vocabulary and an expert in the pronunciation of unpronouncable musical terms and names.

It begins to seem like home at KYW with the Harmony Girls, Edith Carpenter

and Grace Ingram, back on the regular programs. These two little ladies are probably better known to Radio audiences than any other pair of feminine entertainers on the air. Station KYW, Chicago, is their home nest. They began singing there the second night that KYW went on the

GRACE air. They have been broadcasting from there been broadcasting from there quite regularly since then. But during the past summer they fluttered away to warble in other climes. The Harmony Girls helped to make merry the Armistice Night EDITH party at KYW. Their old time friends will find them on the Carnival Hour, at 10:30 Thesday and Thursday nights at the 10:30 Tuesday and Thursday nights at the Congress studio.

GRACE

Nan Corbett of Frederickton, New Brunswick, Mrs. F. E. Upton, Chesham, N. H.; Karl Aichner, Wallace, Mich. and at least half a dozen others have been

This new superstation is the first of its kind on the Pacific Coast, and will be af-filiated with a 20,000-watt station in Spokane, a 20,000-watt station in Port-land, and with San Francisco and Los Angeles stations. Each of the latter is in the course of construction. When complete, these affiliated stations will be connected for chain broadcasting.

KJR operates on a wave length of 384.4

WOW Heard in Washington on Crystal OMAHA, Nebr.—If it hadn't been on a Bureau of Standards letterhead, but it was! What? Why a letter saying that WOW was heard plainly and distinctly one night in December by a staff observer who was trying to see how far a crystal receiver of a simple nature could be made to reach. He reached 1,012 miles to Omaha.

Frederick Bates, the bureau observer,

writing for information about Milton J. Cross of WJZ. Says Mr. Glover of WJZ sezze, "I thought Mr. Cross had been on the air so long that everybody knew all of his affairs. For your special benefit, here is his description: He weighs 200 pounds, is over six feet tall; married and has a child a little girl about two years. has a child, a little girl about two years old. He has brown hair and blue eyes and is one of those jovial gentlemen who do not have a care in the world."

B. H.-Stuart Dawson of WHT is S. B. H.—Stuart Dawson of WHT is still in single harness at this writing but by the time this reaches you he probably will have spoken to the preacher and Helen Rauh can tell you just WHEN (lucky boy). Pat and Eleanor were the first to take the leap, now Stuart and Helen are getting ready. (Business of whistling) Al Carney, ahem, whaddaya know. Al? know, Al?

O. D. Temple who represents musical barberdom on the Radio at WOAW, Omaha, writes that I was misinformed as to his own tonsorial tints. Sez he: "I am of ruddy complexion with medium brown of ruddy complexion with medium brown hair, grey eyes, sometimes blue and have red whiskers which make my mustache and side burns quite conspicuous . . . and it should be 'Singing Bobber.' G. R. gave me that title some time ago on account of my bobbing so many ladies' hair. I like best, 'Just an ordinary singer singing ordinary songs.' My real specialty is singing old time songs for shut-ins. I sure do enjoy singing for them." Sorry, O. D. Hope this fixes it up.

You wanted to know something about Harry Bailey at WSM, Miss Quiz; I am informed as follows by the Solemn Old Judge: "Harry is a modest young man about 25, unmarried, who has been in the music game professionally about five years. He has one sad affliction that I know of and that is golf. When he isn't swinging the baton (and believe me Harry swings a mean one) he is chasing a little swinging the baton (and believe me Harry swings a mean one) he is chasing a little white ball over the hills. Harry plays literally every instrument in the band but he generally stands up in front of 'em and the committee of the stands are the stands and the stands are the st makes 'em mind. He is a native of Ken-tucky but he is strong for Nashville, Tenn. He has never been in jail and has no bad habits except that he gets up late in the morning which isn't so bad considering that he works all night. His orchestra is called 'Harry Bailey and His Southern Serenaders'."

Margaret L. Bonar, the clever press story lady of KOA, Denver, after answering numerous personal questions about members of her suite for the ladies, asks: "Don't the men ever inquire about the women who sing and play? We have some winsome blondes and dashing brunettes on the program staff."

What deep secret would you like to reported that this record is more than two and one-half times the greatest prop me a note, girls and boys, and I'll recorded distance for crystal set operation, do my best to answer here. MARCELLA.

MAKES HIT ANNOUNCING SLUGFEST

This was snapped as Warren Brown, Chicago sports editor, was announcing the title bout WEBH-WJJD in which Mickey Walker won the title of Middleweight champion. As a result his work on this event, Mr. Brown has been applauded from coast to coast.

FANS CROWN NEW SPORT ANNOUNCER

Mickey Walker Wins Middleweight Title and Warren Brown, Sports Editor, Wins Fame

By Gene Rouse

CHICAGO.—Something happened in the ninth round of the middleweight championship bout at the Coliseum in Chicago December 3 when "Mickey" Walker floored the title holder "Tiger" i lowers—Mickey won himself a championship.

Something also happened in Radioland. Back of the microphone of WEBH and WJJD, America's twin stations, sat Warren Brown, sports editor of the Chicago Herald and Examiner. Through the pre-liminaries and through the main event Mr.

Ether Scraper

N all probability the greatest "sky scraper" ever conceived will go into commission at 711 Fifth Avenue, New York City, June 1, 1927. Although this ultra modern "sky scraper" will be but fifteen stories high it will touch the skies around the world for it will be the building constructed especially for the National Broadcasting company.

This is believed to be the first metro-

politan office and studio building devoted to such a purpose. The four upper floors will include eight broadcasting studios. An auditorium studio large enough to seat one hundred and fifty musicians will oc-cupy the most of the top floor. Visiting guests will also be accommodated on this floor. A novel method of construction will permit those on the thirteenth floor to see into studios on the floor below through glass floors.

Merlin H. Aylesworth, president of the National Broadcasting Company, states that under the new plan the recently combined broadcasters, WEAF and WJZ, will bined broadcasters, WEAF and WJZ, will cooperate to put on programs of the finest talent to be obtained. Both stations will be heard over chains of national extent. The general plan calls for a central broadcasting plant from which a system of studios will radiate fan-wise. On the rim of this circle will be the artists' and public reception rooms. Each studio will be growed by a galacent courted room. be served by an adjacent control room. The antenna towers are to be located many miles distant.

Brown kept up a running fire of droll com-

Brown kept up a running fire of droll comment and vivid description.

Along with it, through a battery of especially arranged microphones, sifted the howls and cheers of the 10,000 spectators, the cries of cold drink vendors and the clang of the gong.

Fan's Laud Announcing

"Heard the cheering just as if I had been in the building—even the cold drink man calling his wares, etc. Mr. Brown kept us laughing with his comments," wrote Kelly Burwell, Jeff, Alabama.

"Appealing wit of Mr. Brown and his rare descriptive ability kept me in a state of joy. Today I feel like I had a huge night and—I did," said H. H. Treaccar, Galveston, Texas.

"Brown is as good as Will Rogers over

"Brown is as good as Will Rogers over the radio."—Mr. and Mrs. Edward Sundin, Moline, Ill.

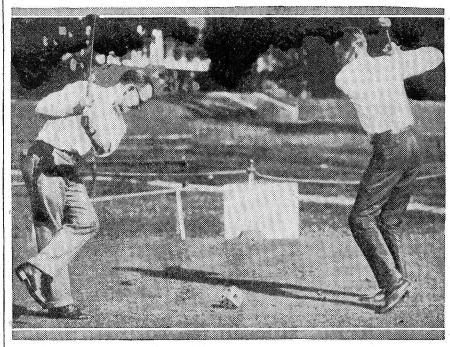

Thus did Radioland acclaim the new

meteor and crowned him king of sport anmeteor and crowned him king of sport an-nouncers. Letters on the broadcast have arrived from all over the United States and Canada and not a few, nor the major-ity, but every one mentioned the excel-lency of the announcer.

WEBH and WJJD, America's twin stations, are on the 370-meter wave band, operated by the Edgewater Beach Hotel-Loyal Order of Moose and the Palmer House, presenting Herald and Examiner programs exclusively. The program management is under Homer Hogan.

WDAD Now 1,000-Watt Plant NASHVILLE, Tenn.—WDAD is getting out with its new 1,000-watt Western Electric set. Areas not covered before by WDAD are being heard from.

HAY AND KAY INTRODUCE NEW WAY

Messrs. Lambdin Kay, left, new African golf ball, center, and Judge George Hay, right (following the seven with his eye), as the three were engaged recently on one of Nashville's fairest fairways.

event—the origin of African Golf—with two of America's best known announcers at the knock-off. The lyrics may not be accurately reported but they were something like this: (make your own music).

Said Lambdin Kay to Old Judge Hay, "Fill shoot you dice today." "Nay, nay," said Hay to Lambdin Kay, "But a game of golf I'll play."

Then said Kay of WSB,
"That's a challenge to me."
"Quite right," said Hay, as up spoke he,
"T'll meet you at the tee."

Now, what to do, what to do?
They both began to stew—
And out o' the brew, I'm telling you,
That African Golf came true.

And Kay and Hay that very day Startled the good fairway By whacking the whey from a cube of gray-And NEITHER had to pay.

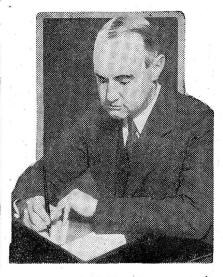

And so you see that dull thud you thought you heard was not the collapse of the grand piano. The boys simply had hoisted their golf hammers over their brawny backs and knocked the block off

RIENDS of the Radio reading audi-ence you behold in the above picture an interesting illustration of a notable in the big birthday celebration the Solemn and Bobby Jones golf were only incidents in the big birthday celebration the Solemn Old Judge gave in honor of WSM at Nashville when and where this picture was taken. Trips to the "Hills" it is said were very nonlar.

very popular.

Since December 5 WSM has been "silent" except for the noise of hammers, saws, drills and other reverberations incidental to construction operations. Santa cidental to construction operations. Santa Claus came down the aerial with a brand new Western Electric 5,000 watter—the very latest thing out, and just like WPG's. When WSM takes the air again within the next few days the "We Shield Millions" will have veritable millions within its audible range. In the meantime the Solemn Old Judge has been thinking up another new one for Lambdin Kay of the Atlanta station and probably "Merry Old Chief" Leo Fitzpatrick of WJR when the next birthday party is held.

MAN BEHIND BALKITE HOUR IS MR. TROXEL

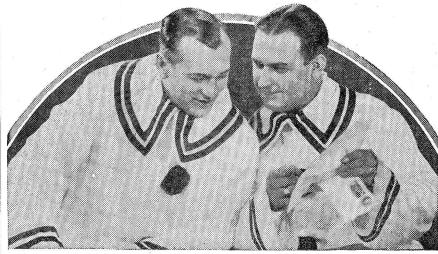

J. M. Troxel

OMETIMES we range around the dials, pausing for a minute here and another minute there, hoping that maybe we will strike something new and different that will be especially good. And then out of the ranks comes a special program, the particular enterprise of some individual or corporation concerned in presenting Radio super-excellence. So it happens that at the present time we enjoy the Balkite Hour every Saturday night over the WEAF chain. This is the particular pride and joy of J. M. Troxel, president of the Fansteel Products company, manufacturers of the Balkite Radio Power dials, pausing for a minute here and manufacturers of the Balkite Radio Power Units. Mr. Troxel and his associates have taken intense personal interest in this program. No expense has been spared to make it truly de luxe through the artistic resources of Walter Damrosch and the New York Symphony. It has thus been made possible for Radio listeners throughout the United States and the surrounding area to enjoy a quality of music such as only the great New York Symphony can

produce.
The photo shows Mr. Troxel in the act of signing the contract for the Balkite Hour.

LOCATE FORD AND GLENN AT WLW

H SKIN-NAY! Ooo-hoo! C'mon over! Ford 'n Glenn! We got 'em! Hurry quick like ever' thing! We found 'em again!" Ooo-hoo! C'mon

"Aw! Whatcha talkin' about? Doncha think I know they ain't at WLS no more? What you got ain't Ford 'n' Glenn. There ain't no more Ford 'n' Glenn."

