COPYRIGHT NEGOTIATIONS ST. LOUIS TOPIC

One of the principal things which will be decided at the St. Louis Convention of the National Broadcasters Association November 13 will be whether the work of Oswald F. Schuette in connection with the copyright situation will be endorsed, and whether the efforts of Philip G. Loucks, managing director of the Broadcasters Association will be approved, and whether either or both of them will be retained by the Association. Mr. Schuette will make his report on Wednesday, November 16.

The widening of the broadcast band, now being discussed at the Madrid Conference, will also come in for further consideration. Representative James M. Beck, of Pennsylvania, will address the convention on the first day, as will Federal Radio Commissioner Harold A. Lafount, who will be the official representative of the Commission in St. Louis.

Reports will be made by the following committee chairmen: Louis G. Caldwell, NAB representative to the International Radiotelegraph Conference, Madrid; H. K. Carpenter, commercial section; Harry Howlett, merchandising; Roy Harlow, committee on standard forms; John Patt, committee on station promotion; William S. Hedges, World's Fair Exhibit; John V. L. Hogan, Engineering section; E. K. Cohan, technical director, Columbia Broadcasting System; C. M. Jansky, Jr., consulting radio engineer; Edgar L. Bill, program section, Miss Judith Waller, educational committee, Henry A. Bellows, legislative committee; Paul W. Morency, Copyright Committee, and Oswald F. Schuette, director NAB copyright activities.

In an editorial headed "NAB's Future", Broadcasting magazine comments as follows:

"In a fortnight the NAB holds its annual convention at St. Louis. The program calls for the discussion of the usual economic and regulatory problems, with an added dose of copyright and proposed solutions. But the convention means more than that. The very existence of the NAB is at stake.

"That may sound like a bold, groundless statement to many broadcasters. But to those who have been active in the Association's affairs it is truth only too well known. Many broadcasters are indignant over the NAB's showing during the past year, particularly on copyright. Properly or not, they believe there should be a sweeping basic reorganization, not only of its activities, but also of the constitution under which the association functions. If they have their way, the organization will be stripped of everything but its name and built on a new foundation."

Although the discussion is not included in the official program, it is believed that the broadcasters may talk about the matter of wire line charges which the stations must pay to the A. T. & T. It has been estimated that the broadcasters pay from \$8,000,000 to \$10,000,000 for this service, with no fixed schedule of rates.

GOVERNMENT SUIT AGAINST RCA MAY BE SETTLED BEFORE NOV. 15.

Negotiations between the companies in the radio manufacturing group charged by the government with monopoly are reaching a stage where a new plan for reconstructing their relationships to meet the principal objections set forth in the suit against them is likely to be formulated within a few days. It will be submitted to the Department of Justice in advance of the date set for hearing of the suit, which is Nov. 15.

There will be, in fact, not one plan but a series of separate measures proposed. No effect is to be given to the important steps envisaged until the directors of the companies involved, principally General Electric and Westinghouse Electric and Manufacturing and the Radio Corporation of America, have completed proposals that they are prepared to submit to their stockholders as well as to the Department of Justice.

It is made clear by those in touch with the developments that while the cross-licensing and stock ownerships attacked in the government suit are believed to be legal and proper by the respective companies, the companies are prepared nevertheless to meet the objections in so far as they can do so without jeopardizing their investments or patent ownership rights.

In the main, two principal problems are involved in the present discussions, which have not been completed. The first is the preparation of the new licensing agreements to eliminate the present cross-licensing arrangements; the second is the determination of the manner in which the large ownership of Radio Corporation stocks by General Electric and Westinghouse can be altered or reduced to satisfy the expressed dissatisfaction of the Department of Justice.

At the present time the Radio Corporation of America holds exclusive licenses of the General Electric and Westinghouse companies for all radio patents involved in the manufacture and operation of radio receiving sets and tubes.

Under the readjustments that are being considered, the exclusive licenses would be canceled and all three companies would hold their own patents, licensing each of the other companies under non-exclusive arrangements so that any one of the companies could manufacture complete radio receiving sets. The same privilege would be available to all other radio manufacturers.

Many details would be involved in such a reorganization. There are approximately \$18,000,000 advances owed to the electrical companies by the Radio Corporation of America, the funding of which under any altered stock ownership would require prolonged consideration. An equally important problem is the matter of negotiation.

Another plan which is reported to have been considered by the boards of the two electrical companies is the distribution of their respective stockholders of the common shares of the Radio Corporation of America. General Electric owns 5,188,755 shares of common stock and 27,080 shares of Class A preferred stock of the Radio Corporation of America, and Westinghouse Electric and Manufacturing owns 2,842,950 common and 50,000 Class A preferred shares of the same company. Combined, these stocks amount to 51.4 per cent of the voting strength of the Radio Corporation of America.

In working out plans to revise the relationships of these three companies the management of the Radio Corporation is concerned with solving the problem to the benefit of all classes of stockholders regardless of the relative strength of the holdings. The general plan, while endeavoring to meet objections expressed in the government suit, is intended to be a positive rather than a negative solution of the problem.

MAJESTIC ANNOUNCES A NEW ALL-ELECTRIC AUTO RADIO

The new all-electric Motor Majestic is the Grigsby-Grunow Company's latest contribution to the radio markets. It entirely eliminates the use of "B" and "C" batteries and is designed for simplicity of installation and service.

The receiver, designed for any make of automobile, is a six-tube superheterodyne with full automatic volume control. The receiver uses the following tubes: Two 38's, three 39's and one 85, the latter being a new development in A.V.C. tubes, and this is the first time it has been used in an auto radio. Sensitivity and tone are said to be comparable to a home receiver.

The source of supply for "B" current is a rugged, trouble-free dynamotor which operates from the automobile battery. The chassis and "B" eliminator are contained in heavy metal cases, mounted out of sight beneath the floor of the car, and operated from a chromium plated remote control unit clamped to the steering column just beneath the steering wheel. The seven-inch electro-dynamic speaker is mounted below the dash,

The Grigsby-Grunow Company believes that the new Motor Majestic is as well shielded from noises developed by the car motor as is possible.

WLW SEEKING NEW RADIO TALENT

Station WLW, Cincinnati, carried an advertisement in The New York Times yesterday asking for experienced professionals for broadcasting. Auditions are being given at the Hotel New Yorker by Mr. Nicholls.

X X X X X X X X X X

DILL PREDICTS COPYRIGHT LEGISLATION

Legislation regulating the amount of copyright fees paid to composers by broadcasting stations is predicted by Senator C. C. Dill, of Washington, co-author of the Radio Act, in the following letter to Broadcasting magazine:

"I have just read the article by Sol Taishoff concerning the proposal of the American Society of Authors and Composers to discriminate in their royalty charges in favor of newspaper-owned stations, as printed in your October 15th issue of Broadcasting.

"This latest attempt of the American Society to curry favor with the great newspapers of this country is a new illustration of their attempt to use every possible influence of public opinion to keep down opposition to their tyrannical and arbitrary use of the power which they exert by control of ninety per cent of the copyrights on the most popular music. I sincerely hope that radio stations owned by newspapers will not be induced by this mess of pottage to endanger their birthright to run radio stations.

"There is already a growing sentiment in the country that newspapers should not be permitted to own radio stations. I have never believed that Congress should legislate to that extent, but if the newspaper-owned stations are to be special favorites of this monopolistic music organization, then there will be new reason for legislation that will prohibit the newspapers from owning and operating broadcasting stations.

"I am more and more convinced that Congress must at an early date pass legislation to compel fair treatment by any organization controlling any considerable amount of copyrighted music, to the extent of compelling them to charge no unreasonable fees, make no unjust requirements and above all, make no discriminatory agreements."

HARBORD ATTACKS ROOSEVELT RECORD

Asserting that no State administration could disown "the political corruption of any great city within its borders", Maj. Gen. James G. Harbord, chairman of the board of the Radio Corporation of America, in an address at a Union League campaign luncheon in Philadelphia, attacked Governor Roosevelt's record of the last four years in connection with New York City rule.

Orders for nearly \$100,000 worth of newly designed aviation radio-telephone apparatus have just been placed with the Western Electric Company by United Air Lines, American Airways, Transcontinental and Western Air, Western Air Express and National Park Airways. These orders indicate that the air line operators in this country are keeping their equipment abreast of latest improvements.

RADIO PRIZE COMPOSITION PROVES POPULAR

It will doubtless afford Deems Taylor pleasure to learn that as a result of winning an award in his radio prize competition, Carl E. Eppert, of Milwaukee, continues to win plaudits with his composition "Traffic", brought forth by the NBC composers' contest last Spring. "Traffic" was played last week by the Chicago Symphony Orchestra. Frederick Stock, conductor of the orchestra, and critics were unanimous in their praise of it, one of them declaring that it was "a brilliant success, which heralded a continuous climb up the ladder".

The Cincinnati Orchestra, conducted by Eugene Goossens, included "Traffic" in recent performances and the Chicago Symphony Orchestra will play it again in Milwaukee, where the promising American composer will appear in person to take a bow, as he did in Chicago.

X X X X X X X X X X

A PRIVATE PRETZEL MARK

Paul B. Klugh, of Chicago, newly elected legislative chairman of the Radio Manufacturers' Association, is a raconteur extraordinary. One of his best stories is about the Pennsylvania Dutch pretzel manufacturer.

"Everybody knew this man's pretzels", Mr. Klugh, himself of Pennsylvania Dutch extraction, explains, "because there was an authentic mark on each and everyone which no one else in the world could duplicate. After he had finished bending the pretzel he stamped upon it his own thumb-print."

XXX X X X X X X X X

RADIO-PIANO MAKES ITS APPEARANCE

A new combination, the radio-phonograph-piano, manufactured in Germany under the patents of John Hays Hammond, Jr., for Radio City, was demonstrated privately in New York last week.

"The ordinary piano is limited for large concert halls", said Mr. Hammond, in describing the development of the instrument. "More than seven years ago I began experimenting with electrical amplification to build up the piano tones and make the instrument more versatile. When amplification was applied, a great many noises, normally imperceptible to the ear, were encountered. The German firm of Bechstein, piano makers, became interested in the piano side of the problem, as did Dr./Ernest, of Berlin, winner of the Nobel prize
W.

in 1920, who helped to perfect this instrument. He has incorporated my electrical-piano patents with several scientific developments of his own, with the result that this instrument, in all appearances a grand piano, covers a wide tonal range from the harpsichord to the organ.

"It does not replace or even parallel the present piano. This is absolutely a new musical instrument, a creator of new tonal qualities, which we find excellent", said Mr. Hammond. "The jazz effects are extraordinary. The percussion effects are novel. By different degrees of amplification, always under control of the artist, the various harmonics can be brought out at will like pulling the stops of an organ."

Most remarkable of all this piano can be made to sound like a full orchestra with saxophone, drums, accordions, a celesta, a harp, or even a toy piano.

No longer does the force of the fingers control the volume as they strike the keys. Touching the keys actuates tiny hammers which give a gentle blow to a string. The vibrations are picked up by miniature magnetic microphones of which there are eighteen inside the piano. Each microphone is the terminal of a number of strings.

S. L. Rothafel heard the new instrument while in Germany in search of ideas for Radio City, and has ordered eight for shipment to New York.

A permanent setting of the left pedal establishes regular piano tones. The volume can be made soft for most pleasing effects in a small room or it can be swelled into tremendous power to vibrate through a large auditorium.

There is a radio set inside the piano. A small switch puts it into use. The phonograph is in a special cabinet alongside the piano. The loud-speaker is included in the cabinet and through it the music of the entire instrument surges.

X X X X X X X X X X

NO 1933 RADIO SHOW

One thing was decided by the Radio Manufacturers' Association when they met in New York recently -- there will be no national radio show in 1933. In fact there may never be another one. The show will be omitted this year as an experiment to see what effect, if any, it has upon the year's business.

Radio manufacturers are to be urged to devote more of their advertising space to a discussion of program features. M. H. Aylesworth, president of the NBC, told the RMA board of plans to develop programs designed especially to promote use and, therefore, sales of automobile receiving sets and also sets

Cooperation between set and tube manufacturers to reduce the number of new tubes brought into the market was effected by the Set and Tube Divisions.

It was decided that Chairman Murray of the Set Division should formally and in detail advise all receiving set manufacturers and their engineers of the serious difficulties, including loading up of dealers, involved in the promotion of numerous new unnecessary and minor tubes. Set manufacturers will be urged to reduce their demands on tube makers for products embodying only minor or special developments.

There was unanimous adoption by the RMA Board of a resolution calling on radio patent licensors, including the Radio Corporation of America, to take adequate action against unlicensed manufacturers: The resolution follows:

"Inasmuch as the manufacture and sale, without royalty payments, of unlicensed radio apparatus which infringes patents under which members of this Association are licensed and pay royalties subjects such members to serious disadvantages in competition;

"Therefore, Be it Resolved, that the owners of patents under which members of this Association are licensed and pay royalties be requested by this Association to enforce in every proper manner respect for their patents by the manufacturers and vendors of competing apparatus which infringes such patents."

This action immediately follows recent numerous lawsuits instituted by holders of loud speaker patents against many prominent chain-store, furniture and other purchasers of unlicensed products and is expected to result in similar action to protect receiving set manufacturers against many unlicensed and irresponsible manufacturers.

X X X X X X X X X X

BROADCAST BAND MAY BE WIDENED

An agreement on the widening of the broadcast band by the addition of 70 kilocycles, or 7 channels, for the use of the United States, Canada, Mexico and Cuba may be announced shortly from the International Radiotelegraph Conference now meeting in Madrid.

There were two conferences of all interested parties in the United States at the State Department, in Washington, last week. Undersecretary of State William R. Castle presided and it is believed that the American delegation in Madrid was instructed to approve the plan. The proposal is opposed by the Navy, the Coast Guard, and American shipping interests who now operate stations on the frequencies involved.

The move may be blocked by the fact that the international distress frequency would have to be moved from 500 kilocycles to probably 350 kilocycles.

DECISIONS OF THE FEDERAL RADIO COMMISSION

KVOO, Southwestern Sales Corp., Tulsa, Okla. and WAPI, WAPI Brdcastg. Corp., Birmingham, Ala., granted authority to operate simultaneously from 7:30 to 8:30 p.m., and from 8 to 9 p.m., CST, Monday, Oct. 31, with 1 KW power, in order to broadcast political speeches; KSOO, Sioux Falls Brdcastg. Assn. Inc., Sioux Falls, S. Dak., granted authority to operate simultaneously with Station WRVA, on 1110 kilocycles, from 6:30 p.m. to 1 a.m., CST, Nov. 8, in order to broadcast election returns; WCAD, St. Lawrence University, Canton, N.Y., granted auth. to install automatic freq. control. Also granted renewal of license 1220 kc., 500 w., spec. hours; WDEV, Harry C. Whitehill, Waterbury, Vt., granted mod. of CP to change type of eqpt. uthorized by CP; and

WROL, Stuart Brdcastg. Corp. Knoxville, Tenn., granted mod. of CP to make changes in eqpt. and change commencement date from Aug. 29 to 10 days after this date, and completion date from Nov. 29 to 60 days after this date; WHA, Univ. of Wisconsin, Madison, Wis., granted mod. of CP extending completion date from Sept. 13 to Nov. 13, 1932; KGCX, First State Bank of Via, Wolf Point, Mont., granted mod. of lic. to change hours of operation from daily, 6 to 9 a.m., noon to 3 p.m., 6 to 9 p.m., MST, to: Daily except Sunday, 6:30 to 9 a.m., 11:30 a.m. to 3 p.m., 6 to 9 p.m., and Sunday, 7 to 9 a.m., 11 a.m. to 3 p.m., and 6 to 9 pm. (Total day and night hours remain same and no change in quota; and

