PRESIDENT NOMINATES PRALL

Anning S. Prall, chairman of the Federal Communications Commission, has been renominated by President Roosevelt as member of the Commission for a seven-day term from July 1 next. The Senate Committee on Interstate Commerce to whom the nomination has been referred has not yet acted.

FCC PROPOSES ANTENNA REGULATIONS

Applicants for construction permits involving new antenna systems hereafter will be required by the Federal Communications Commission to show that the proposed antenna systems meet certain minimum requirements as to radiating efficiency.

The policy of the FCC Engineering Department will be to disapprove the construction of inefficient antenna systems. No action

regarding existing inefficient antenna systems is at present contemplated.

As the radiating efficiency of the conventional broadcast antenna depends primarily upon its physical height, the FCC Engineering Department has proposed tentative minimum heights to which new construction must conform. In the cases of unconventional systems or under unusual circumstances certain specified efficiencies may be utilized instead of the figures for physical height. When departure from the specified minimum heights is taken, it is contemplated that the burden of proof of expected efficiency and of performance after erection will be upon the applicant.

It is understood that the figures shown in chart are tentative subject to final adoption.

Curve A: Local channel stations or minimum field of 100 mv/m. for 1 KW.

Curve B: Regional channel stations (250, 500 and 1,000 watts), or minimum field of 150 mv/m. for 1 KW.

Curve C: Regional, limited time and high power regional stations (5 and 10 KW) or minimum field of 175 mv/m. for 1 KW.

Curve D: All dominant clear channel stations and limited time or high power regional stations over 10 KW, or minimum field of 200 mv/m. for 1 KW.

NEW 100-WATT STATIONS RECOMMENDED

Application was filed with the Federal Communications Commission by Evansville on the Air, Inc., the licensee of Station WGBF for a construction permit to construct a new station at Evansville, Ind., on 1370 kilocycles, 100 watts power and unlimited time. The Nashville Broadcasting Company asked for a construction permit to erect a station at Nashville, Tenn., on the same frequency and similar conditions. Stations WSIX asked permission to move from Springfield to Nashville, Tenn., and to change its frequency from 1210 to 1370 kilocycles.

George H. Hill(e) is Report No. I-60 recommended that the application of Evansville on the Air, Inc., be granted in part and that it be allowed to operate daytime hours sharing night hours of operation with the Nashville Broadcasting Company. On the application of the Nashville Broadcasting Company he recommended that it be allowed to operate daytime and share nighttime hours with Evansville on the Air, Inc. The Examiner recommended that the application of WSIX to move be denied.

RECOMMENDS AGAINST NEW TEXAS STATIONS

Raymond L. Hughes filed an application with the Federal Communications Commission for erection of a new broadcasting station at Midland, Texas, while the Big Spring Broadcasting Company filed an application for a station at Big Spring, Texas. Both asked for 1210 kilocycles, and 100 watts power.

Ralph L. Walker(e) in Report No. I-59 recommended that both applications be denied. The Examiner found that neither of the applicants were able to finance the proposed station.

COMMISSION WINS JENNY WREN CASE

The United States Court of Appeals for the District of Columbia this week upheld the Federal Communications Commission in the so-called Jenny Wren case affecting Station WREN, Leavenworth, Kans. Justice Groner and Hitz dissented.

WREN operates on 1220 kilocycles, 1000 watts power and unlimited time. WHB, Kansas City, Mo., operates on 860 kilocycles, 500 watts power and competes with WREN. WHB used to operate daytime hours only; under an experimental license the Commission granted it permission to operate evening hours also. The WHB case was set for hearing by the Commission with WREN asking permission to intervene, which the Commission refused.

WREN then applied to the Supreme Court of the District of Columbia for relief by a bill in equity. This court upheld Station WREN and denied the motion of the Commissioner to dismiss the court proceeding. The case was then taken in the Court of Appeals which has upheld the Commission.

RECOMMENDS AGAINST OKLAHOMA STATION

Price Siever, O. L. Bayless, and J. W. Steel, Jr., applied to the Federal Communications Commission for a construction permit for a new broadcasting station to use 1500 kilocycles, 100 watts power and unlimited time, to be erected at Duncan, Okla.

R. H. Hyde(e) in Report No. I-58 recommended that the application be denied. He does not believe that the proposed station would be able to deliver a dependable, consistent signal "over more than a fraction" of the area which the station proposed to cover. A number of other questions came up at the hearing including that of whether it would be proper to grant the application "in view of other pending applications." The Examiner does not believe either; he states that the granting of the application would be in the public interest.

APPLICATION DEFAULTED

A. P. Mueller, Herbert Mueller, Alvin Mueller, Jr., and the Mueller Amusement Company made application to the Federal Communications Commission asking for a construction permit for a new broadcasting station to be erected at Seguin, Texas, to use 1,500 kilocycles, 100 watts power and specified hours of operation.

Ralph L. Walker(e) in Report No. I-56 recommended that the application be denied as in cases of default. When the hearing was called no appearance was entered for the applicants nor was any testimony offered in their behalf.

RECOMMENDS APPLICATION BE DISMISSED

The East Texas Broadcasting Company filed an application with the Federal Communications Commission asking for a construction permit for a new broadcasting station to be erected at Dallas, Texas, to use 1,500 kilocycles, 100 watts power and to operate daytime simultaneously with Station KGKB.

Ralph L. Walker(e) in Report No. I-57 recommends that the application be dismissed without prejudice. At the time of the hearing counsel for the applicant moved for leave to withdraw the application without prejudice.

TRADE COMMISSION COMPLAINT AGAINST MARMOLA

The Federal Trade Commission has issued a complaint against the Raladam Co., charging unfair competition in making false and misleading representations in aid of the sale of its product "Marmola" tablets. The Commission has designated Friday, June 28, as the date for the company to show cause why a cease and desist order should not be issued against it.

The statement of the Commission is as follows:

The Raladam Co., of Detroit, is charged with unfair competition in making false and misleading representations in aid of the sale of "Marmola" tablets, widely advertised by radio and otherwise as a remedy for overweight, in a complaint issued by the Federal Trade Commission and based on representations made by the company since April 17, 1929, the date of a former order to cease and desist against Raladam.

In the former case against Raladam, the United States Circuit Court of Appeals, Cincinnati, in 1930, set aside the Commission's order and was upheld by the Supreme Court, May 25, 1931, on the sole ground that the Commission had not shown the existence of substantial competition.

Among ingredients of Marmola is desiccated thyroid, made, it is said, from the thyroid glands of the sheep, the cow, the pig and the goat. The complaint says it is a dangerous and powerful drug, its function being to burn up tissue, and that Marmola contains so much of it that when taken as directed it is liable to produce radical and harmful physical changes.

"Such harmful changes may safely be guarded against only by the previous and continuing investigation, observation and advice of a competent physician," says the complaint. "There are several classes or types of obesity. In only a very small percentage of obesity cases is desiccated thyroid a safe and efficacious remedy and then only when administered by a competent physician."

The complaint alleges that the following representations by Raladam are untrue: That reputable physicians endorse the use of ingredients contained in Marmola; that its use constitutes the same treatment as all modern doctors employ; that the virtues of Marmola ingredients are known by and prescribed by physicians the world over; and that Marmola constitutes a scientific remedy, safe, harmless and efficacious, that can be taken safely without medical advice and direction.