"Gee whillikers! There is too! You

"Gee whillkers! There is too! You c'mon over an' just see if there ain't. My mother got 'em on another wave, she says. An' it's almost like WLS only it's WLW an' they're at the Crosley Radios at Cincinanti. C'mon NOW if you don't believe it an' I'll show yu!"

"Aw, betcha it's somebody else. Ain't nobody ken fool me 'bout Ford 'n' Glenn I'm comin' tu see."
Well sir, lo and behold and sure enough

Well sir, lo and benom and sure enough if wasn't Ford and Glenn! And here they are in a new picture just as they look in their new Woodshed show and for the Lullaby Hour at WLW, Cincinnati. What glad?

do you know about that! They picked ur their toys and their safety pins and their Noah's Ark and scampered right out of Chicago all the way down to Cincinnati.

Sure you can hear 'em. Just move the dials up to 422.3 meters if you live a long ways from Cincinnati and give 'em a little more volume. Course they weren't mad at anybody. But don't you suppose there are other little boys and girls in these Linted States whe'd like to ret acqueinted. united States who'd like to get acquainted with Ford 'n' Glenn? You can't expect a circus to keep on playing at the same place forever and ever can you? Well, Ford and Glenn got down to their new Woodshed theater just in time to put on a great Christmas party for the WLW children. They are going to stay there until next summer and then they are going to travel around like they did last summer and visit the children at the theaters in the different towns, ain't you

Mass Production

methods and tremendous purchasing power brought to Amrad and applied to building Neutrodynes a year ago by Powel Crosley, Jr. make available to the Public a 5 tube Neutrodyne at \$60

In this 5 tube battery type Neutrodyne at \$60 great engineering skill is manifest in the splendid performance of the set. Cabinet and trimmings are all any purchaser could ask—beautifully finished and appointed. Recessed dials behind windows and delicately adjusted vernier controls are distinctive features.

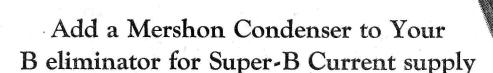

Cone Table

—and a light socket operated Neutrodyne at \$150

This is Amrad's crowning achievement. A power unit, using current direct from your light socket on wall or from table lamp furnishes A, B and C current direct to the 5 tube Neutrodyne pictured at the right. This power unit is pictured directly behind the set.

No batteries—nothing to charge. An entirely new development in power supply. Amazing Mershon Condensers contribute to its great efficiency and compactness. TESTED BY CONSTANT USE IN HOMES FOR OVER A YEAR. Price of receiver \$65. Price of power unit separately \$85.

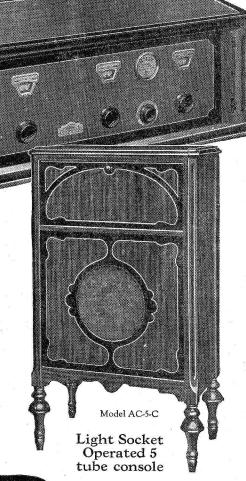

30 MFD DUOTYPE

Filtering out light socket current hum is but part of the job. Eliminators must have STORAGE capacity to prevent "chopping off" of loud or sustained notes. The Mershon Condenser acts as a reservoir and STORES energy for sudden heavy drains on plate current. Does the work of expensive storage battery electrically rather than chemically. B eliminator connected with this condenser gives the excellent tone reproduction of fresh B batteries.

Mershon Electric Condenser 15 mfds capacity each half. 30 mfds total capac-ity. Type D-15-30. Maximum rating 300 volts D. C. If punctured can be repaired and need not be thrown away.

AMRAD CORPORATION Medford Hillside, Mass. Harold J. Power, Pres.

Write Dept. 3A7 for Catalog.

How to Fix Sets for Results

By "KING MILO" GURNEY Part I.

S I take my pen in hand to write each of the little boys and girls between the ages of six and sixty who "jest new there wussent eny sandy Claws," the uppermost thought in my mind is—how in heck Santy guessed that you wanted a Radio, 'n besides, how did he get down th' chimbley, that's what I want to know?

did he get down th' chimbley, that's what I want to know?

But he did—you have it, and that's that, hence, methinks you would now be interested in learning the proper method for the installation and care. It comes to you a wondrous toy, but not to be toyed with. It's a beautiful cabinet containing a wealth of entertainment, yet each day fearing that you may decide to take it apart—just to see where the music comes from. Please never be guilty of doing such an unkind act.

In passing from the realm of levity to the more serious side of the subject, let us remark that every Radio receiver is justly entitled to a reasonable amount of

justly entitled to a reasonable amount of care in its installation. It should be correctly installed and intelligently operated. rectly installed and intelligently operated. In like measure, its accessories can remain efficient only when subject to periodic inspection. Do not attempt to be your own inspector. Your Radio dealer is the only one who should be allowed to keep your set in order. It's his business to know what to do and when to do it.

Altogether too many purchasers of receivers gain the impression that the instruction booklet which comes with the set is only a part of the packing. Of ccurse, you are not of that type; you will read it from "kivver to kivver" and find the reading very beneficial.

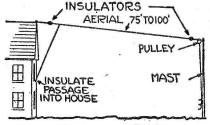

read it from "kivver to kivver" and find the reading very beneficial.

As the nominal head of your household, friend wife and the kiddies will probably allow you to exhibit that which you have told them you knew about Radio. Therefore, in strict confidence I shall help you, Brother—so hie thyself to seclusion with this Bible that you may emerge possessing an indisputable air of authority.

How to Erect Antenna

As the major portion of Radios are designed to operate from an outside antenna, the suggested method for its installation will be given first. Practically all authorities are in agreement that, for best all-around results, an antenna comprising a No. 14 single strand copper wire,

prising a No. 14 single strand copper wire, which may be either bare or enameled, is preferred. Its over-all length, inclusive of "lead-in," should not exceed 75 feet, while its height (from the ground) should if possible be not less than 35 feet. Such an antenna should be strung fairly taut in order that it may swing but little if at all during a high wind. It must not be allowed to come in contact with roofs or metallic objects and should be fastened to glass, porcelain or other types of insulators at each of its extreme ends. Such insulators in turn should be securely

anchored to the antenna's supporting anchored to the antenna's supporting medium (such as poles), while great care should be given to make sure that the antenna is installed for permanency.

Lead-In and Ground

The "lead-in" is the wire that extends from one's antenna to the receiving set. In each instance it should be of the same size wire as the aerial. It also should be copper wire and insulated.

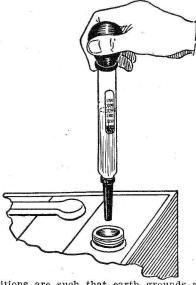

Do not neglect to make a soldered connection at the point where the lead-in

Do not neglect to make a soldered connection at the point where the lead-in attaches to the antenna. This is important! This is not to be construed as meaning that you will promise to solder it later, because such promises are seldom, if ever, kept. A job worth doing is worth doing well. A 10-cent soldering iron, together with a lot of "elbow grease," often works wonders toward one's continued enjoyment of excellent Badio recenued enjoyment of excellent Radio recep-

One of Radio's great truths is found in the assertion that "No Radio receiver is any better than its ground connection." Of the countless number of methods employed for the securing of a suitable ground connection, that which is to be preferred is one wherein the wire from the ground terminal of the receiver attached directly the accountry late hurid-

the ground terminal of the receiver attaches directly to a copper plate buried several feet in the ground, and moist ground when practical.

To provide such a ground very often entails considerable work, and in metropolitan areas grounds of this character are next to impossible owing to the populace living like sardines. Where the con-

ditions are such that earth grounds are not feasible, it is then advisable to attach the ground wire with a good ground clamp to a cold water pipe. Attach to a radiator or hot water pipe as a last resort. In place of using a buried copper plate

as an earth ground, one may drive a gal-vanized one-inch pipe into the ground to a depth of about six feet. In doing this a depth of about six feet. In doing this leave about six inches of the pipe above ground, and to this exposed portion solder the ground wire after first having tightly wrapped or coiled six to ten turns of the exposed wire around the pipe.

Neatness demands that this ground wire be insulated and you are cautioned against running it in other than as straight, a line to the receiver as possible.

A Word About Batteries

The new owner of a Radio is often be-

The new owner of a Radio is often be-fuddled with the terminology accorded the batteries which are required. Bat-teries for use with Radio receivers are sold under three classifications, viz: "A," "R" and "C."

"B" and "C."

Any Radio battery which supplies the current required for the heating of the filament of the vacuum tube is termed an "A" battery. Those which are required to supply efferent to the plates of the tubes are known as "B" batteries and are also available in both wet and dry types as is the "A" battery.

The "C" battery is only supplied in that form known to the trade as dry cell types, and its duty is that of supplying a "negative bias to the grids of the tubes," or perhaps a somewhat less technical term

perhaps a somewhat less technical term or explanation would be to say that a "C" battery is used to counteract the tendency of the grid becoming positive, which to the layman is no doubt just as poor an ex-planation of the function of a "C" battery. And now, Brother, you know the

The sketch at the left illustrates a proper outside antenna installation. Remember—the shorter the aerial and lead-in, the more selective the set. Above sketch shows how to clean pipe and before making soldered ground connection.

definition of A, B and C batteries, or else

definition of A, B and C batteries, or else do not care to know.

Storage "A" Batteries

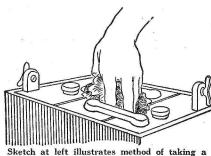

While there are exceptions, the standard type of A battery is that known as the "wet" or "storage" type. These vary little from those used as starting and lighting batteries in automobiles except, in general, the plates comprising them are not as thick or rusped as those designed. not as thick or rugged as those designed for automobiles.

Their voltage should never exceed six volts, and probably the most popular capacities are the 100 or 120 ampere hour batteries. A batteries do not require a high voltage output but do require a current to the control of the rent (amperes) value capable of supplying around two to three amperes of current per hour for the operation of the

The 100 ampere hour size has thus become popular because it will supply that a period of about two weeks before requiring recharging. This period is not definite but rather an average, it being essential that until one has determined from frequent tests the approximate period when the "A" battery needs recharging, that a free use of a battery "hydrometer" be made.

Use of "Hydrometer"
Such a "hydrometer" may be purchased

from any radio or battery dealer and is as essential for the determination of the condition of an A battery as a tail is to a happy dog. To make such hydrometer tests, remove the vent or filler caps (the

Sketch at left illustrates method of taking a hydrometer reading of the storage A battery. Note the vent cap hole, also the float in the hydrometer tube. Above sketch shows how to clean top of battery with old rag.

little screw composition caps on the top of the battery), insert the hydrometer and withdraw (by squeezing and releasing the bulb) a sufficient amount of the liquid within the battery to cause the indicating glass tube within the hydrometer of float. Do not got solution on ruges suit to float. Do not get solution on rugs, suit or hands. Note the reading on the float-ing tube where the level of the liquid

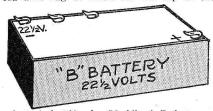

rosses the numerals.

This reading is decipherable as indicating the "specific gravity" of the acid solution within the battery. Return the liquid to the cell from which it was drawn and repeat the operation with the remaining cells, there usually being three such cells to each storage battery.

oration. It is important that the water level not be allowed to drop below the plates of the battery, and it is very much better practice if this level is kept slightly (one quarter inch) above the plates. In adding water to a storage cell always use "distilled water." No, sir, tap or well wa-

"distilled water." No, sir, tap or well water will not do!
Furthermore, do not let anyone convince you that your battery requires new "electrolyte." You need never worry relative to what "electrolyte" is, because telling you might lead to trouble. The correct method to pursue in the event of your feeling something is wrong is to take the battery to a responsible service station.

teeling something is wrong is to take the battery to a responsible service station. The top and terminals of a battery should be kept clean and free from corosion. Steal your better seven-eighths' old dish rag to clean off the top of the

A typical 22½-volt "block" of B battery. The 45-volt block is larger. Most B blocks are made nowadays to stand vertically.

pattery, and then clean away the accumu-

and repeat the operation with the remaining cells, there usually being three such cells to each storage battery.

A fully charged storage battery should indicate a specific gravity reading for each cell of between 1250 and 1275. If the reading of any of the cells are below 1225, the battery should be recharged before further use. No great harm will occur should the reading vary down below 1225, but it is imperative that once the gravity reaches 1130, one has no alternative other than to recharge.

