FEDERAL TRADE COMMISSION ACTIVITIES

Dismissal of Complaints

Nos. 2257, 2299 and 2334. The Commission has ordered dismissal without prejudice of the complaints previously issued against Hibbard, Spencer, Bartlett & Co., dealers in "Neats Foot Compound"; New England Tea and Coffee Co., Hartford, Conn.; and the Postal Correspondence School, Washington, D. C.

Cease and Desist Order

No. 2291. Federal Auto Products Co., Chicago. The respondent, a distributor of reconditioned and used spark plugs, is ordered to cease neglecting to indicate on the containers and in similar manner that the said products are reconditioned or used.

Complaints

No. 2380. Dr. A. Posner Shoes, Inc., New York City. The respondent is charged with unfair representation, in that his product was advertised as "Dr. Posner's Scientific Shoes" when they were not made under the supervision of a doctor and contained no orthopedic features. The respondent will be given until June 7 to show cause why a cease and desist order should not be issued.

Voluntary Agreements

Unfair competition of various types will be discontinued by the following companies under stipulations between the Federal Trade Commission and the concerns in question:

No. 0848. Hyral Distributing Company, Fort Worth, Texas. The respondent has stipulated that it will cease advertising that its product, "Hyral," will prevent pyorrhea, trench mouth or mouth disorders; that it is 100 per cent efficient as a dentifrice, and that most mouth disorders would practically disappear if it were universally used.

No. 0849. M. L. Clein & Co., Atlanta, Ga. The company agrees to cease advertising that substantial benefit will be derived from one dose of its product, "Pap-o-dine," except in cases of simple gastric hyperacidity, or that it is a competent treatment for indigestion, stomach ulcers, nausea, heartburn, gas pains, and other ailments.

Its product "Kurto" no longer will be advertised as a competent treatment for impetigo, cracked toes, athlete's foot and eczema, unless in the last two instances representations are limited to the relief of itching.

No. 1367. Tate Furniture Co., High Point, N. C. The respondent will cease advertising its products as "Cedar Lined" so as to imply that they are composed of cedar wood of such thickness as to afford protection against moths.

No. 1368. Louis H. Tabach, Newark, N. J., trading as the Longwear Hosiery Co., and Certified Hosiery Co. The respondent agrees to discontinue eleven alleged unfair practices, including filling orders with articles of different sizes, colors or quality than ordered; demanding or collecting additional payment of 10 per cent as the alleged cost of postage and insurance on shipments made to correct mistakes; representing that the hosiery is made with a special lock-stitch to prevent snagging or running, and that it is guaranteed to be hole-proof for three to six months, when this is not true.

No. 1369. Lehman Brothers Silverware Corporation, New York City. The company agrees to discontinue the use of the word "Sheffield" so as to imply erroneously that its products were made in Sheffield, England, or in accordance with the so-called Sheffield process.

No. 1370. W. F. Straub & Co., Inc., Chicago. The respondent has agreed to cease using the word "non-fattening" in the advertising

of its strained honey, when the consensus of opinion among scientists is that honey is a fattening food.

FCC DENIES WLWL PETITION

The FCC, on May 14, denied a petition filed by the Universal Broadcasting Corporation (WLWL), New York City, for reconsideration of the application of the Missionary Society of St. Paul the Apostle for modification of WLWL's license to use 810 kilocycles unlimited time, and denied their petition seeking to have the Commission re-allocate certain existing facilities so as to have WNYC and WOV share time on 1130 kc.; WCCO move from 810 kc. to 800 kc.; WFAA and WBAP move from 800 kc. to 850 kc.; WLW move from 850 kc. to 810 kc.; and WPG change from sharing with WLWL on 1100 kc. to full time on 1100 kc.

BROADCASTING APPARATUS AT SMITHSONIAN

Mr. Frank A. Taylor, Curator of Engineering, Smithsonian Institution, Washington, D. C., has established in the U. S. National Museum a department for broadcasting apparatus. WFLA-WSUN has furnished a 500-watt Western Electric 1-A transmitter, and WLS has supplied the speech input equipment.

There is still room for placing additional suitable apparatus. Owners of apparatus willing to place it in the museum should communicate with Mr. Taylor.

GARDNER RESIGNS

Former Governor O. Max Gardner of North Carolina, who has recently been appointed chief counsel for the Federal Communications Commission investigation of the telephone industry, has resigned, according to the White House.

Governor Gardner, who has long been familiar with the textile situation, is going to resume textile work. In addition to making the request himself, the President was asked to relieve him from the Commission by officials of the American Cotton Manufacturers' Association.

NEW INDIANA STATION RECOMMENDED

L. M. Kennett filed an application with the Federal Communications Commission asking that he be granted a construction permit for a new station to be erected at Indianapolis, Ind., to use 600 kilocycles, 1,000 watts power, and daytime hours of operation.

George H. Hill (e), in Report No. I-53, recommends that the application be granted. The Examiner found that the applicant is financially and in other ways able to construct and operate such a station. He found also that Indianapolis needs a station devoted to local programs, and that no interference would be caused with any existing radio facilities by the proposed station.

COURT AGAIN UPHOLDS COMMISSION

The United States Court of Appeals for the District of Columbia last week upheld a decision of the Federal Communications Commission in the case of KSEI and KFPY.

The sole question in this case was whether the Commission should award 890 kilocycles to one or the other of these two stations. After hearing by an Examiner in the case, the Examiner recommended that the frequency be granted to station KFPY and the Commission affirmed this recommendation. The Court has now upheld that decision of the Commission.