WKBZ, Karl L. Ashbacker, Ludington, Mich., granted license covering changes in eqpt. and increase in power to 100 w., 1500 kc., unlted. hours; WHAS, The Courier-Journal Co. & The Louisville Times Co., Louisville, Ky., granted license covering installation of new eqpt. and increase in power from 10 to 25 KW; 820 kc., unlted. time; KFYO, Kirksey Bros., Lubbock, Tex., granted license covering installation of new eqpt. 1310 kc., 100 w. night, 250 w. LS, unlted. time; WHET, Troy Brdcastg. Co., Troy, Ala., granted license covering erection of new station, to operate on 1210 kc., 100 w. daytime; WORK, York Broadcasting Co., York, Pa., granted authority to operate from 4:45 p.m., EST, Nov. 8 to 2 a.m., EST, Nov. 9, in order to broadcast election returns; WFAS, Westchester Brdcastg. Corp., White Plains, N.Y., granted auth. to operate Monday, Oct. 31, from 3 to 4 p.m.; in order to broadcast a political rally; also

KGAR, Tucson Motor Service Co., Tucson, ARiz., granted auth. to operate from sunset Nov. 8 to 4 a.m., Nov. 9, with 250 w. power in order to broadcast election returns; KUMA, Albert H. Schermann, Yuma, Ariz., granted spec. auth. to operate 9 p.m. to 12 midnight; night, MST., Oct. 31 and Nov. 7; and

WDSO, Aeronautical Radio, Inc., Buffalo, N.Y., granted CP to move transmitter to Administration Bldg., Municipal Airport, Buffalo; New, Same Co., Pocatello, Idaho, granted aviation-Aero. CP, freqs. 2906, 3072.5, 3082.5, 3088, 5510, 5540, 5672.5, 5692.5, kc., unlted., 400 w.; New, same Co., Spokane, Wash., granted avia-

tion -aero CP., freqs: 3162.5, 3172.5, 3182.5, 5572.5, 5582.5, 5592.5, 5662.5 kc., 50 w.; New, same Co., Butte, Mont., granted aviation-aero CP., details same as for Pocatello, Idaho, listed above; KGTT, Aeronautical Radio Inc., WAE Hangar, Cheyenne, Wyo., granted aviation-aero license, freqs. 2906, 2072.5, 3082.5, 3088, 5510, 5540, 5672.5, 5692.5 kc., 50 w.; KGUA, Same Co., El Paso, Tex., granted mod. of lic. to permit communication with orange chain stations. Also to communicate in addition to orange, with brown and blue chain; also

KTK, Globe Wireless Ltd., Mussel Rock, Cal., granted CP for pub. coastal and coastal telg. serv. for addl. transmitter, 1.5 KW power; W8XAN, The Sparks-Withington Co., Jackson, Mich., granted exp. visual brdcstg. lic.: freqs. 1600-1700, 43000-46000, 48500-50300, 60000-80000 kc., 100 w.; W1XAW, Trustees of Tufts College, Medford, Mass., granted renewal of gen. exp. lic., freqs. 1594, 2398, 3492.5, 4797.5, 6425, 8655, 12862.5, 17310 kc., 500 w.; W9XAW, Mich. College of Mining, Houghton, Mich., granted ren. of gen. exp. license, freqs. 1594, 2398, 3492.5, 4797.5, 6425, 8655, 12862.5, 17310 kc., 250 w.; KIEF, Seattle Brdcstg. Co., portable, Seattle, Wash., granted ren. of temp. broadcast pickup license 1518, 2342.kc. 1.5 w. power; Humble Oil & Refining Co., granted renewal of geophysical station licenses for portable stations Nos. 1 to 18 inclusive.

Renewal Of Licenses

The following stations were granted renewal of licenses for the regular period: KGA, Spokane, Wash., KIDO, Boise, Idaho, WFOX, Brooklyn, N.Y., WBBR, Brooklyn, N.Y., WEVD, New York, WHAZ, Troy, N.Y., and KID, Idaho Falls, Idaho.