There are batteries whose charged gravities will vary slightly from the readings quoted here. Many a battery works wonderfully well at a gravity of 1200.

As the A battery is used there will be a gradual lowering of its water or solution level. This is caused primarily by evap-

GOODY GOODY GIRL

CIKE a House of Cards Lois Sylvester Finds All the Contacts She Had Made in Chicago Come Tumbling Down

the little town of Paradise, Lois Sylthe little town of Paradise, Lois Sylvester started out to visit a friend in a neighboring town. A care-free neighbor boy, Herbie Coles, offered her a lift in his car. She slapped him when he tried to kiss her. Aboard the train, after dodging her vigilant stepfather at the station, she meets Raymond Lancaster and Mrs. Mildred Gayton, each acquainted with the other and chance fellow reseenwith the other and chance fellow pessengers on the train. An accident prevents Lois from leaving the train until she reaches Chicago. She becomes the guest of Mrs. Gayton who furnishes her with pretty clothes and convoys her into the swirling night life of the city. There she finds a bitter under-surface enmity between Mrs. Gayton's intimate friend, Neil Becker, and Raymond Lancaster. They all go to the races. Lois places a bet on a horse favored by Lancaster against the advice of Becker, to whom she entrusts the money for the bet. Herbie Coles appears and bets his last dollar on Becker's favorite. Herbie loses and Lois wins big odds. Before she can get the money she is taken away by Herbie. They are on some mysterious errand that requires speed. Lois doesn't know what it is all about, even when they are arrested for speeding, taken to a village jail and Herbie runs away leaving her to stand the gaff alone. She puts in a call for Lancaster. Herbie had told the chief she is a friend of Victor Jermin, a member of Becker's crowd. Lancaster rescues Lois from the little jail while the whole force is out chasing bootleggers. While he is taking her back to Mrs. Gayton's he attempts to embrace her. She repulses him. He confesses that he loves her and then reproaches her for trying to trap him. He explains that Becker has told him she was merely posing as an innocent him she was merely posing as an innocent country girl to compromise and blackmail him. She is stunned by this information and barely answers as she jumps out of Lancaster's car and runs up the steps to her friend's apartment. Neil Becker took the Goody Goody girl's charges complacently. Seeing that further subterfuge would avail nothing, he tried to win her to take Mildred's place and was instantly rebuffed. Then he attempted brute submission and Lois smashed his arm with his cane. Mildred rushed in and accused the girl of trying to usurp her position as mistress of the Gayton establishment. Then Lois packed up her own things and ran away. She was assisted by the maid who directed her to the boarding house of a relative. From here Lois started out to find employment as singer in the McManus cafe.

CHAPTER XII

A Proposition

HE great new cabaret on the South Side when she had wisited it by night had been gay; filled with life and music and laughter. When Lois called there the next day in search of McManus it was in the hands of cleaners and others getting it ready for another night—a dull, drab, cavernous place for all the garish decorations that glittered so brilliantly under the electrics.

so brilliantly under the electrics.

Lois was directed down a hallway to McManus' office and the manager himself opened the door and eyed her curiously. "What do you want?" he demanded.

It was plain he did not recognize her. She recalled her identity to him. The effect was surprising. He smothered an exclamation, drew her quickly into the office, waved her to a chair and said excitedly through a half-opened door to someone in an inner room: "The Sylvessomeone in an inner room: "The Sylvester girl's found her way here. Can you

A moment later Victor Jermin was framed in the doorway. He came quickly toward her "This is a relief" he said "We thought you'd been arrested. How did you know to come here? Did Mildred send you? It would have been better to have phoned first.'

"I don't know what you mean," she replied, bewildered. "I came here to ask Mr. McManus about that job he offered me. I left Mrs. Gayton's last night and——"

and—"
"Haven't you seen the morning papers?"
"No; was there something—?"
Jermin snatched up a crumpled newspaper from a table and thrust it into her hands. "Read that," he commanded, and pointed to screaming headlines: "RUM

By MERLIN MOORE JAYLOR

RUNNERS BATTLE POLICE; TWO ARE SLAIN, FIVE WOUNDED." A smaller line, also emblazoned across the page, read: "Girl decoy, Nabbed for Speeding, Escapes Village Cell."

I didn't know even that you are a—a—"
"I don't mind being called what I am. The thing now is to keep you from being arrested. In the end probably nothing

HE skimmed rapidly through the accompanying text. Illicit liquor accompanying text. Illicit liquor trucks, moving swiftly along country roads, had been ambushed by highway and village police. Death and injury had been the outcome of the gun battle that had ensued. The trucks had been seized, the men accompanying them captured. There was also an inaccurate, highly-colored account of her own arrest, and the reporters had swallowed whole the theory of the walrus-mustached chief that she

was connected with the other affair.

Lois lifted hurt, questioning eyes to

Lois inted hurt, questioning eyes to Jermin's face.

"Your little playmate, Coles, gummed up the works," he said. "I won't go into details, but if he'd had sense enough not to speed on a main highway, if he'd kept my name out of his talk at the station, if he'd got to a certain place in time—none of this," he jabbed a finger at the newspaper, "none of this would have hap-

"It says here that I'm being sought in the hopes that I can be made to talk, to tell on the higher-ups—why, I don't know

The thing now is to keep you from being arrested. In the end probably nothing would come of it, but meanwhile—. Mil-

dred phoned me today that you'd skipped out, that she didn't expect you back—"
"She's right. I'm through with all her kind forever. I'm on my own from this time on"

time on."
"Spunky, that, but what are you going

"Get me a job, singing preferably, but anything that will give me a living while I study, perfect myself in music. I thought perhaps Mr. McManus would give me a chance.'

VICTOR JERMIN shook his head.
"That's out," he said emphatically.
"It would be courting arrest. Someone would recognize you as having been around with me a great deal lately, you'd be identified as the girl pinched by that hick motorcycle cop and you'd find your-self in a police station in no time." "But I haven't done anything."

"Except break jail. Leaving ten dollars to pay a fine for speeding—clever idea, and I must give you back that ten—isn't calculated to settle the bill. The police in that village are sore at me——"

"The chief said perhaps now you'd deal in grease instead of soft soap."
"That's just it. Money, bribe money, instead of flattery, he meant. They want me to run the trucks through there, pay for having them left alone—oh, they'd make you the goat, all right, since that young fool of a Coles let slip it was my car. You've got to stay under cover until I fix this thing or the hullabaloo blows over." He started toward the inner office. "Come in here."

Lois got up and followed him. "Don't let this thing worry you, little girl," he said, closing the door. "It will come out

all right."
"But what can I do meanwhile?" she

'That's just what I brought you in here That's just what I brought you in here to discuss out of McManus' hearing. Can you take it, as they say in the prize ring; receive a blow without crumpling up, I mean?"

'I don't understand, I'm afraid. If you mean, can I stand disappointment-

XACTLY. I'm going to hand you an awful wallop, I'm afraid. If it wasn't I who did it and now, it would be someone else some other time. You'd get it in the long run. It might as well come from one who has only your best interests at heart—"

"Don't beat about the bush."
"I won't. Brace yourself. You can't ng. You haven't a voice."

sing. You haven't a voice."

"I—haven't—a—voice?"

"No. Will you grant that I should know? Mildred's told you that once I was

— She has? Then, believe me when I say your dreams of a career as a singer, an artist, never will come true. I'll grant that you have a sweet voice, that you could go on indefinitely making a living with it once you were started, but you have no great talent, no more than hundred of other girls..."

dreds of other girls—"
"Oh, I can't believe you! You have some

Surprisingly, he nodded. "Rather I have a reason. You needn't take my word for it about your voice. Pick any teacher you wish, go to him and get an audition. I'll pay the bill. He'll tell you exactly the same thing. I'm trying to save you the shock later on and—yes I'm a bit intonshock later on and—yes, I'm a bit interested personally, too. Lois, I'm not young, I never was good-looking, but I'm in love

I never was good-looking, but I'm in love with you——"

"Oh! Are all men alike? Doesn't a one of them think of anything but—. Go on, Mr. Jermin; finish up your proposition. What do you offer? A little apartment, a maid, a car, money? All that Neil Becker gives Mrs. Gayton?"

Jermin drew himself up stiffly. "Some people might stoop to furtive love-making and call it romance. I couldn't, You

and call it romance. I couldn't. You couldn't, either. You're—straight. Any one can tell. That being the case, I'm not offering you a proposition, but a proposal. I'm asking you to marry me."

ARRY you?" This was a bigger blow than that other—the dashing of her dreams of a career.

"You're asking me to marry you?"
"Yes." Jermin spoke gravely. "I know this has taken you off your feet. I'm not asking you to decide now. Think it over. Go and have someone else give you an have someone else give you an

honest opinion on your voice—"
"I think you're splendid," she cried;
'but—I'm afraid I'm going to hurt you, Mr. Jermin."

"I didn't falter when it was my turn. I

hope I can take it, too."
"It isn't that you're older, far older, than I. It isn't that you're not an Adonis. It isn't only that I don't love you, never thought of you in that light; but——"

"Love may come. I'll be good to you—"
She shook her head. "It's no use, I'm
afraid," she said. "What I want to say, and find it hard to say, is that your busithis bootlegging-

"I'll give it up—today, if you say."
"That wouldn't mend things. That affair last night, the killing of two men, the shedding of the blood of others. God knows how many other similar affairs . . . you, not poor, weak little Herbie Coles, are to blame. Those men were in your service. You gave the orders that sent them on the road with their liquor. Your hands are bloody, morally, if not legally. I could not forget that—ever."

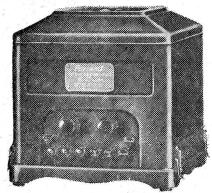

"I'm in this business because others pay me to be in it. Why, even you, standing (Continued on page 29)

THE LATEST IN RADIO ACCESSORIES

Farrand B Eliminator

HEAVY duty B eliminator marking A an advance in B power engineering, only paralleled by that of the loud speaker made by the same concern, has been brought forth by the Farrand Manufacturing Co. An output of 75 milliamperes of current, when most B eliminators furnish 60 or less, is the reason for the name, "heavy duty."

The new Farrand B power unit, shown herewith, will operate a large multiple tube set without overloading. Its voltages are 15 to 70 on detector tube, 60 to 100 volts on radio frequency tubes, and 135 to 200 volts on the last audio stage—equivalent to one stage of power ampli-

No hum is heard, even on head phones, with this eliminator in use. It is silent, troubleproof, foolproof and has nothing to wear out. It requires no acid or water. It employs only one rectifying tube, either a CX-313 or UX-213, the life of which should be at least two years. The Farrand B eliminator operates from or-

farrand 8 eliminator operates from ordinary 60-cycle, 110-volt house lighting alternating current and consumes no more electricity than a 25-watt lamp.

The unit is attractive in appearance, neat and compact. Its size is but 8¾ by 9½ by 9 inches, and its metal case is except in a position of the control of the control operators. finished in a beautiful bronze.

Time-Lite Radio Control Clock

SOMETHING brand new in the line of Radio accessories is the Time-Lite, shown herewith, a Radio control clock shown herewith, a Radio control clock that starts and stops your receiving set automatically. With it connected in the battery switch circuit of one's receiver, the set becomes almost human.

Time-Lite starts, stops and restarts your set without attention at any speci-

fied times. All you need do is set it, similar to the method you would an alarm clock. The new device automatically turns off the set should you forget, thus saving tubes and power supply. Day or night, Time-Lite is on guard and brings in the program you have it set for.

It consumes no electric current and costs nothing to operate. The clock keeps accurate time, and is as easy to attach to one's set as to put in a tube. The device is one's set as to put in a tube. The device is beautifully designed and encased in a marine type clock base, worthy of the most lavish receiver cabinets.

Time-Lite is the invention of Louis Herzog, of the Time-Lite Clock Cerp., New York City.

Permits Using Two Speakers

T HAS long been recognized that no single loud speaker gives perfect reproduction over the entire musical scale, but tends to amplify some tones more than others. The wise fan in search of greatest fidelity of reproduction, therefore, will use two speakers and depend upon their different characteristics to

tire tone range. Set owners who have tried the combina-

tion of a good cone and a good horn type speaker, or two horn type speakers with speaker, or two norn type speakers with different characteristics, report a marked improvement in tone. The home experimenter frequently has difficulty in matching the two speakers used, however. This difficulty can be corrected with the new cord type Centralab Modu-Plug, shown herewith, either by connecting one plug to each speaker so as to control their tone volume entirely independent of each other, or by connecting a single plug to the louder speaker of the two.

