# a bit of Disc and Data

Aware that school and college bands today are playing popular songs, RCA Victor has issued an interesting album called **Pop Goes The Swingin' Marchin' Band** by Ray Martin and his Orchestra.

Times have changed since Sousa's day. The "Washington Post March" is still a favorite, but now it stands in the books next to "Tequila." The tempo has changed too and is no longer exclusively the 6/8 of the old-timers. It has been stretched to include such diverse beats as march-waltzes, rock and roll and even the Latin beat. The reason for the new look, undoubtedly, is the fact that band music, like all other kinds of music, changes and becomes dated. In short, the bands have gone. "pop."

The arrangements in this album are a bright illustration of these changes. Although the instrumentation is the same as the old marching bands, the treatment is different. The arrangements call for the strong swinging beat of today's pop orchestras, and students everywhere will swing while they march.

RCA Victor has released a Harry Belafonte endeavor; **Belafonte Sings The Blues**. The album contains a satisfying set of songs performed in the blues vein.

Belafonte says he always had a feeling for the basic blues and that "This is the area—the blues—with which I have the strongest identification." His approach on the recording shows a rare sensitivity and understanding of the material. As Belafonte himself reflected: . . . "It took several years of removing myself from that predominantly modern jazz environment and finding myself and my own set of values before I had the courage to attempt an album like this."

Much power and that wryly unconquerable spirit of the blues are evident in all the numbers.

EXACT REPLICA

## Army Grenade

(AS USED IN HAND COMBAT)

Yes, this is your chance to be the first in your neighborhood to have this realistic "weapon". It's an exact replica of the one used by the army and our marines in fierce hand-to-hand combat, to wipe out machine-gun nests, demolish trenches, "get" concealed snipers, defend against massed attack.

Just cock the firing mechanism, load the cap and you're ready! Imagine — you're a marine creeping up on that machine-gun nest, your grenade is in your hand. You creep close, low. Now you're in range, you pull the safety pin with your teeth and throw! Bull's eye, right into the nest. Blast! The machine gun flies out broken. Now silence. Your buddies cheer — the advance starts up again!

This grenade explodes 4 seconds after pulling pin as it strikes ground. Can't break. Heavy gauge steel firing mechanism. Uses standard caps. Can be exploded over and over. Comes complete with throwing instructions. (Parents: This toy grenade is completely harmless.) Clip ad, write your name and address clearly in margin and send it with \$1.00 plus 25c shipping charge — cash, check or money order to:
