MILLS AND SCHUETTE DISCUSSING SUSTAINING FEES

A second meeting between E. C. Mills, General Manager of the American Society of Composers, Authors and Publishers, and Oswald F. Schuette, director of copyright activities for the National Association of Broadcasters, was held in New York City last week. They will meet again today.

Mr. Mills and the attorneys for the NBC and CBS drew up contracts for the key stations of the networks and chain-owned stations. These contracts are said to be practically completed. It is assumed that these contracts will be the basis of contracts to be offered to other chains.

At their last conference, Mr. Schuette and Mr. Mills talked, for the most part, about a revision of the sustaining fees in the contracts for individual stations. One of the important questions upon which they have agreed is that the broadcasters shall pay the percentage only on the amount of money actually received by them. There will be a rebate for bad debts. It is the understanding, however, that money received later on for bad debts is to be accounted for.

One point which has puzzled many broadcasters is whether the three per cent charge applies on programs which make no use of music, such as talks, spot announcements, sports broadcasts, and so forth. The tax does apply to all programs from which revenue is received. The broadcaster must pay three per cent of his gross revenue, in addition to the sustaining fee, during 1933, four per cent during 1934, and five per cent during 1935.

WCCO TO DEDICATE NEW TRANSMITTER

The Board of Directors of the Northwestern Broadcasting Company, Inc., have issued invitations for a dinner on Thursday, September 15th, at 7 o'clock at the Nicollet Hotel in Minneapolis, to mark the completion of the fifty thousand watt transmitter of Station WCCO.

From ten until five o'clock during that day, WCCO's new transmitter at Anoka, Minnesota, will be open for inspection to the guests of the Board of Directors. Special automobiles will leave Minneapolis at frequency intervals during the day, and guests wishing to visit the transmitter are invited to assemble at the offices of the company on the twelfth floor of the Nicollet Hotel, where transportation to Anoka will be arranged.

A RADIO BUILT TO PLEASE WOMEN

It is generally conceded that women dislike mystifying technical devices, which to the contrary please the average man.

A good example is the automobile dashboard, replete with many instruments.

The Zenith Radio Corporation has endeavored to simplify or eliminate as many of its operations which might be termed "technical" on their new radio receivers. For example, tuning accurately in the past has been accomplished to a great degree by the swinging hand of a meter. This has proved to be too confusing and difficult for the average person to see.

Zenith has produced a new, simple, easily seen tuning device known as "Shadowgraph." As one turns to the desired station a wide shadow appears on a translucent strip. As the peak of resonance is reached this wide shadow becomes narrower and narrower. When it reaches its narrowest point, the station is tuned exactly and scientifically at the proper peak. It is impossible to tune inaccurately.

This is assurance of the finest tone quality obtainable on the receiver, for it is generally known that when the station is not tuned to the exact peak of resonance, tone quality is poor. It is said that the Zenith "Shadowgraph" tuning device is one of the greater advances in radio developments this year.

ECHOPHONE RADIO TO ADD 300 TO PAY ROLL

The expansion program of Echophone Radio Manufacturing Co., Waukegan, Ill., and Western Television Corp., Chicago, authorized by the respective Boards of Directors, is to be headed by Arthur T. Haugh, former President of the Radio Manufacturers' Association and of National Standard Parts Association.

Mr. Haugh replaces, as President of Echophone Radio, A. U. Magnan, resigned. He was also elected a director of the company as well as of Western Television Corp., which is affiliated with the former company.

New models in all lines have been approved and 300 employees will be added to the Waukegan factory pay roll as soon as tools and dies are completed.

Echophone is to manufacture and distribute the television apparatus, formerly made by Western Television, as well as its own line of radio receivers. Western Television will engage exclusively in television research and the manufacture of television broadcast equipment.

APPLICATIONS OF WERE FAVORED BY EXAMINER

Applications of the Erie Dispatch-Herald Broadcasting Corp., Erie, Pa. (Station WERE) for a construction permit for new equipment, for modification of license to change corporate name, and for renewal of station license, were all recommended for grant in an Examiner's report made public by the Federal Radio Commission.

