### CLEAR STATIONS ASK INVESTIGATION

Stations KFI, KNX, WBAP, WFAA, WGN, WHAM, WHAS, WJR, WLS, WLW, WOAI, WSB, WSM this week filed a petition with the Federal Communications Commission asking for an investigation of clear channels and a re-statement of regulations regarding them.

The petition asks that the Commission commence a technical study and investigation of clear channels to be continued for a period of one year under the supervision of a radio engineer of recognized ability and in cooperation with all broadcasters and radio laboratories willing to give such cooperation. The study would embrace the extent to which the people of the United States, and particularly those in rural areas, are dependent upon clear channel stations for reception and the extent to which such service should be protected from interference.

Upon conclusion of the study the petition urges that a report containing recommendations embracing proposed new regulations and clarifications and amendments to existing regulations regarding clear channels be made to the Commission.

Pending the promulgation of such new regulations the petition asks that no new or further duplicate nighttime operation be permitted on clear channels on which duplicate nighttime operation is not already authorized and that no new or further duplicate daytime operation be permitted except under and safely in accordance with the mileage frequency separation tables recommended by the Commission's Engineering Division.

### FCC MEANS BUSINESS

In less than a month after assuming office, the Federal Communications Commission has issued temporary renewal licenses to three broadcasting stations, and has instituted investigations of approximately twenty more broadcasting stations as a result of complaints against programs.

Unlike the defunct Federal Radio Commission, the new Commission does not intend to temporize with stations which persist in careless programming or which accept advertising of products or services likely to be injurious to the public health. Furthermore, the Commission intends that all classes of stations from the largest to the smallest shall be subjected to the same disciplinary rules.

The Commission denies that it has embarked upon any special drive to compel stations to toe the mark but indicated strongly that all complaints against stations will be carefully scrutinized and if the complaints warrant, renewal applications will be designated for public hearing.

The Commission feels that it has the power to take drastic action in cases where the complaints involve advertising of products or services affecting public health because of the decisions of the courts in such cases as the Brinkley case and its own decision in the Baker case.

From the best information obtainable, the action of the Commission during its first month of existence is an example of what is to follow. The Commission plans to exercise its broad powers under the new law without fear or favor and with a view to taking drastic action against stations which fail to measure up to the standard of public interest, convenience and necessity which has now come to have a new and more exacting meaning.

### WILL CHANGE BROADCAST REGULATIONS

Changes in the regulations of the Federal Communications Commission governing broadcasting will be made shortly, it was learned at the Commission. These changes are necessary to conform the old rules and regulations to the new law. Just when this will be done is problematical. It is not expected that the changes will be drastic in nature but rather will be such as to coordinate existing regulations wherein they may possibly conflict with the new law.

### DELINQUENTS GET NOTICES

This year's NAB Convention will be limited to members of the Association in good standing. In order that the records of the Association may be cleared, the Managing Director, under the provisions of the new by-laws, sent notices to some 20 stations which have not paid dues for a period of three months or more. These notices demand that payment be made within 14 days from the date thereon or forfeit membership.

### OPEN CODE MEETING SCHEDULED

The Code Authority for the Radio Broadcasting Industry announced, in its Bulletin No. 9, an open meeting to be held Thursday, September 20, 1934, at the Netherland-Plaza Hotel, Cincinnati, Ohio, at 10 a. m. The meeting immediately follows the NAB Convention, which closes Wednesday, September 19.

The meeting will be open to any member of the Radio Broadcasting Industry who is complying with all of the provisions contained in the Code of Fair Competition. This includes the payment of at least the first three quarterly installments of the assessments levied by the Code Authority to defray its expenses.

Each member participating will be allowed one vote, and no proxies will be allowed. A member in good standing may, in writing, designate a regular staff employee to represent him and his vote shall bind such member.

A member desiring to make a motion or to offer a resolution is required to submit a copy to the presiding officer in order to gain recognition.

John Shepard, 3d, Chairman of the Code Authority, will preside.

### NBC ABOLISHES RECORDS

The National Broadcasting Company announced on August 7, 1934, the discontinuance of the use of records for program material at all NBC owned or operated stations. The order will be placed into effect gradually.

### BUSINESS INDEX EXPANDED

The NAB Statistical Service has passed the first year of its existence and the program for the second year calls for a greatly expanded reporting of system. The sample used heretofore included 125 selected stations, selected for their classification, location, etc., and the revised sample will include a total of 250 stations. The service has proved very valuable to stations, advertisers, trade journals, agencies and research departments of all kinds.

### HOUSING ASKS RADIO ASSISTANCE

The Federal Housing Administration recognizes that "radio advertising offers one of the most effective mediums for carrying on its nation-wide campaign" for home improvement and therefore is asking stations to compile a list of all commercially sponsored broadcast programs of 15 minutes or more in order that the Administration might correspond directly to the sponsors and urge them to aid in the modernization and improvement program.

### JUDGE SYKES SPEAKS OVER CBS

Judge Eugene O. Sykes, Chairman of the Federal Communications Commission, delivered an address over the Columbia Broadcasting System August 3, describing the organizations and functions of the Commission.

### ENTIRE COMMISSION TO MEET

The full membership of the Federal Communications Commission will meet at the call of Chairman Sykes, on Monday, August

13. While no official statement has been made it is generally understood that the purpose of the meeting is to discuss the appointment of new attorneys for the Legal Division and perhaps other added personnel.

### THREE NEW APPEALS FILED

Three new appeals have been filed against the Federal Communications Commission in the Court of Appeals of the District of Columbia. One was filed by Station WHBY, Green Bay, Wis., from a decision of the old Federal Radio Commission of June 29, effective July 13, denying that station a construction permit for new equipment and also denying it the right to change from 1200 to 1360 kilocycles and increasing its power from 100 to 1000 watts. The station had asked for the facilities of WGES, Chicago, and WIND, Gary, Ind.

Two appeals were also filed in the Court against the Commission by T. G. Roberts, formerly connected with Station KWKH, Shreveport, Ind.

Mr. Roberts appealed against a grant to KWKH allowing it to change in frequency from 850 to 1100 kilocycles and the other against granting Station WWL, New Orleans, La., unlimited time on 850 kilocycles.

An interesting point in connection with the appeals is the fact that none of the records of the Commission show that Mr. Roberts has any pending applications before the Commission. The Commission has filed a motion to dismiss with the Court. Among other things the Commission states that Mr. Roberts has no appealable interest.

### RECOMMENDATION FOR NEWPORT STATION

S. George Webb applied to the Federal Communications Commission for a construction permit for a new broadcasting station to be erected at Newport, R. I., using 1200 kilocycles, unlimited time, 100 watts night and 250 watts day. George H. Hill(e) in Report No. I-1 recommended this week that the application be granted on certain conditions.

The Examiner recommends that the application be granted if Station WPRO, Providence, R. I., is given the regular assignment to operate on 630 kilocycles and WORC is given the regular assignment to operate on 1280 kilocycles. Otherwise, the Examiner suggests that the application be denied.

He found that the Newport area "is now inadequately served by existing radio stations" and that no objectionable interference would result if the changes he mentioned are granted.
