STATE AND MUNICIPAL TAXES AND LITIGATION

We are informed concerning certain state and municipal taxes imposed on radio broadcasting and of certain court cases relative thereto—but we fear our information is incomplete.

Please advise as to any pending litigation with regard to taxes, giving full details thereon and of any state or municipal tax on gross receipts or profits which you may be paying including a copy of the law imposing such tax.

JAMES W. BALDWIN,
Managing Director.

ADDITIONAL POWER FOR WBNX RECOMMENDED

Broadcasting Station WBNX, New York City, operating on 1350 kilocycles and sharing time with WAWZ, applied to the Federal Communications Commission to have its power increased from 250 to 1,000 watts, while Station WEED, Rocky Mount, N. C., asked that its frequency be changed from 1420 to 1350 kilocycles, that its power be increased from 100 to 250 watts, and that its unlimited day, and nighttime sharing with WEHC, be changed to unlimited time day and night.

Examiner John P. Bramhall, in Report No. I-134, has recommended that the application of WBNX for increased power be granted, "provided that an antenna be erected by the applicant so that the radiation in the direction of St. Louis be restricted at night to not more than 100 millivolts per meter, unattenuated field, at one mile from the WBNX transmitter." He also recommended that the application of Station WEED be denied. The Examiner found that the evidence failed to show that there is need for additional service in the area proposed to be served by WEED, and that it would violate the regulations of the Commission as to quota. It would also adversely affect other existing broadcasting stations.

NEW EQUIPMENT RULING

The Broadcast Division of the Federal Communications Commission at a regular meeting held November 12 adopted the following rule:

Rule 132—(a) The transmitter proper and associated transmitting equipment of each broadcast station shall be designed, constructed and operated in accordance with good engineering practice in all phases not otherwise specifically included in these regulations.

(b) The transmitter shall be wired and shielded in accordance with good engineering practice and shall be provided with safety features in accordance with the specifications of Article 37 of the current National Electrical Code as approved by the American Standards Association.

(c) The station equipment shall be so operated, tuned, and adjusted that emissions are not radiated outside the authorized band which cause or are capable of causing interference to the communications of other stations. The spurious emissions, including radio frequency harmonics and audio frequency harmonics, shall be maintained at as low a level as required by good engineering practice. The program distortion, audio frequency range, carrier hum, noise level, and other essential phases of the operation which control the external effects shall at all times conform to the requirements of good engineering practice.

(d) Whenever, in this rule, the term "good engineering practice" is used, the specifications deemed necessary to meet the requirements of good engineering practice will be published from time to time.

(e) This rule shall be effective upon its adoption, provided, however, that existing broadcast stations shall be allowed one year in which to meet the requirements herein.

WSPD CASE DISMISSED

The Supreme Court of the District of Columbia has dismissed the appeal of broadcasting station WSPD, Toledo, Ohio, following the decision of the Supreme Court of the United States in the well-known Jenny Wrenn case.

Station WSPD protested to the Federal Communications Commission the removal of Station WALR from Zanesville to Toledo, Ohio. The protest was denied by the Commission, following which WSPD filed a bill in the District Supreme Court to enjoin the Commission from issuing the removal license. The case is considered similar to the Jenny Wrenn case and therefore it has been dismissed.

MRS. LAURA READ

Mrs. Laura Read of Towaco, New Jersey, has disappeared from the New Jersey State Hospital where she has been under observation for a mental disturbance. It is believed that she may contact broadcasters to renew complaints about the unfair use of incidents from her life. If you have any information as to her whereabouts, please communicate directly with the New Jersey State Hospital, Greystone Park, New Jersey.

WIRE SERVICE TO BROADCASTING STATIONS

The Telephone Division of the Federal Communications Commission has announced that it will hold a hearing on December 2 to determine, among other things, if the Rochester Telephone Company, Rochester, N. Y., is not subject to the jurisdiction of the Commission "for the reason that it furnishes wire facilities and service to broadcasting companies for broadcasting purposes, and is thus engaged in interstate commerce as a wire communication carrier."