The report, submitted by Chief Examiner Ellis A. Yost, declared that the station is operating in public interest, and that granting the three applications would increase its public service.

RMA GETS TREASURY DEPARTMENT RULING

The Radio Manufacturers' Association is just in receipt of the following statement from the Treasury Department relative to its ruling on chassis and cabinets:

"You are advised that under the law and regulations, manufacturers of cabinets and chassis for radio receiving sets cannot sell such articles tax free under exemption certificate. However, where a manufacturer of a complete radio receiving set purchases various taxpaid components for use in the manufacture thereof, he may sell the complete set at a specified price and will be permitted to pay tax only on the taxable articles manufactured by him, provided, such records are kept that will show specifically the selling price of the articles manufactured by him."

MEXICO TO DISCUSS RADIO PACT WITH U. S.

That Mexico is finally willing to treat with the United States on the allotment of wave lengths to clear up radio interference in the United States from south of the Rio Grande, is one of the outstanding developments of the first day of the International Radio and Telegraphic Conference, which was opened by Premier Azana, was the news from Madrid in a wireless to the New York Times on September 3rd. Representatives of 125 nations and of most of the leading private companies of the world are attending.

The Spanish Premier welcomed the gathering in the Senate building, where the League of Nations met four years ago. The delegates are to sign an international protocol clarifying control of the air and private agreements to speed up the arteries of world communication and cut technical costs.

Emilio Torres let the position of the Mexican delegation be known. He said the group had been empowered to discuss a private arrangement with the United States delegation; composed of thirty-five, including State Department representatives. While any decision reached would have to be approved by the Mexican Government, since the delegation had plenary powers only for signing a general international agreement, Senor Torres remarked that an agreement with the United States would be one of the principal tasks of the Mexican delegation.

Mexico has consistently refused official overtures to make an agreement with the United States, and interference from Mexican stations made broadcasting next to impossible in certain parts of the United States. The most famous case is that of the Milford (Kan.) "goat gland specialist," Dr. John R. Brinkley, who, after having his broadcasting license revoked in the United States, established a powerful station just south of the Rio Grande.

With Soviet Russia represented for the first time and delegates present from lands as far apart as Iceland and Polynesia, the conference aims to reach a complete world-wide understanding on just how air, land and under-water communications are to be correlated and controlled, and agreement seems possible for the first time. While the question of press censorship will be brought up, the consensus is that it will not occupy so important a place as preliminary reports indicated.

Four thousand resolutions, dealing with everything from changing codes and raising the minimum number of words in various kinds of telegrams to widening broadcasting bands, will be discussed. It is thought possible that new radio and cable hook-ups will be discussed by private companies.

RADIO CARS REPLACE SIGNAL LIGHTS IN NEW YORK CITY

Because of the success of the recently installed system of broadcasting police alarms by radio, the 201 green lights by which patrolmen on post were signaled from their station houses in emergencies have been discontinued in New York City. In place of the signal-light system, a radio-equipped police automobile will be in the vicinity of each station house to answer emergency calls.

The abolition of the light system will result in a saving of about \$2,400 a year. The lights were attached to the top of police phone-box pillars and were known as "blinking Irishmen."

Between February 25th, when the radio-alarm system was put into operation, and July 12th, Mr. Mulrooney, Commissioner, said that 295 major arrests were credited to its effectiveness. There are 250 radio-equipped cars in use.

TO RECONSIDER FOOTBALL BROADCASTING BAN

The broadcasting companies expect the Eastern Intercollegiate Association to lift the ban on radio descriptions of football games this Autumn which was announced in June by Major Philip B. Fleming, representative of the United States Military Academy and president of the association. A meeting of the association is scheduled to be held tomorrow (Friday) at which time the radio decision will be reconsidered.

Representatives of the Columbia Broadcasting System, the National Broadcasting Company and other stations plan to hold a conference with several members of the intercollegiate organization prior to the association's meeting. The radio men will endeavor to prove that broadcasting does not keep the public away from the stadiums.