How to Build Bruno Regenatrol

HE first step in mounting the parts is to fasten the subpanel to the subpanel supports of the adjustable brackets. Then mount the adjustable portions of the brackets on the subpanel support members and place this assembly into the sloping front cabinet. It is then an easy matter to adjust the It is then an easy matter to adjust the angle of the cable to the angle of the cabinet slope by placing the adjustable panel support edges of the brackets against the slope front of the cabinet until both top and bottom ends of the bracket are flush with the panel guide of the cabinet. You can then tighten the two portions of the bracket and check un again to tions of the bracket and check up again to see that the tightening operation did not move the adjustment.

The relative locations of the parts on panel and subpanel are shown very clearly in the top and bottom views, figures 3 and 4, given in the last issue of the magazine, and in figure 5 of the present article.

In the pictorial wiring diagram, figure 5, the relative locations of the parts as they appear in plan on the panel and subpanel are shown. In some cases they have been separated slightly to avoid confusion in following the wiring. The indicating numbers given the parts in this layout correspond to the numbers given the symbols of the parts in the schematic wiring diagram, figure 1.

How to Place Receiver

The layout shown in the pictorial diagram is that shown in figure 4, but with

the panel tilted back so as to show the instru-ments and terminals more clearly. In wiring the receiver you will find it easiest to place the re-ceiver on your table in the position shown in fig-ure 4 and follow the con-nections as shown in fig-

ure 5.

In the following article, to facilitate giving directions, the "top" of the front panel will refer to the actual top of the subport as it appears subpanel as it appears when placed in the cab-inet, while the "bottom" will be the bottom of the panel as it appears in the cabinet. This of course is just the reverse to the way in which it appears in figures 4 and 5, so please keep this in mind

and avoid confusion.
Similarly the "front" of the subpanel will resubpanel nearest the front panel and the "rear" of the subpanel will refer to the edge nearest the back of the

nearest the back of the cabinet.

The "top" of the subpanel will be the side shown in figure 3 and the "bottom" of the subpanel will be the side shown in figures 4 and 5. The "right" and "left" side of the panel and subpanel will be the right and left respectively as they are

will be the right and left respectively as they are shown in figures 4 and 5.

Now mount coils "T2" and "T3" on the condenser unit as shown in figure 5. In this position coil "T3" will be at the left side of the condenser unit with the tickler coil towards the bottom of the panel while coil "T2" will be at the right hand side with the primary coil towards the top of the panel as shown in figure 5. Coil "T2" should be mounted with the brackets so as to set back from the front panel to allow clearance for the Radiohm.

Next mount the Radiohm on the panel.

Next mount the Radiohm on the panel. Mount the light switch. Then mount the condenser and coil unit, fastening the unit condenser and confunit, restering the unit and front plate on the panel with the screws provided. The shaft member of coil "T3" will project through the hole provided in the panel. Now mount the knobs on the shafts of the Radionm and for mounting to the brackets and for wiring.

Subpanel Assembly

Now proceed to mount the parts on the subpanel. First mount the radio frequency choke coil "RFC." Bend the mounting lugs of bypass condensers "C6," "C2" and "C7" to permit mounting them or mount the subpanel. mount them in the positions shown in

Now mount in order, with their terminals in the positions shown, the Carter battery switch "S2"; rheostat "R1"; Amperites "A3," "A4," "A2," "A5" and "A1"; transformer "T1"; and the "Ant" and "Gnd" posts.

Then mount tip jacks for the voltmeter as shown on either side of socket "V2." Now mount sockets "V1"; "V2"; "V3"; "V4" and "V5" with their terminals in the positions shown in figure 5. Be sure the

Wiring Directions

The next step is to mount the front panel on the panel bracket and proceed with the wiring. Best results in soldering with Kester Radio Solder will be obtained by following the manufacturer's instruc-

location of the terminals is correct or your wiring will be wrong.

Now mount the Multiplug with the locating pin towards the left as shown in figure 5 so that the color terminals will be placed in the positions shown.

The definition of the terminals is correct or terminal which is connected by the leads going from the Amperite terminals.

Now connect together the "F" and "P" terminals of transformer "T1" and connect them in turn with the "Ant" binding post. Connect condenser "C1" (.0005 mfd.) Next mount the two audio transformers "T4" and "T5" with the "G" and "P" terminals towards the rear of the subpanel as shown in figure 5 and the loud speaker jack "J" with its + terminal towards the rear of the subpanel.

post. Connect condenser "C1" (.0005 mfd.) between the + terminal of transformer "T1" and the "Gnd" binding post. Connect the "F" terminal of transformer "T5" with its + terminal towards the rear of the subpanel. the multiplug.

Run a connection from the "P" terminal of transformer "T4" to one of the terminals of "RFC" choke as shown.

Now wire together, the yollow terminal of the Multiplug; the "B" terminal of ter. The wavelength settings are contransformer "T4"; one terminal of controlled by the drum controls of the variable.

will stand the heavy current flow.

If you wish to use power tubes of the CX-371 or CX-310 type you will have to make provision for an output transformer or choke in the last stage so as to prevent excessive current through the loud speaker windings.

windings.
Either dry cell or storage battery tubes may be employed, but the storage battery tubes naturally will give better results. A CX-300A tube is recommended as the detector with the grid return connected with the negative A battery lead as shown.

Where a CY-301A type of tube is used for Where a CX-301A type of tube is used for the detector, slightly better results will be obtained by connecting the grid return of the detector stage with the positive A battery lead.

The Black wire of the Multiplug should be connected with the 4½-volt terminal of the C battery. The C battery required for the last stage will depend on the type of tube used in the last stage and should be in accordance with the specifications of the manufacturer for various B battery

Tuning Instructions

able condensers. lation and regeneration control for efficiency and volume control is obtained by means of the Radiohm and tickler coil knobs.

The two drums can be

turned by a pressure of the finger on both drums. Any slight compensation may be obtained by shifting the finger to one or the other of the drum controls.

In placing the set in the cabinet, two strips of wood three quarters of an inch thick should be an men times should be placed under the bracket feet. This is necessary to allow sufficient space under the subpanel to mount the bypass condensers on end.
The Jewell portable

The Jewell portable voltmeter may be placed on top of the cabinet as shown in figure 2. The low voltage scale leads can be inserted into the tip jacks shown on either side of socket "V2" and the readings for this tube will give a good inthe readings for this tube will give a good in-dication as to the best operating point for the radio frequency and de-tector, tubes controlled by rheostat "R1" on the

subpanel.

This rheostat should be set full on when first tuning the set but can then be adjusted as low as possible consistent with good results and left at that setting for the rest of the evening.

Adjustment of this rheostat will keep the tubes operating at the point indicated by

the voltmeter.

A regular 6-volt lamp should be obtained for the light switch.

Carefully "log" the settings for various stations and record their settings, together with their recording resorting resorting the settings. with their respective wave lengths or frequencies in kilocycles. Once a dozen or so stations have been logged, you will be able to interpolate the dial settings for any desired station.

Figure 5 T2 VC2 VC1 T3 0 C5 0 0 **⊒⊚**G TIOF A2 (o /) 52 R1 T5 0 C2 GND BLUE: B+90>

> Begin wiring by connecting, step by step, the "G" and "P" terminals of the sockets with their respective "G" and "P" terminals of their associated transformer windings. As you make each connection, go over the connecting line on figure 5 with a colored pencil, crayon or pen so that you will know, as you proceed, which connections have been made and which remain to be made. main to be made.

main to be made.

The grid condenser "C3" and its associated grid leak is mounted by soldering one of its terminals to the "G" terminal of socket "V3" and the other terminal of the condenser with the terminal of the tuning unit shown in figure 5.

Condenser "C5" (.006 mfd.) is mounted by soldering one terminal with one termi-nal of switch "S2" and the other terminal with one terminal of the tickler coil of unit "T3."

terminal of each socket. You may notice that the connection as shown in the diagram of figure 5 does not run to the + terminal of each socket. The polarity of the socket does not matter, so follow the wiring scheme shown in order to simplify connections.

Now connect the Amperite terminals to the various points shown in figure 5, marking each connection as you go along. Connections can be made to either end of the double hole terminals. You will find connections simplified by taking advantage of the simple wiring to either terminal as shown. Be sure to get every

denser "C6" and one terminal of condenser "C4" (.0005 mfd.) as shown. Now wire the connection shown between one of the lamp switch (L) terminals and the "A" lamp switch (L) terminals and the "A" battery lead from the "Red" terminal of the Multiplug.

the Multiplug.

Now wire the connection shown between one of the light switch terminals and the "Green" terminal of the Multiplug.

Next run a wire connecting the "Pink" terminal of the Multiplug; one terminal of jack "J"; one terminal of condenser "C8" (.006 mfd.) and one terminal of condenser "C7"

"C7."

Run a connection from the other terminal of condenser "C8" to the other terminal of jack "J" as shown.

Now connect together one terminal of Radiohm "R2"; the "Pink" terminal of the Multiplug; and the "B" terminal of transformer "T5." Now run a wire connecting the other terminal of Radiohm "R2"; one of the terminals of "T2"; one of the terminals of "C2" and one of the terminals of "T3" as shown in figure 5. "T3" as shown in figure 5.

This should complete the wiring of your receiver and all the connecting lines shown in figure 5 should now be filled in, providing you have followed instructions and marked over the lines as you made the connections.

Battery Connections

Little explanation of the battery connections is necessary since the proper connections of the color code wires of the Multiplug are given in the wiring diagrams, figures 1 and 5.

The voltages used for the B batteries are indicated with the exception of the last stage. When a regular 301A type of tube is used in the last stage, the Pink

FIX SET FOR RESULTS

(Continued from page 7)

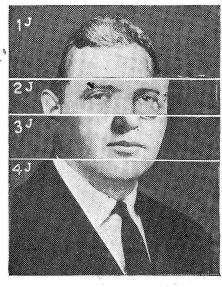

They do not require recharging, and with the exception of one special make, so far as the writer can learn, they cannot be

B batteries should, with normal use, last from six months to a year. There are a great many instances where they have been used for periods much in excess of the time mentioned, yet the average life will be between six months and a

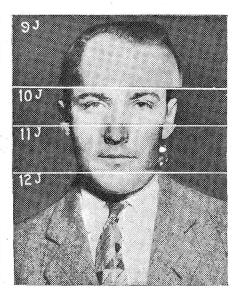

Testing B Battery Voltage Unlike an A battery, the method for determining when a B battery has served its useful life is found by testing its voltage. To accomplish this test a "high resistance voltmeter" should be used. Care should be exercised in the purchase of such an instrument, as the cheaper grades are considered practically worthless. They are not only quite likely to be inaccurate, but in altogether too many cases are injurious to and drain the battery because

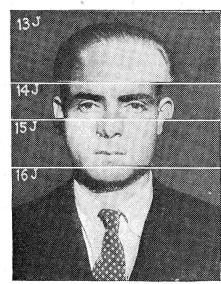

of their low resistance. (Continued on page 30)

(To Be Continued)

CHALLENGE!

NE DOLLAR will be paid to the Radio fan submitting the most errors in any one station's listing in this directory. Letters must reach Radio Digest office not later than two weeks from date of issue corrected. Readers are not limited to corrected. Readers are not limited to correcting one station, but such corrections must be certified by the stations themselves, and NOT by comparison to other so-called accurate broadcasting directors and lists. Readers also must live in same state or province as stations corrected are leasted. Station verifications must located. Station verifications must

accompany corrections.

That's just how sure Radio Digest is that this broadcasting station directory is correct! To make the challenge fair for everyone, broadcasting stations and their employes are barred from this offer. Why? Because the broadcasters are the source of all the data given herein. They are (or should be) interested enough to answer the inquiry sent them every time data on their station appears. This inquiry contains a proof of their last listing and must either be corrected or O K'd as correct and returned to the Digest. Nevertheless, sometimes the stations are careless

and mistakes are made. But Radio Digest is so sure of the exactness of this directory that this challenge is made unconditionally.