In this connection, following a recent meeting, the Telephone Division made the following statement regarding this case:

"Order of October 9, 1935, requiring Company to comply with certain previous orders or file answers setting forth facts in justification of its failure, and the further order setting matter down for hearing December 2, was amended by incorporating therein after fifth paragraph thereof and immediately preceding the order therein, the following paragraph:

"It further appearing that the Rochester Telephone Co. is subject to the jurisdiction of this Commission under all provisions of the Communications Act of 1934, for the reason that it furnishes wire facilities and service to radio broadcasting companies for broadcasting purposes, and is thus engaged in interstate commerce as a wire communication carrier in a manner not "solely through physical connection with the facilities of another carrier." "

RECOMMENDS AGAINST NEW PENNSYLVANIA STATION

George E. Heiges filed an application with the Federal Communications Commission asking authority to construct a new broad-

casting station at Sharon, Pa., to use 1370 kilocycles, 100 watts night and 250 watts local sunset, unlimited time.

Examiner Ralph L. Walker, in Report No. I-135, recommends that the application be denied. The Examiner found that while there is a substantial need for the proposed radio service in the area, "the operation of the proposed station will increase interference to two time-sharing stations assigned the same frequency, and will cause objectionable interference within the good service area of a station using an adjacent channel. The granting of the application would result in a further increase in the present over-quota status of the Second Zone at night."

FEDERAL TRADE COMMISSION ACTION

Complaints

The Federal Trade Commission has alleged unfair competition in complaints issued against the following companies. The respondents will be given an opportunity for hearing to show cause why cease and desist orders should not be issued against them.

No. 2611. Alleging unfair competition in the sale of a liquid shoe dressing, a complaint has been issued against **Sav-an-Upper Company**, of 3325 Madison Road, Cincinnati, charging misrepresentations of the company's business and product.

The respondent is alleged to have represented that persons selling its dressing could earn up to \$2 an hour; that everywhere men and women selling it were making tremendous profits, and that the respondent's product will cause scuffed, discolored and faded shoe uppers to appear glossy, neat and good-looking as they were the day they left the factory. It is further represented that the product will preserve and renew various articles of leather. The complaint alleges that these representations are not true, and have a tendency to divert trade unfairly to the respondent from competitors.

No. 2612. Unfair competition through employment of a game of chance in the sale of candy is alleged in a complaint issued against **Ucanco Candy Co., Inc., of Davenport, Iowa**. The method of sale involved the use of a push card, according to the complaint.

No. 2614. Unfair competition in the sale of building materials is alleged in a complaint issued against **The Masonite Corporation**, having headquarters in Chicago and a plant at Laurel, Miss.

According to the complaint, this company, engaged in manufacturing and selling insulating board and wall board, made and sold under the trade name "Temptrile" a commodity manufactured solely of wood or wood refuse. However, according to the complaint, use of the trade name "Temptrile" has a tendency to mislead a substantial portion of the purchasing public into believing that the product so described is "tile".

No. 2615. Charging misrepresentation in the sale of a correspondence school course, a complaint has been issued against the **American School**, having headquarters at 58th Street and Drexel Avenue, Chicago.

Prospective subscribers were told, according to the complaint, that they had an opportunity to get in on the ground floor of a new and prosperous industry that would provide plenty of good jobs during their life times and that they could complete a high school education at home in two years or less. Other representations of a similar character were made.

No. 2616. **Cal-Aspirin Corporation**, of 160 East Illinois Street, Chicago, is charged, in a complaint with unfair methods of competition in the sale under a patented formula of a medicinal compound designated "Cal-Aspirin."

Representations made by the respondent are alleged to have deceived purchasers into believing that ordinary aspirin, in average doses, will have a toxic effect on a person's system and that Cal-Aspirin reduces this toxicity; also, that Cal-Aspirin, taken in ordinary doses, will more quickly and efficiently alleviate pain and fever than will ordinary aspirin. Other similar representations are alleged.

No. 2617. Misrepresentation in the sale of radios, refrigerators, oil burners for furnaces and air conditioners, is alleged in a complaint issued against **T. L. Loveland and J. L. Records, of Iowa**

City, Iowa, trading under the names of **Commercial Manufacturing Company** and **Brenard Manufacturing Company**.