The Court found that changing station KSEI from 900 to 890 kilocycles would not substantially increase its service to the public, while changing the frequency of KFPY from 1340 to 890 kilocycles would increase its public service. The Court thought also that the contention of KSEI that it interferes with KHJ, Los Angeles, is not borne out by the record in the case.

Says the Court: "It appears that the State of Washington and the State of Idaho are both overquota States, and it is claimed that the granting of the frequency 890 kilocycles to station KFPY would be a violation of the Davis amendment. The only ground for this contention is that the coverage of station KFPY would be increased by the change of frequency. Such a change, however, does not bring the case within the purview of the Davis amendment. The quota of the State of Washington would not be increased by the change, within the purview of the applicable statutes or regulations."

WEBC FILES APPEAL

The Head of the Lakes Broadcasting Company, operating Station WEBC, has filed an appeal and a petition for stay in the United States Court of Appeals for the District of Columbia against the Federal Communications Commission. Similar action was taken by the City of Moorhead, Minn.

WEBC claims that the decision of the Commission of February 19, this year, granting Station KGFK permission to move from Moorhead to Duluth, Minn., adversely affects it. It is stated in the petition that the decision of the Commission does not accurately reflect facts, that the city of Duluth does not need additional radio facilities, while Moorhead does need the service. A similar position is taken by the city of Moorhead.

RECOMMENDS DENYING INCREASED POWER

Application was filed with the Federal Communications Commission by Station KGFJ, Los Angeles, Calif., asking that it be allowed to use 250 watts power LS. The station operates on a frequency of 1200 kilocycles, 100 watts power, now, with unlimited time.

Ralph L. Walker (e), in Report No. I-52, recommends that the increased power be denied. He found that while such increase would allow more service, "it does not appear that there exists any substantial need for additional service from the listener's viewpoint."

WBBZ RENEWAL RECOMMENDED

The Guthrie Broadcasting Company applied to the Federal Communications Commission for a construction permit for a new station to be located at Guthrie, Okla., using 1200 kilocycles, 100 watts night, and to share time with WBBZ, Ponca City, Okla. The latter asked for license renewal.

R. H. Hyde (e), in Report No. I-50, recommended that the application of the Guthrie Company be denied as in cases of default and that the license of WBBZ be renewed. At the appointed time for the hearing the applicant failed to appear.

RECOMMENDS PARTIAL GRANT TO KCRC

Broadcasting Station KCRC, Enid, Okla., applied to the Federal Communications Commission to change its frequency from 1370 to 1360 kilocycles, to change its power from 100 watts day and 250 watts LS to 250 watts at all times, and for unlimited time. KCRC now shares time with KGFG.

R. H. Hyde (e), in Report No. I-49, recommends that the application be granted in part, the new operating assignment to provide for the operation of KCRC with 250 watts daytime hours and one-fourth time as to night-time hours. The Examiner found that the granting of additional daytime hours would be in the public interest.

EXPERIMENTAL AUTHORIZATION DENIAL RECOMMENDED

Broadcasting Station KFBB, Great Falls, Mont., filed an application with the Federal Communications Commission asking for special experimental authority for changing its frequency from 1280 to 610 kilocycles. It uses 1,000 watts, and 2,500 watts LS, with unlimited time.

Melvin H. Dalberg (e), in Report No. I-48, recommends that the action granting this taken by the Commission on January 29 be reversed and that the application be denied.

The Examiner found that "no showing is made in this case that would justify a finding that the applicant is or intends to be engaged in fundamental research or improving the technique of the radio art."

NEW ERIE STATION RECOMMENDED

Jackson D. Magenau filed an application with the Federal Communications Commission for the erection of a new station at Erie, Pa. Similar request was made by the WMAN Broadcasting Company for the erection of a new station at Mansfield, Ohio. Both applications were for 1370 kilocycles, 100 watts power, and unlimited time. The two cases were consolidated.

George H. Hill (e), in Report No. I-51, recommended that a construction permit be granted for the Erie station and that the application for the Ohio station be denied. The Examiner found that the financial showing of the applicants for the Ohio station was unsatisfactory, that the operation of such a station at Mansfield would interfere with existing facilities, and that it would not serve the public interest.

NEW CALIFORNIA STATION RECOMMENDED

J. C. and E. W. Lee applied to the Federal Communications Commission for a construction permit to erect a new broadcasting station at Riverside, Calif., to use 820 kilocycles, 250 watts power, and daytime hours of operation.

Ralph L. Walker (e), in Report No. I-55, has recommended that the application be granted. The Examiner found that the applicants are qualified to erect and run such a station, that no objectionable interference would be caused by such a proposed station, and that it would render "a desirable and satisfactory service to the area in question."

NEW MONTANA STATION RECOMMENDED

Three applications were filed with the Federal Communications Commission for new broadcasting stations, all in Montana, and all to operate on 1420 kilocycles, 100 watts power, and unlimited time on the air. The Helena Broadcasting Company and E. B. Craney would erect stations at Helena, while the Montana Broadcasting Company would erect one at Boulder.

Melvin H. Dalberg (e), in Report No. I-54, recommended that the applications of E. B. Craney and the Montana Broadcasting Company be denied, but that the application of the Helena Broadcasting Company be granted. The Examiner states that the Montana Company gave no proof to support its application; that "in the case of E. B. Craney, it appears to be doubtful whether the applicant has shown by his proof sufficient financial background to qualify him for the construction and operation of the station proposed." He found the Helena Company had sufficient financial and technical background for the proposed station.