With reference to the directory: It appears in six parts, serially continuously; the first four parts are station data listings, arranged alphabetically; the fifth part is a state, city index of stations; the sixth part is a wave length index. The informa-tion contained in each station data listing is given in the following order: listing is given in the following order: Call letters, city, state, watts antenna in put, owner's name, announcer's name, slogan used if any, name of listener in "club," schedule of operating hours, and kind of time used, as "Central," "Mountain," etc. Until wave lengths become stable again, we will not be able to count these in the challenge.

Six successive issues of Radio Digest will give one the most complete and accurate list of broadcasting stations obtainable. This service is original with this publication, and has been maintained from the start. Right of reproduction without permission of any or all of the data contained herein is forbidden.

January 1, 1927

Our Forecast and Review

JANUARY first always brings to our mind the taking of inventory of our past year's work and looking ahead at what the New Year promises. As far as Radio is concerned, despite the numerous complaints of chaos and the lack of Radio control legislation, the year of 1926 has brought about many striking developments, both on the technical side and the program presentation division of broadcasting. Crystal-controlled broadcasting transmitters are now the style, and engineers claim that such transmitters can never vary from their exact wave length.

mitters can never vary from their exact wave length. That is good. This development alone has made the broadcasting year worth while, if for no other reason.

Superpower transmitters, remotely controlled at proper distances from populated centers, have forged ahead. No longer is it necessary to strain one's ears ahead. No longer is it necessary to strain one's ears and sacrifice quality in order to bring in a distant program one especially wishes to hear. Today, on January first, we have at least three transmitters with powers of 50,000 watts, and nearly half a dozen more in prospect. Five thousand watt stations have multiplied greatly and are radiating programs of such quality we never were able to hear in 1925. The trend has been toward increased power among the stations better equipped to serve the millions of listeners.

Enough for the technical developments of broadcasting. In the program division we may "point with pride" to scores of unusual accomplishments, each

pride" to scores of unusual accomplishments, each better than the one preceding. Chains have increased in size and are serving larger areas. Their programs have pleased many listeners previously out of range of the closest chain member. Chain programs have improved, thanks to the goodwill broadcast adver-tising appropriations made by representative business houses whose aim is to please the six million set own-

ers of this country.

A practical demonstration of how well Radio pro-A practical demonstration of how well Radio programs can be arranged and presented was heard countrywide on November 15 when the National Broadcasting company dedicated its purposes to serve the greatest number of listeners in the best possible fashion. This scintillating program was probably unsurpassed by any other broadcast, unless it might be that of the Radio Industries banquet, handled earlier in the fall by nearly two score stations simultaneously.

Broadcasters not belonging to either the new "Red" or "Blue" chains of the National Broadcasting company have likewise made great strides in program building and ability of artists microphoned. We will not stop to discuss the many notable improvements nor mention names of stations. There are far too

We forecast that the Radio legislation problem will be settled before the present short session of Congress

be settled before the present short session of Congress adjourns. We know, too, that many broadcasters now on the air are planning to increase their transmitting powers to the 50,000-watt class.

We believe in the future of Radio. It is still in its infancy despite the many notable achievements here discussed. Ere we know, the projection of Radio motion pictures from a central broadcasting organization will become an established fact. This, we predict, will occur perhaps in 1927, perhaps 1928, but certainly no later.

certainly no later. Yes, 1926 has made Radio history, and 1927 will

New Idea in Political Radio

SOME wag, we will call him wag, has presented the idea that the proper fashion for the Republican, Democratic or other political parties to get adherents to their platforms via the Radio route, is for them to sponsor high-class musical presentations from the

better broadcasting stations.

That is an idea. Perhaps even the platform could be woven into a program by the proper choice and arrangement of various musical compositions. Certainly, we will agree that such a political broadcast would hold far greater interest for the average American citizen than the cut-and-dried oratorical offerings we more often tune out around election time.

Boy, page the national committeemen.

RADIO INDI-GEST

Music

There's music in a purling stream And rippling songs in rain; There are ballads in a sunbeam Echoed in a flower's refrain.

The singing birds in roulades Send forth their songs from trees; The heavenly orbit rejoices With constant jubilees.

The greatest music in the world In a greatest music in the works is when a mother sings;
The while she rocks her babe to sleep As to her breast he clings.

RHEA SHELDON.

A Broadcast for Troy, N.Y.

A Broadcast for 1roy, in. 1.

Dear Indi: As a "consolation" to the late or very nearly late members of its congregation, WCBD, the Zion tabernacle, on a recent December Sunday, broadcast "Blessed Be the Tie That Binds." Indeed, how appropriate. I know, for many's the time I've cussed at my Arrow when I had a heavy date and the old cravat refused to budge.

JUST KOSATKA.

English Radio English

Dear Indi: Asked why he refused to broadcast from the London station, a famous artist said because the fee offered was 2LO. I asked the B. B. C. how much they offered him, but they said that was a B. B. C.-cret!

LONDON BOBBY

The End of a Perfect(ly) Rotten Day

The End of a Perfect(ly) Rotten Date When you are late to dinner and you feel all in, And you've lost your key and can't get in. And you have to wait and push the bell, And the wife lets you in and raises—well, Because you brought beans when she said rice And the iceman forgot to leave the ice, And you learn that your dog killed the neighbors' cat And you learn that your dog killed the neighbors' cat And you sit down to eat and the dinner's cold, And your wife looks tired and you feel old And she wants to go to see a show, And you don't and you say no.

Then she gets mad and goes to bed, And you turn on the Radio and the battery's dead, And you phone for new ones and they send them out, And you hook them up with wires stout, And you mix connections like a country rube, Pull the switch and burn out every tube And this, of course, calls for a drink of Rye, But you go to the cupboard and the bottle's dry. Then you pull the hair from your old bald head, And you get awful mad and go to bed. Listen to me—I want to say—It's just the end of a Rotten Day.

OLD KING

OLD KING TUTT. Hiz-zelf.

Alaska Papers, Please Copy

Camp 50, DeQuincy, La.
December 25, 1926.
Dear Indi: Radio in this part of Louisiana is at the

Dear Indi: Radio in this part of Louisiana is at the present time a "howling" success—more howling than anything else. It is unusually warm here this winter, which, coupled with the fact as told me that Radio reception in this section is very poor most of the time, makes the game a great gamble.

It has reached my ears that east of the Mississippi river, the skeeters are so large that small live stock has to be kept in pens roofed over with chicken wire fencing in order to prevent the mosquitos from either carrying off the animals to be drained of their blood at some other place and time, or stabbed to death in the pens by the vicious bill of the skeeter, which resembles the sword of the Atlantic ocean sword fish.

Yours for veracity, cooler weather and better Radio in 1927.

Now, George, don't exaggerate. I know, restrained as you are from telling DX tales because there is no material, that it is a great temptation to press agent the advantages of the natural history of one's location, but please be careful. That is a heck of a way to end up the old year.

Radio Pickups

A boy stood on the rolling deck

Of a freighter out at sea,

And he warbled a tune, To the silver moon, In the transmitter of XYZ.

A wireless wave picked up the song, And carried it back the line, Where his sweetheart, Nett, Sat in at the set With her brother, Considine.

"Who is this guy with sweety lines?" Her brother asked in scorn, 'He's the mushiest bird, That I ever heard, From the day that I was born."

"He's no such thing, you darn old grouch," "And he carries a punch, Like a six dollar lunch, That would put you in dreamland, any old day." ARTHUR C. STOWELL.

Resolved, as we begin 1927, that we will hereafter charge our batteries and look into the so-called battery eliminator before taking our latest set apart; that we will refuse to listen to any male or female artist raved about by "Marcella"; that we will write to our Senator and Representative in Congress requesting proper Radio legislation, and that we will be darn fool enough to believe that Congress will pass a law satisfying every-

Happy New Year

Condensed BY DIELECTRIC

Station WBAP, Fort Worth, Texas, knows a good organ when the director hears one and has the added advantage of a very capable organist to play it. Merely to play a selection with grand organ, seldom varying the stops, is unlikely to hold the attention of any listener for very long, yet this is the practice of a number of organists heard by Radio. Our Texas organ, to begin with, evidently is a product of one of the foremost organ builders—shown in its quality and variety of pipes. The artist playing it has an acute sense of orchestration and never at a loss to choose the stop best fitted to convey the proper value of a phrase or motif. It is a genuine pleasure to hear this combination.

Are there a dozen stations covering the wave length of Station WAPI, Auburn, Alabama, so that you seldom can get them? I find it true, too. Yet there came a belated section from a program broadcast by this Alabama Polytechnic Institute station of a character tempting an alteration in the name: Terpsichorean instead of Polytechnic. Not that its exposition of the art would merit a place above any of the Night Club classes in modern dancing, but most of the works in Jazzology were on their Radio curriculum. A word about the announcing. A single breath suffices for any length announcement without punctuation inflection pause between station call and name ation inflection pause between station call and name of selection and that is all.

One of the most uniformly pleasing broadcasts to listen for are from the studio of WCBD, Zion, Ill. By that I refer to their entertaining features, naturally, not to the peculiarities in their religious views. The musical offerings are selected from a wide variety of interesting nature and presented by instrumentalists and vocalists.

Now don't misunderstand me when I say there are certain things about "L. P." director of Station WOW, out in Omaha, which are admirable and deserve our praise. I'm not looking for one of his famous form letters and may even find it expedient to comment adversely on some of the numbers fostered by him. Just now I am inclined to compliment Mr. Palmer for the quality of announcing, which is clear and concise, giving station call AND city between each number. There is no unnecessary delay in the progress of his programs and certainly nothing faintly approaching verbosity in the announcements—announcers please note. In addition to handing him that, I wish to pay my respects to that charming team of singers; Jean Gordon and Harry Wilson, in popular ballads.

There is a keen desire on my part to learn the flavors and amount of candy given the director at Station WSUI, university of Iowa station, at Iowa City, as a prize for his singing of the Prisoner's song. Maybe he didn't receive candy at all—that's possible! But this is what I started out to say (and I hope other this is what I started out to say (and I hope other broadcast directors guilty of the same offense will get riled too) about the director of that station. He shifted the onus for choice of selections to egotistic listeners glad to pay the cost of a telegram in return for hearing their own rhetorical efforts broadcast. When will this outworn custom be universally discarded with the concurrence of an augmented audience?

"King Dodo" was given with an acceptable cast from Station WCCO, Minneapolis-St. Paul, the soloists being singers of fair attainment with a tenor and soprano possessing really good voices. The work of the chorus did much to hold the attention of many listeners, as the content could hardly be expected to do.

Complete Rules for "Whozit"

Complete Rules for "Whozit"

1. Radio Digest will sponsor a national game to be called the game of Whozit, which will be participated in by the following Radio broadcasting stations: WHT. Chicago; WMCA. New York; WNAC, Boston; KJR, Seattle; WMAK, Buffalo; WHK, Cleveland; WPG, Atlantic City; WLW, Cincinnati, WJR, Detroit; WOOD, Grand Rapids, Mich.; WSOE, Miwaukee; CTIK, WILL, WHE, Canada, WOM, Nashwile; WOC, Derand Rapids, Mich.; WSOE, Miwaukee; CTIK, WHAK, Androman, WMR, Nashwile; WOO, Chard Rapids, Mich.; WSOE, Miwaukee; CTIK, WHT, Saint, A. Chard, Charles, WOW, Grand Rapids, Mich.; WSOE, Miwaukee; CTIK, WHT, Saint, WAS, Charles, WOW, Grand Rapids, Mich.; WSOE, Miwaukee; CTIK, WHT, Saint, WAX, Jacksonville, Fla.