The complaint charges that false and misleading representations of the respondents and their traveling representatives tend to mislead a substantial number of retail dealers into believing the respondents to be manufacturers of the appliances they sell when in fact they are not manufacturers but distributors; that the appliances are of superior quality, are laboratory tested and guaranteed, and are marked at low prices; and that the dealers will receive all of the benefits represented as accruing to them upon execution of a so-called distributor's agency agreement, when these are not the facts.

No. 2618. Representation of a converter and seller of silk and rayon goods as being a manufacturer is alleged as an unfair method of competition in a complaint issued against **Canton Silk Mills, Inc.**, of 469 Seventh Avenue, New York City.

Engaged in the business of buying silk and rayon cloths and fabrics in the raw or unfinished state and of causing them to be dyed, printed or processed by others into finished goods suitable for sale to dry goods retailers and the cutting-up trade, the respondent, according to the complaint, represented itself by use of its corporate name and in other ways as a manufacturer. The respondent is said to have advertised that it owned two mills at River Point, R. I., and Phoenix, R. I.

Nos. 2619 and 2621. Lotteries or games of chance are alleged to have been used in the sale of candy by **Cosner Candy Company**, of Denver, and **Sweet Candy Company**, of Salt Lake City, both engaged in manufacturing, according to complaints issued against these respondents.

No. 2620. Representation of a wholesaler and rectifier of liquor as a distiller is alleged as an unfair method of competition in a complaint issued against the **West Penn Distilling Co., Inc.**, of New Kensington, Pa.

Use by this respondent company of the word "Distilling" in its corporate name and in other ways, had a tendency to deceive dealers and the purchasing public into believing the respondent to be a distiller, manufacturing or distilling spirituous beverages, when in fact it was not a distiller, according to the complaint.

Nos. 2622 and 2623. Unfair competition in the sale of flavoring extracts and wines is alleged in complaints issued against **C. E. Trees & Co., Inc.**, of Indianapolis, and **Joseph Della Monica**, of Brooklyn, N. Y., trading as **Delmonico's**.

Manufacturing a flavoring extract made principally of citrous oil and pure cane sugar and designed to be bottled with carbonated water and used as a "mixer" for alcoholic drinks and highballs, Trees & Co. is alleged to have advertised its product as "Four Per Cent—The Perfect Mixer."

Joseph Della Monica, in the sale of wines, is alleged to have used advertising phrases such as "Made in France" and "Importers and Producers of Foreign and Domestic Wines and Champagnes". The respondent is also said to have advertised by means of the phrase, "Imported wines: Chateau Delmonico Champagne Etablissements Delmonica, Epernay, France, Vintage 1928" and by other foreign names, when in fact, according to the complaint, the respondent did not make wine prior to 1933, and "Chateau Delmonico Champagne" made in Brooklyn is not champagne and has no connection with "Epernay, France", and another wine advertised as Italian is made in Brooklyn from grapes imported from Italy.

Complaints Dismissed

No. 2374. The Commission has ordered dismissal of a complaint issued several months ago against the **Sherwood Distilling & Distributing Co., Inc.**, of Baltimore.

This complaint had alleged unfair competition in the use of the word "Distilling" in the respondent company's corporate name.

In its order of dismissal, the Commission reports that by virtue of a lease of an entire distillery for certain days through a permit issued by the United States Bureau of Internal Revenue, the respondent company now "operates and controls a distillery producing spirits by the process of distillation from mash, wort or wash".

No. 2434. An order has been issued closing the case against **Wolverine Distilleries, Inc.**, of Detroit, which has abandoned all its business as described in the complaint issued June 11, 1935, and dismantled and sold the equipment used in the rectifying and wholesaling of liquor.

Stipulations

The Commission has announced the following cease and desist orders:

No. 2074. **Morris Heller**, of 66 North Sixth Street, Brooklyn, N. Y., trading as **Venice Importing Company**, and selling olive oil, compound vegetable oil and related products, has been ordered to cease and desist from improper use of the word "Lucca" and of the name of any other Italian city, district or province, implying that his product was produced in and imported either from the Lucca district of the Province of Tuscany or from any other city, district or province of Italy, unless and until such representations are true.