Designated renewal appl. for hearing and granted temp. lic. pending decision on renewal application: WHIS, Daily Teleg. Prtg. Co., Bluefield, W. Va.; WRVX, Richmond Development Corp., Roanoke, Va., WTAQ, Gillette Rubber Co., Eau Claire, Wis.

Granted temp. lic. from Nov. 1 to Dec. 1, 1932, pending action on appl. for renewal of license: KSCJ, Perkins Bros. Co., The Sioux City Journal, Sioux City, Ia.; KGMB, Honolulu Brdcstg. Co. Ltd., Honolulu, T.H.; KTW, First Presbyterian Church of Seattle, Wash.

WRAK, Clarence R. Cummins, Williamsport, Pa., granted temp. lic. subject to decision of Commission on pending appl. for renewal; to operate on 1370 kc., 100 w., unlt'd. time until the completion of construction of Station WJEQ, at Williamsport, Pa., and beginning program tests of said station, then simultaneous to share with WJEQ.

Set For Hearing

New, Jos. de Palma, Jeanette, Pa., requests CP for new station, 590 kc., 250 w., daytime; WTRC, The Truth Pub. Co., Inc., Elkhart, Ind., requests CP to change eqpt. and increase operating

power from 50 to 100 w.; W5XC, Ozark Radio Corp., Shreveport, La., req. renewal of gen. exp. license; W5XA, Rev. Lannie W. Stewart, Shreveport, Pa., req. renewal of gen. exp. license.

Applications Denied And Dismissed

WENC, Americus Broadcast Co., Americus, Ga., denied auth. to op. exp. unlt'd. night time, for period of 60 days with 50 w. power, to determine extent of interference which would be caused by operation unlt'd. time with 50 w. night time, 100 w. daytime.

The following applications were dismissed from the hearing docket without prejudice, at request of applicants: New, John Brownlee Spriggs, Pittsburgh, Pa., CP, 800 kc., 5 KW, daytime; and KROW, Educational Brdcastg. Corp., Richmond, Cal., mod. lic. 930 kc. 500 w., 1 KW, LS, unlt'd. time.

Action On Examiners' Reports

Ex. Rep. No. 408, New, Edward Tomajko, Sr., Greensburg, Pa., denied CP for new station to op. spec. hours on 620 kc., 250 w., daytime, reversing Chief Examiner Ellis A. Yost.

Miscellaneous

For the reason that completion of construction under the following permits has not been completed, and no applications for extension of time or for licenses has been filed, the applications have been retired to the closed file:

New, Mutual Telephone Co., CP's for 8 new pt. to pt. tel. stations; KICI and KICJ, CP's for 2 new pt. to pt. tel. stations; KICK and KICL, County of Denver, CP for special emergency service KIDN, KIDM, KIDP, KIDS, Warner Bros. Pictures, Four CP's for motion picture service; W3XC, Jenkins Laboratories, Inc., CP for new visual broadcastg. service; WJEN, Mobile Brdcastg. Co., CP for new broadcast pickup station; KFK, American Fisheries, CP for new public coastal station; W9XP, Press Wireless, Inc., CP for gen. exp. station; W9XAA, Chicago Fed. of Labor, CP for new visual broadcastg. sta. license expired; W10XG, DeForest Radio Inc., CP for new exp. visual broadcastg. station and extension of time.

Visual Broadcasting Application

New, Visual Radio Corp. Watsontown, Pa., requests CP for 2200-2300 kc., 1 KW, intermittent hours.

Applications Received

WESG, Cornell Univ., Ithaca, N.Y., mod. of lic. to change freq. from 1270 to 1040 kc.; WLVA, Lynchburg, Va., CP to change eqpt., freq. power and hours, from 1370 kc., 100 w., shares WBTM to 1500 kc., 100 w. night, 250 w., day, unlt'd. hours. Facilities WRBX, Roanoke, Va., resubmitted and amended to req. 1410 kc., 250 w. half time with WHIS, Bluefield, W.Va. Requests all facilities of WRBX, Roanoke, Va.