2. \$26,000 in prizes will be distributed to the successful contestants, as follows: Twenty-four first prizes \$500 in gold for each of the twenty-four stations; twenty-four \$300 merchandise orders for second prizes and the renty-four \$300 merchandise orders for second prizes will be distributed to the individual judged to be the national DX (long distance) "Whozit' champion who has submitted the neatest work, identification and the nearest correct solution of the entire 348 portraits from all stations participating, and \$1,000 in gold for the individual who shall be judged to have submitted the neatest work entered in all of the twenty-four participating stations. The wenty-four participating stations. The wenty-four participating stations and neathers will be a submitted the neatest work and the prize of the following passis: 1st prize, \$500 in gold to the individual whose set of sixteen completed portraits is most nearly correct in the assembly of segments, identification of artists, and of the neatest workmanship; And prize, \$300 in merchandise order to the individual whose completed sets are to be submitted. Each portrait of the prize of the pri

5. The game of Whozit will be free. It will not be necessary to be a subscriber to Radio Digest. Tracings of the pictures may be made at offices of Radio Digest in Chicago or New York or from the files in public libraries, or at the offices of participating broadcasting stations. These with proper identifications may be submitted for the published pictures. All general information helpful to the solution of the game may be obtained from any of the offices of the broadcasting stations participating.

6. Conditions of the game: Beginning with the issue of November 15 and for eight consecutive issues Radio Digest will publish a series of forty-eight composite portraits in each number. These forty-eight composite portraits in each number. These forty-eight portraits will comprise two representations each from the twenty-four broadcasting stations that participate. Each photograph will be intersected with white lines showing the forehead of one artist, the eyes of another, the nose and mouth of a third and the chin and neck of a fourth. Each segment of each composite photograph will bear a number. It will be necessary for each contestant to separate the various segments and reassemble them on a mount so that hey are correctly aligned to complete the portrait of one of the original Radio artists of whom it was taken. Only complete sets are to be submitted. Each portrait must be identified in ten or more words; giving at least five facts about the original artist photographed.

7. Artists (or their representatives) whose fragmentary portraits appear on the "Webozit" pages of

WJZ AND WEAF CHAINS COMBINE TO GI

HIGH LIGHTS OF THE AIR

HE NEW YEAR will be ushered in with a galaxy of fine programs. New Year's morning the famous Pasadena Tournament of Roses floral parade will be described from the microphone of KPSN, Pasadena, so that those in less fortunate sections of the country covered by ice sections of the country covered by ice and snow can imagine this lovely spectacle. In the afternoon the tournament football game between Stan-ford and Alabama will also be broadcast from the Rose Bowl by the same station. Stations KFI, KNX, KOA and probably KPO will also give their listeners a birdseye view of this

The oldest German singing society

The oldest German singing society in the country, the Hartford Saengerbund, will be presented from the studios of WTIC, New Year's day at 8:30 p. m., Eastern time. A chorus of seventy male voices will give these old-time German folk songs.

All-American hight marks the Balkite hour New Year's night over the WEAF chain. Walter Damrosch and the New York symphony will give a program made up entirely of works by American composers. George Gershwin will be heard at the piano in his own composition, "Rhopsody in Blue."

sody in Blue."

The climax of the New Year's day programs will be the broadcast by the WJZ chain and the WEAF chain of the Victor Talking Machine company programs. Over this vast link of stations now called the Blue network and the Bod network the group of stations now called the Bitte network and the Red network, the cream of New York performers will entertain every section of the country. The two-hour program will be given by the world famous artists, John McCormack, tenor; Rosa Ponselle, soprano; Mischa Elman, violinist, and

Note to Readers

THE "Regular Features" give a handy timetable for use when referring to any particular station's feature. All the evening hours are given. Many stations list the same dance orchestras, the

tions list the same dance orchestras, the same harmony teams and the same dinner concerts every week. Instead of giving these similar features to you twice and sometimes three times, we have given them to you but once.

At the head of the "Regular Features" you will find the high spots of the programs listed under "Headliners," for the day you are interested in. The "Educational Features" are listed like the "Regular Features" (just once), because so many of these are university courses and run from week to week. We shall be glad to hear from our readers if these instructions are not clear and shall be glad to

tions are not clear and shall be glad to have our readers offer suggestions.

SATURDAY, JANUARY 1

Headliners

| Headliners | Eastern | State | Resident | State | Resident | State | Resident | Reside

Alfred Cortot, pianist. With them will be heard the Victor Salon orchestra under the direction of Nathaniel Shilkret. Elman and Cortot will sail for Europe immediately after this program. This will probably be the last opportunity for Americans to hear these two artists this season.

A series of historical, dramatic and musical plays based on the national

A series of historical, dramatic and musical plays based on the national ballads will be presented every Friday evening from WSBC, Chicago. The educational value of these is so high that principals in the schools in Chicago have recommended to students that they listen to these between 7:15 and 8 o'clock. Everett George Opie and his players, dramatize the events preceding and leading up to the writing of each ballad. January 7 "America" will be given. "Swing your partner—balance all!"

up to the writing of each ballad. January 7 "America" will be given.
 "Swing your partner—balance all!" This is the call that will hail all KOA listeners Wednesday night, January 5, when the General Electric station broadcasts an old-fashioned quadrille from a country schoolhouse. This novel program includes selections by the Willow Creek quartet, informal singing of rounds, solos on the harmonica, fiddling and concludes with a barn dance.

WSM of Nashville, Tennessee, whose microphone is presided over by the Solemn Old Judge, will be off the air for the first part of this month. When this southern broadcaster reopens about the middle of January, perhaps sooner, a 5,000-watt transmitter will broadcast the celebration. The new Western Electric equipment is an exact duplicate of that of WPG,

Jack Little will spend the first week of January at WCCO. The second week he expects to be at WOW.

ALL YOU WANT WITH OWERIZER

Combined "B" Eliminator and Power Amplifier

The orchestra is literally transported to your own home; every sound is so realistic, every note so full, that the music in all its perfection may clearly be heard above the din of voices and shuffle of dancing feet. Powerized radio reception has many revelations in store for you. You cannot know radio at its best today unless you hear it. Attaches to any set. Costs no more than a "B" Eliminator alone. Ask the nearest Powerizer Dealer to demonstrate this marvelous instrument TODAY.

Windsor Wall or Table Type Cone Speaker Amazes Radio World

The latest model Windsor Cone Loudspeaker has astonished the world of radio. In convenience, quality of reception, and extremely low price, it far surpasses anything yet offered. The cone is 22 inches in diameter and is supported by an easel back. It can be hung up on the wall, as in the picture above, or stood upon any flat surface as shown in the picture below. It contains the famous Windsor loud-speaker unit noted for its extreme clarity and fidelity of reproduction.

Model 302 (Shown below) With Moulded Composition Horn Loud-speaker and 18-inch Cone Loudspeaker.

is combined both the Windsor Moulded Composition Horn Loudspeaker and the 18-inch Windsor Cone Loudspeaker. The top Windsor Cone Loudspeaker. The top is 30 in. x 17 in. and stands 29 in. high. Plenty of battery and equipment space is provided by large shelf in rear. Price, finished in Mahogany or Walnut (Wast of Rockies, \$55)

(West of Rockies, \$55)

Rear view at left shows large compartment with ample space for batteries, battery charger, or battery eliminator, which are entirely concealed from view. Back is open for ventilation of batteries.

At right is shown the Cone Loudspeaker, with its panel, which is quickly and easily removable, allowing instant access to all batteries, battery charger, battery eliminator or other equipment and wiring.

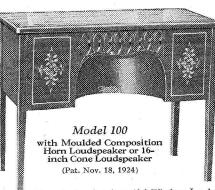

Model 201 Console

with Cone Loudspeaker Ready for Set and Batteries (West of Rockies, \$35)

This Windsor Cone Loudspeaker Console is equipped with a 22-inch Windsor Cone Loudspeaker. Its top is 30 in. x 17 in. and is 29 in. high. The battery shelf provides ample space for batteries, charger, battery eliminator and other equipment. Beautifully finished in either Mahogany or Walnut. This Is the Fastest Selling Line of \$1500 Loudspeakers and Loudspeaker Consoles in the Radio World Today

(Pat. Applied For)

Model 200 with 22-inch Cone Loudspeaker

The quality of radio reception made possible by Windsor Cone and Horn Loudspeakers and Loudspeaker Consoles so far surpasses anything heard heretofore that it amazes and de-lights every radio enthusiast. The Windsor Line is so complete that everyone can find in it a loudspeaker, loudspeaker table, or loudspeaker console exactly to fit their particular needs.

To the right is shown the newest Windsor Loudspeaker Console. It is equipped with a 22-inch Cone Loudspeaker and cabinet suitable for 7-in. radio panels up to 26 inches in length. Battery shelf provides ample space for all equipment. Beautifully finished in either Walnut or Mahogany. Price (without receiving set)... \$4400 (West of Rockies, \$52.00)

Note to Dealers: Write or wire today for details of the highly profitable Windsor line.

- the long awaited perfect B-Battery Eliminator

TERE IT IS—a heavy-duty "B" Battery Eliminator which marks as decided an advance in Eliminators as did the Farrand Speaker in reproducers. The Farrand "B" Eliminator not only takes the place of "B" batteries, but supplies high-voltage capacity heretofore unobtainable in battery eliminating devices—an output of 75 milli-amperes. It is totally free from hum, even on ear-phones! It is troubleproof and foolproof. There are no adjustments, no controls, no fussy meters towatch. Nothing to wear out. Requires no acid or

water. Its performancequiet, powerful, certainwill prove a revelation to radio owners everywhere. Slightly higher West of Rockies

THE Farrand "B" Eliminator operates on 60 cycle, A. C. and can be used with receiving sets of almost any type, providing ample current for sets up to ten tubes. The following voltage is provided: 15 to 70 volts on detector tube; 60 to 100 volts to radio frequency tubes; 135 to 200 volts on last audio stage - equivalent to one stage of power amplification. It employs only one rectifying tube -either UX-213 or CX-313.

Farrana ELIMINATOR

FARRAND MFG. CO., INC. / LONG ISLAND CITY, N.Y.

Pretty, which is enough for some girls, Auriole Craven, above, sings, dances and plays the violin at the Rainbo Gardens nightly. Her voice may be heard over WQJ.

In Rebuilding an Old Set, in Building a New Set -Use Centralab Radiohms for Greater Efficiency -

M OST any radio circuit is improved by using Radiohms of proper value. They hold that sensitive position just preceding oscillative position just preceding oscilla-tion that gives greatest distance, volume and tone, and their adjust-ment is always gradual and noise-less. They give full control of tone and volume. They provide "B" battery voltage control for the new detector tubes or for "B" Elimi-nators. Radiohms are furnished in resistance values for every radio purpose, all smoothly variable to purpose, all smoothly variable to zero with a single turn of \$2.00

A Centralab Radiohm is used in the popular Bruno Circuit, as well as the Infradyne, Henry Lyford, Varion, and many others.

See your dealer, or write for circuit booklet. CENTRAL RADIO LABORATORIES
12 Keefe Ave., Milwaukee, Wis

Use radio parts of proven high quality. Centralab Radiohms and other variable resistances are used by sixty-nine well known set manufacturers.

Your program starts with a snap-

It does if your "snap" judgment is good! Because good reception demands lively batteries. And that's what you get when you snap on your Rectigon to do your charging. The time to start bringing in tomorrow's snappy program is tonight—after the last station signs off. You just plug into the light socket and attach the terminals. That keeps your batteries at their peppy best. That saves service station bother. And you'll never be caught with batteries run down, or absent for charging when the week's best program is on the air.

when you charge 'em at home with

No noise as it charges—not a bit of fuss. Not even a murmur that would disturb the mildest

The Westinghouse ©, 1927, W. E. & M. Co. Rectigon Battery Charger

No acids, no chemicals-no moving parts—nothing to spill or burn. No muss, no worry. You'll have no spoiled rugs, no ruined clothing.

Saves its cost in short order-Count the dollars spent in a few trips to the service station and you'll hotfoot it for a Rectigon, for the good it does your pocketbook as well as

your batteries. Charges both "A" and "B"

batteries — Keeps both packed with power. Bulb is used for "B" battery charging and is enclosed, like all other parts, in metal, safe from ac-cident. (Rectigon charges automobile batteries, too.)

Perfect safety for your set-If you tune in while you're charging there'll be no harm either to set or batteries. Nor will batteries be discharged if anything happens to the current while your Rectigon's attached.

No Storage Battery Radio is Complete Without a Rectigon

THE RECTIGON is a superb Westinghouse product. Things you can't see,

like extra heavy insulation, things you can see, like the durably enameled case—all are of highest quality. Westinghouse also manufactures a complete line of radio instruments, and Micarta panels and tubes.