No. 2160. **Maxwell Steel Vault Company**, of Oneida, N. Y., has been ordered to cease making misrepresentations in the sale of burial vaults.

Distributing its product exclusively through some 250 jobbers to undertakers, the respondent company is said to furnish ultimate purchasers with written certificates of purported warranty to the effect that the vaults are water-proof and will endure as such.

No. 2344. Unfair competition in the sale of shoe laces in interstate commerce is prohibited in an order issued against **Gotham Sales Co.**, a copartnership with headquarters at 14 East 17th Street, New York City, trading also as **Universal Merchandise Co.**, and operating branch stores in Chicago, New Orleans, and San Francisco. The respondent company sells and distributes assorted notions and novelties. Members of the copartnership are **Harry, Max, Martin, Alexander and Alfred Gottsagen**.

The respondents are ordered, in connection with the sale or distribution of shoe laces, to cease and desist from representing by express statements or by implication or otherwise that any of the laces they sell are mercurized, when this is not true.

No. 2352. An order to cease and desist from certain price fixing and other practices has been issued against eighteen manufacturers of fire extinguishing equipment. The respondent companies waived hearings on charges in the Commission's complaint and consented to issuance of the order.

The respondent companies named are as follows: **Fyr-Fyter Company**, Dayton, Ohio; **Buffalo Fire Appliance Corporation**, Buffalo; **Miller-Peerless Manufacturing Company**, Chicago; **Badger Fire Extinguisher Co.**, Boston; **Knight & Thomas, Inc.**, Boston; **American LaFrance & Foamite Industries Corp.**, Elmira, N. Y.; **Pyrene Manufacturing Company**, Newark, N. J.; **Walter Kidde and Co., Inc.**, New York; **Fyrout Corporation**, New York; **Fyr-Freeze, Inc.**, New York; **C-O Two Fire Equipment Co.**, Newark; **Wil-X-Mfg. Corporation**, Brooklyn; **W. D. Allen Manufacturing Company**, Chicago; **Phister Manufacturing Company**, Cincinnati; **Harker Manufacturing Company**, Cincinnati; **The General Fire Truck Corporation**, St. Louis; **Elkhart Brass Mfg. Co.**, Elkhart, Ind.; and **George W. Diener Manufacturing Company**, Chicago.

The order prohibits these companies from performing by understanding, agreement or combination among themselves or between or among any two or more of them, the fixing of prices at which the commodities would be sold.

No. 2500. An order has been issued requiring **Certified Products Company, Inc.**, and **Jerome C. Ard**, its president and general manager, of Birmingham, Ala., to cease and desist from making or publishing false or fraudulent representations for the purpose of enticing any person from the employ of any competitor into the employ of the respondents.

Other unfair methods of competition prohibited in the order are the making or publishing of false or fraudulent statements disparaging the financial condition or business policy of a competitor and maliciously enticing away the employees of competitors with the purpose and effect of unduly hampering, injuring or embarrassing competitors in their business.

Nos. 2532 and 2574. Two New York dealers in dry goods and garments have been ordered to cease and desist from improper use of the word "mills" in their trade or corporate names, in advertising literature or in other ways.

Samuel Kronovet, trading as **Westbury Knitting Mills**, is ordered to cease using the words "knitting" and "mills", either independently or in conjunction with other words, as part of his trade name, or in advertisements, until and unless he actually owns or controls the factory wherein the knitted garments sold and distributed by him, are actually knitted and manufactured. The respondent is also directed to cease representing by advertisements, on general business stationery or in other ways, that he is the knitter or manufacturer of the knitted garments sold by him, until and unless he actually owns or operates the factory wherein such articles are made.

Cameo Silk Mills, Inc., dealing in silk or raw cloth, is ordered to cease and desist from using a corporate name containing the word "mills" and from representing in any other way that it is a knitter, weaver or manufacturer of cloth, unless and until it actually knits, weaves or manufacturers the cloth it sells, or owns or controls a mill in which this cloth is knitted or manufactured.