Formica has a Complete Service on Insulating Material for Radio Manufacturers

APPROVED BY 18 MONTHS OF PUBLIC USE NO OTHER BATTERY IS LIKE IT

Practical tests prove this new product to be the most economical of "B" batteries

IN DAILY use in the home, Eveready Layerbilt "B" Battery No. 486 has fulfilled the promises made for it in laboratory tests. More than a year's study of the performance of this battery in the hands of the public has shown that it is the most satisfactory and most economical "B" battery ever developed. All loud-speaker sets require Heavy-Duty bat-teries — and the Layerbilt has proved itself absolutely the best of them all.

If you are now using the smaller, Light - Duty batteries, the Eveready Layerbilts will give you twice the service, though they do not cost anything like twice as much. If you are already using Heavy-Duties, the Layerbilt, the longest lasting Heavy-Duty ever built, will run your set at least 25% longer, and again you will save money. Unless Eveready Layerbilts are connected to your set, you are spending more on "B" batteries than you should, and you can have no idea how good a "B" battery can be.

Eveready Layerbilt's unequaled service is due to its unique construction. All other dry cell "B" batteries are made of cylindrical cells, with many soldered connections, and a great deal of space is wasted between the cells. The Layerbilt is built up of layers of flat current-producing elements, that make connection with each other automatically, and that fill all available space inside the battery case. It is every inch a battery. In it you get more active materials than in any other battery and the Layerbilt construction makes those materials more efficient.

Those are the reasons why the Eveready Layerbilt has proved itself the longest lasting, most economical and reliable "B" battery ever built.

Just remember this about "B" batteries—Heavy-Duty batteries are more economical than the smaller Light-Duty batteries on all loud-speaker sets, and the patented exclusive Eveready Layerbilt No. 486 is the most economical of all.

B'ELIMINATOR. \$100 Down Balance **READ** MONEY this Proof! BACK~if Not Delighted

I have received the Roll-O B" Battery Eliminator and I am greatly pleased with it. We did not know we had a good radio till we hooked up your Eliminator. To me it is your Eliminator. Louis Horian. Louis Horian. Detroit, Mich.

Ireceived the Eliminator and will say that its performance is all I could ask. Martin Tower, Waterman, Cal. I have your "B" Eliminator and like it very much. So far it has given me very good service. A. J. Marshall, Perth Amboy, N. J.

Recently received a 'B''
Eliminator. Works fine.
A. P. Richards,
Akron, Ohio.

The Eliminator is working perfectly. R. G. Stevens.
Your "B". Eliminator servived and worked satisfied and worked satisfied and worked satisfied and worker one at once. Do you give agencies for local counties? I can sell several of these he. M. Yaest.
Zanesville, O.

"Marvelous!" "Unbelievable!" "What a Bargain!" Every day we receive scores of enthusiastic letters from users of this amazing new Roll-O "B" Battery Eliminator. It does all that any higher priced "B" Eliminator can do—and more!

Forget Battery Troubles Forever All you do is hook up this Roll-O Eliminator to your set and sit back to the greatest radio pleasure of your life. No more batteries to worry about. Enjoy better reception, sharper tuning. Don't worry because "B" batteries run down and spoil your reception.

Operates on All Sets Works perfectly on any direct or alternating current, giving up to 90 volts and using full wave of the power supply. Hooks up to any set.

Completely Equipped - No Extras to Buy
Five minutes after you receive this Eliminator you can be enjoying its advantages. Comes completely equipped, with simple, easy operating instructions. Made to last years. Solidly built in beautified last years and years and years and years and last years. Trial Now, for no more than the cost of good "B" Batteries you can own a Roll-O Eliminator that will make batteries unnecessary forever. Pin a dollar bill to coupon and mail today. Postman will deliver Eliminator to you. Deposit \$6.95 (plus few cents postage) with him. Use Eliminator 10 days. If not delighted, return it within ten days and receive your money. Act quick to become one of the thousands of enthusiastic users.

Trickle Charger, \$3.95

Charges "A" or "B" batteries using ordinary house current. Hooked to your "A" battery gives complete "A" power unit. Send \$1.00 with order. Pay \$2.95, plus few cents postage, to postman when he delivers your charger C. O. D. Use for ten days. If not more than satisfied, return it and get your money back.

UMOR has had it this NEW HAWLEY ADVANCED POWER UNIT was coming—and here it is. Hawley Storage "B" batteries have been standard for over 5 years and the same quality—the same standard of workmanship comprise this unit with its new ingenious hook-up and built-in charger, giving the utmost in B-Eliminator simplicity. Positively guaranteed not to give the slightest kind or trace of a hum or line noises. Simply plug it into your electric socket—and forget it. Any inexperienced person can hook it up in two minutes, as all voltages, including those for any kind of detector, are all plainly marked. Operates any 1 to 10-tube set. Does not contain any acid.

It's so good—such true smashing value—that my 5-year-old 30-day trial offer refund applies. You've got to see it—hear its operation—to fully appreciate this statement.

The prices—only slightly more than ordinary dry cells—90 volts, \$12.75; 112½ volts, \$15.25; 135 volt; \$17.50. For 110 to 120 volts, 25 to 130 cycles alternating current only. Special sizes to order of any voltage. Knock-down kits at still greater savings. All complete as above—nothing to purchase extra. Further covered in my regular two-year guarantee. Ample stocks—all packed—same day shipments and your order is all I need to speed it on its way to you. Simply say—ship C.O.D.—pay expressman its cost plus small transportation charges, and you'll thank me later—or write for my free literature, testimonials, e'c. B. Hawley Smith, 325 Washington Ave., Danbury Conn., U. S. A.

A&B Battery & 2 Charger ONLY

SATISFACTION GUARANTEED

HIS wonderful charger—the sensation of the entire radio industry-charges any type of storage A or B battery, using only a few cents worth of ordinary house current. Works perfectly on either alternating or direct current.

Cannot possibly injure your battery, and will last for years. Many radio fans find it a tremendous success as a trickle charger. Complete and simple directions enclosed with every charger, so that anyone can operate it. There are absolutely no expensive "extras" to buy.

Why pay \$10.00 to \$15.00 for a charger when you can get this splendid GUARANTEED R. B. Charger by simply signing the coupon below and mailing it to us with two dollars (bills, money order, check or stamps) plus 10c in stamps or coin to pay mailing costs. The charger will be sent postpaid. If, for any reason, you should not be perfectly satisfied, return the charger within five days and we will refund your money.

PROOF!

"I received your charger and have used same, and am very much pleased with it. It certainly does charge up a battery in quick time." S. S. Jeffries, St. Louis

"The charger I received from you is giving entire satisfaction."

C. H. Sheffie. New York C. H. Sheffie, New York

"I have seen no charger that I prize as highly as I do this one, and I don't see how it can be put out at such a low price. I am having great success with it."

'D. Larsen, Fairview, Utah

"The charger certainly does do the work."
D. S. Cassel, Philadelphia

Valley Power Unit

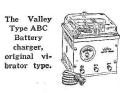

Delivers 50 milliamperes at 180 volts

Operates without hum or noise-Better than dry batteries

The Valley
Type TBC Charger, the charger.

The Valley B Power Unit takes the place of B batteries by providing plate voltage from the house lighting circuit for any radio re-ceiving set of 12 tubes or less. It will supply the plate voltage necessary for a power unit or power tube.

We use the Raytheon Tube in the Valley B Power Unit because only the Raytheon

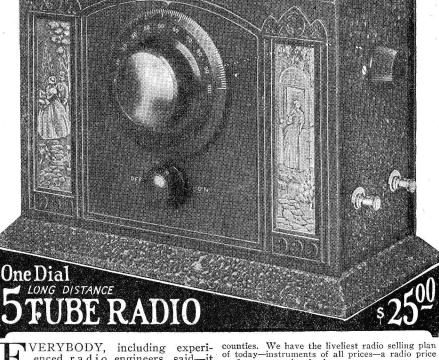

Tube gives full wave rectification and has no filament to burn out. Also, it is the only rectifying tube for this service which will deliver full current and voltage continuously over a long period of

Mounted in hand-

RADIO DIVISION,

VALLEY ELECTRIC CO., - -St. Louis, Mo.

District Offices: Boston, Chicago, Cleveland, Indianapolis, Kansas City, Minneapolis, New York, Philadelphia, San Francisco.

VERYBODY, including experienced radio engineers, said—it cannot be done. But we did it produced a high grade, long distance single dial control radio to operate a loud speaker to retail for—\$25.00 and yet allow liberal discount to agents.

This marvelous instrument is the result of five years' hard work by an organization of trained radio engineers. It is no experiment—thousands are in use—the results speak for themselves.

There Will Be a Radio in Every Home

Thousands have been waiting for just such a radio—a real long distance, powerful instrument—but at a price they can afford.

It is here, and live, wide-awake salesmen will recognize their opportunity immediately—they won't lose a single minute writing for full information.

won't lose a single minute writing for full infor-mation.

Just as there are 100 Fords to one high-priced car, just so will there be 100 Vikings to every \$75.00 and \$100.00 radio—think what this means to men who get in on the ground floor right now.

A \$25 Radio Which Will Equal a \$75 Radio

Put a Model 599 Viking, which retails for \$25.00, alongside any radio retailing for \$75.00 and even more. Compare them for ease of tuning—only one dial to tune on the Viking—distance received, volume and tone. The results will make any man say, "I'll save that \$50.00."

Radio is today the biggest and quickest selling line—thousands are being sold—salesmen have

some black grained metal case. Comes complete with Raytheon Tube, cord and plug.

You Should Make \$100.00 a Week Easily

You can't help it—many will make more. Some will control a county—others will control many

counties. We have the liveliest radio selling plan of today—instruments of all prices—a radio price to fit every pocket book.

Any man who will follow our teaching cannot help but add big money to his present income and start to do it immediately. If you want more money here is your chance, but you'll have to act quick—others will jump at this chance.

Sell Radio in Your Spare Time-

Sell Radio in Your Spare Time—Evenings

You don't even have to give up your present position. The only time radio can be sold is in the evening—by demonstration. So here is a chance to add to your present income. During the past five years we have trained 4,364 men in this very profitable business.

You'll be the first one with a real low priced long distance radio—your price will startle every-body—the results will be even far more startling. Once you demonstrate you're sure of a sale. No one can think of investing \$75.00 to \$100.00 in a radio when this instrument will equal the results and your retail price is only \$25.00. Just think of the advantage you have. Sell a radio for only \$25.00, and yet make a handsome commission.

Territory Is Going Fast-Better Write

Someone is going to get the big profit on the sale of these instruments in your community—is that someone going to be you? Write today for our 100 page book which fully describes not only this wonderful instrument but also a full line of radio at all prices. It's FREE for the asking

For \$295 Complete

A Dor-Ann "B" Battery Eliminator with an output of 100 milliamperes and a condensing capacity of 180 microfarads. Will operate any radio set, from 1 to 20 tubes on A.C. or D.C. current.

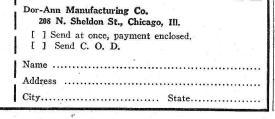

Neat, sealed and ready for use. It weighs 6 lbs. Measure, 3½x8½ by 7 inches. Beautifully esigned in maroon and gold container. Approved and passed by rigid laboratory tests. to any "B" eliminator, regardless of price.

MONEY BACK GUARANTEE

You are fully protected. To prove our claims for the Dor-Ann "B" Eliminator we will allow you to make a full months test. If at the end of the month you are not satisfied we will refund

you your money. Shipment made direct on receipt of \$8.95 or C. O. D. if preferred. Use coupon at right.

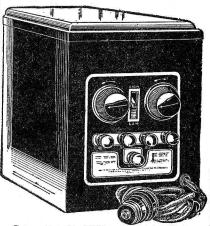

DOR-ANN MFG. CO.,

Genuine RAYTHEON "B" Battery Eliminator

\$50 Value—Our Price Only

West of the Rockies Add 10%

Capacity 50 Milliamps, 200 Volts Adequate for 1 to 15 Tubes

Positively the Greatest Value in "B" Eliminators

While the regular market price of Raytheon is around \$50.00, our factory-to-you price is only \$22.95. At this price, everyone can afford to own a Raytheon and forever discard his B batteries. A "B" eliminator enables you to draw your B current from the light socket. There is more uniform and constant power, no more battery replacements, more volume, improved tone quality, positive regula-tion of voltage, and absolutely NO HUM. By stopping battery replacement, Raytheon pays for itself.

CANNOT DETERIORATE WITH USE-NOTHING TO WEAR OUT:

Contains no materials or parts which are subject to wear. Always delivers the same, unvarying output of current. Employs the use of the famous Raytheon tube to rectify the current. There is no filament to burn out, sag, or wear, therefore lasts forever. Has full wave rectifications, exceptionally efficient. Uses but a few cents worth of current a week. No liquids or chemicals. This is a genuine high capacity eliminator and a quality product throughout.

Delivers Smooth, Steady "B" Current-No Hum

The materials used in making the Raytheon are the finest unit parts, laboratory matched; the case with its rich, genuine Brewster Green Duco finish; the metal fittings of polished nickel; the genuine RAYTHEON tube. Comes completely wired and ready to use from 60-cycle, 110-volt alternating current. The filtering system with its extra capacity, 1000-volt test condensers, and massive, oversize 40-Henry chokes smooth out every ripple and hum from the alternating current. There is nothing to deteriorate, wear out, or replace; Raytheon is good for a lifetime of service, and fully guaranteed. Capacity, 50 milliamps up to 200 volts for 15-tube sets or less.

"GOODY GOODY GIRL"

(Continued from Page 8)

there preaching to me, have drunk of the liquor that I've run into this town."
"I have, but I shan't again. In every glass I'd see a picture of men dead beside a road, bullets in their bodies; other men

trying to staunch their wounds—"
"I see," said Jermin gently. "Then, it's

ONE. This must be goodbye. I've had a fling at the sort of life that you and Mr. Becker and that you and Mr. Becker and Mrs. Gayton and all your crowd lead. It isn't my kind. You've heard me speak of the goldfish that drove me from home. That's what it seems to me all of you are—goldfish. Swimming around and around in a glass bowl of your own and content never to get anywhere—but I mustn't preach again. Goodbye, Mr. Jermin. You needn't think of me again or be afraid that I'll talk; about last night, I mean. That is water over the dam."

Victor Jermin held out his hand. "The ten dollars I owe you," he said. "Goodbye, Miss Sylvester." He bowed and held open the door for her to pass through.

Further and harder renunciation awaited her at Mrs. Trickett's rooming house. Before it stood Mildred Gayton's limousine; in the shabby little parlor, Mrs. Gayton herself.

"My deer my dear" she cried. "When

ton herself.

"My dear, my dear," she cried. "When I went to your room . . . to go on my knees to you . . . beg forgiveness . . . oh, I've had a terrible night . . . Suzette took pity on me at last told me where you were—"
"I'm sorry," said Lois. "Not that Su-

zette told you, but that you have been distressed, and I'm glad that our parting last night was not final—that we have this chance to say goodbye, that I can thank you for-

"My dear! You're not putting me out of your life?"
"Absolutely! It's not you but what you

stand for, Mrs. Gayton—"
"Mrs. Becker, if you please."
"Mrs. Becker?"

EIL married me this morning, just as soon as a licensé coul? as soon as a license could be obtained. Oh, Lois! I'm married, respectable, no longer a—a—kept woman. I'm so happy. He's promised so often we would be, then evaded. What happened last night—I'm so sorry you had to go through it—gave me the club I needed.

ELECTRAD Parts are Mentioned

FIX SET FOR RESULTS

(Continued from page 9)

(Continued from page 9)

Be batteries should be tested while in service or immediately after disconnecting from the receiver. The reason for this is that a Be battery possesses a certain amount of recuperative power when idle, but the moment it is again placed in service it will drop back to its true value. The "cut-off value" or voltmeter reading at which a Beattery has served its useful life is approximately 75% of when brand new. Thus a Beattery which when new indicated a voltage approximating 45 volts would be considered as having served its useful life when it had dropped in voltage close to 33 volts. Beatteries require no servicing other than that they be kept clean and placed not close to radiators. This precaution should be taken because a dry B battery is in reality a "wet" battery inside but sealed. If placed close to any device radiating heat it is but natural to assume the moisture would soon be expended and the life. would soon be evaporated and the life shortened.

shortened.

The function of a C battery has been shown as that of establishing "grid biasing." In design and construction it does not differ from that of a B battery, but is only supplied in voltages of 4½ or 7½ as maximum. Their life when connected in a Radio circuit cannot easily be determined. In such service they supply no current, hence their life represents the "shelf" life of the battery, which may be anywhere of the battery, which may be anywhere from one to two years or longer.

Eliminators; Vacuum Tubes

The present market affords several makes of bot' A and B battery substitutes or eliminators which, if offered by reputable manufacturers, may be depended upon to render very satisfactory service. To describe each of these substitutes in

turn would hardly be of interest to my readers in an article of this general type. Vacuum tubes for Radio usage have now reached a stage wherein no one can afford to experiment with those which are offered at bargain prices. Buy your tube requirements from a responsible dealer, the best will ever prove a wise investment. And don't "rejuvenate" them every

The Reader's View

Bouquet for Shenandoah

The one station we lost, WJZ, we do The one station we lost, WJZ, we do not miss as the two that interfere, KMA and KFNF, come in good generally, and we feel that they are more suited to our district and our needs. With KOIL it is somewhat different, for while they are a good station, they interfere badly at times with WGN and KDKA.

I don't see why one station should be

Prove your reception by the most practical and convenient method: Proof of Reception Cards. Contains spaces for complete reception record, dial settings and signature of announcer. Handy size, 3x5 inches. Send 25 cents for sample package. Radio, 2617 Hollywood Ave., Chicago.

Headphones and Loud speakers repaired. Sam T. Sherrill, Smithville, Texas.

given unlimited power to reach across the continent and drown out some local station that has the needs and desires of the community at heart. We lost some distant stations but gained some more suited to our needs.—O. E. S., Monticello, Minn.

Agreeing with P. B. G.
I heartily agree with P. B. G. Iowa is
the worst for wave jumpers. KOIL puts
on fair programs but cannot compare with WGN and KPRC. Here is a com-KDKA. plete list of stations interfered with by

the jumpers:

KOIL interferes with WGN, WLIB, KTAB, KDKA, KFDM, KPSN, WGR, WSMB.

WAAW interferes with CKY, WMBF WTAM.

KSO and KMMJ interfere with WHT, WLIT, WFI, WOAI, WHAS and PWX. KFNF and KMA interfere with WJZ, WQJ, KFI, WRC, WCAE, WAPI.
The Shenandoah stations are the worst

of all-and usually selling something.

New Device Locates Any Radio Station

Amazing Results Secured By Simple Invention of Kansas City Expert

An amazingly simple device that will enable you to determine instantly the proper dial setting to reach any broadcasting station has been perfected by a Kansas City radio expert. With it all you need is the wave length, given in all broadcasting programs, to tune in exactly on any station that you select.

This new device eliminates all logging, keeping bothersome charts or tables, and shows you how to locate many stations you have never found.

Simply send your name and address with one dollar to the Radio Specialty Co., 540 Dwight Bldg., Kansas City, Missouri, and this device will be sent you postpaid. If after using it for five days you are not convinced it is the greatest value ever offered, return it and your money will be refunded.

SEND FOR THIS RADIO FOLDER

Contains seven hookups for B-Eliminators published in a prominent radio magazine.

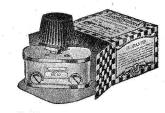

When You Build a B-Eliminator

Use Bradleyohm-E for Variable Resistors and Bradleyunit-A for Fixed Resistors

Always insist that Bradleyohm-E and Bradleyunit-A are included with your B-Eliminator kit, if you want to be assured of perfect voltage control. The leading manufacturers of B-Eliminators have long since adopted these Allen-Bradley variable and fixed resistors as standard equipment for their B-Eliminators.

Ask your dealer for Allen-Bradley Perfect Radio Devices, today.

Bradleyohm-E PERFECT VARIABLE RESISTOR

For B-Eliminator service requiring wide voltage control, Bradleyohm-E is essential. It is an oversize Bradleyohm with sufficient capacity to handle all normal Beliminator requirements. Be sure to ask for Bradleyohm-E in the checkered carton. Your dealer can get them for you.

PERFECT FIXED RESISTOR

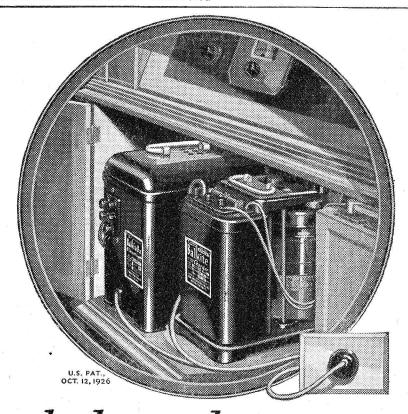

This solid, molded, fixed resistor has no glass or hermetic sealing in its construction. It is a solid unit with silver-plated end caps and is not affected by temperature, moisture and age. By all means, use Bradleyunit-A when you need a fixed resistor.

Make your radio set a light socket receiver now

with Balkite"B" and the new Balkite Trickle and High-Rate Charger

To enjoy the convenience of operating your radio set from the light socket add the new Balkite "B" and the new Balkite Charger.

Balkite "B"—the proved "B" power supply-eliminates "B" batteries entirely and supplies "B" current from the light socket. The new Balkite "B"-W serves any set of 5 tubes or less requiring 67 to 90 volts; Balkite "B"-X sets of up to 135 volts and 8 tubes

Most owners of even small sets will buy Balkite "B"-X which will take care of nearly any set you buy in the future.

The new Balkite Charger, with both high and low charging rates, is easily the greatest charger value in radio. It combines the advantages of both trickle and rapid charging. At the low rate, on trickle charge, it automatically keeps your "A" battery fully charged, and in effect converts it into a

light socket "A" power supply. Its high rate provides an ample reserve of power for the largest sets.

Both Balkite "B" and the Balkite Charger are entirely noiseless in operation. Both are permanent pieces of equipment, with no bulbs and nothing to wear out or replace. Other than a slight consumption of household current, their first cost is the last. Both [illustrated]; Balkite "B"-Y any standard set. are built to conform with the standards of

> the Underwriters' Laboratories.

> The greater portion of the radio season, including the months in which reception is best, is still before you. Add these two Balkite Units to your receiver now. Then you too will know, not only for this year, but for years to come, the pleasure of owning a radio set always ready to operate at peak power. Ask your dealer. Fansteel Products Company, Inc., North Chicago, Illinois.

Balkite Trickle Charger \$10

With 6-volt "A" batteries can be left on continuous or trickle charge thus automatically keeping the battery at full power. With 4-volt batteries can be used as an intermittent charger. Or as a trickle charger if a resistance is added. Charging rate about .5 ampere. Over 300,000 in use. Price \$10. (West of Rockies \$10.50. In Canada \$15.)

Balkite Combination

Once connected to your "A" battery, supplies automatic power to both "A" and "B" circuits. Controlled by the filament switch on your set, Entirely automatic in operation. Serves any set now using either 4 or 6-volt "A" batteries and requiring not more than 30 milliamperes at 135 volts of "B" cur- practically all sets of up to 8 tubes. Price \$59.50.

All Balkite Radio Power Units operate from 110-120 volts AC current with models for both 60 and 50 cycles. The new Balkite Charger is also made in a special model for 25-40 cycles.

WALTER DAMROSCH and the

NEW YORK SYMPHONY

on the air

Every other Saturday night a symphony concert. On alternate Saturdays one of Mr. Damrosch's famous piano recitals on the great Wagner Music Dramas. Over stations: WEAF, WEEI, WGR, WFI, WCAE, WSAI, WTAM, WWJ, WGN, WCCO, KSD, WDAF, WOC.

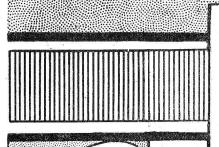

Balkite Hour

Balkite Charger \$19.50. (West of Rockies \$20, In Canada \$27.50.) Balkite "B-W" \$27.50, "B"-X \$42, "B"-Y \$69. (In Canada "B"-W \$39, "B"-X \$59.50, "B"-Y \$96.)
