

President Names Commodore Webster To Federal Communications Commission

President Truman ended speculation on his choice to fill the vacant commissionership on the FCC when he nominated Commodore Edward M. Webster on Friday (7). The appointment is subject to confirmation by the Senate.

Associated with the communications field for many years, Commodore Webster has been director of telecommunications for the National Federation of American Shipping since August, 1946. During the war years, he was chief of communications, United States Coast Guard, receiving the Legion of Merit for his services. Commodore Webster previously had served with the Coast Guard from 1909 until 1934, when he retired.

He was appointed assistant chief engineer of the FCC in 1934 and served with the commission until his recall to active duty with the Coast Guard in 1942.

An expert on international communications, Commodore Webster represented the United States at innumerable world telecommunications meetings.

Born on February 28, 1889, Commodore Webster is a native of Washington, D. C. He attended the United States Coast Guard Academy at New London, Conn., from 1909 to 1912. Politically he is an independent and is not affiliated with any party.

Commodore Webster is a Fellow of the Institute of Radio Engineers and a former director of the organization. He is a member of the Propellor Club, the Veterans Wireless Operators Association and the Army-Navy Club.

Commodore Webster is married to the former Miss Dorothy Richardson. The Websters are parents of two children, Edward and Miss Dorothy Webster.

Sponsors and Agencies To Join Broadcasters In Cooperative Effort To Improve Radio

A plan for organized cooperation among sponsors, advertising agencies and broadcasters "to improve radio's service to the public under the structure of a free radio in the United States" was approved in principle by representatives of the three groups at a meeting in New York last Thursday (6).

The organization for putting these plans into effect was tentatively titled the "Broadcaster's Advisory Council." Specific functions for the new body, proposed by a previously appointed three-man committee, were these:

1. "An information activity designed, on the one hand, to inform the broadcasters about public attitudes and their obligations to serve the public interest through improved service to radio listeners.
2. "The development and recommendation of standards of practice for commercial broadcasting.
3. "A program of continuing research into public acceptance of broadcasting."

Members of the original committee on plans and objectives were Frank Stanton, president, CBS; F. B. Ryan, Jr., president, Ruthrauff and Ryan, Inc.; and Charles G. Mortimer, vice president, General Foods.

The committee emphasized that its recommendations were prepared in a spirit of enlightened self-interest, and that the organization would in no way duplicate any existing body. "Broadcasters and sponsors agree", said one member, "that radio today is far from perfect. It is our hope to study the wishes, likes and dislikes of the American listener, and so far as possible to incorporate his steadily improving tastes into the broad pattern of free radio."

To give effect to the plan those attending, including NAB Executive Vice President A. D. Willard, Jr., provided for the appointment

INSIDE THIS ISSUE

Meeting in New York last week, the Radio News Committee discussed with AP executives the provisions of the new wire service contract for radio stations. Plans were made for more widespread press association coverage of radio industry news. (p. 190)

NRDGA, cooperating with NAB's Broadcast Advertising Department, is conducting a survey among retailers to ascertain their extent of retailer interest in television as an advertising medium. (p. 192)

The United States Supreme Court noted "probable jurisdiction" in the government's appeal from the lower court's ruling on the Lea Act. No decision is expected on the case until next June. (p. 193)

Examples of how some stations are emphasizing the sale of programs over spot announcements were contributed last week to the current study being conducted by the Small Market Stations Executive Committee. (p. 193)

According to a report from the RMA, its member manufacturers are continuing to turn out receiving sets at the high production rate reached last year. A total of 1,564,171 sets were produced in January. (192)

ment of a committee on organization and finance which will "define the organization's structure and devise an equitable plan for its support."

Named as members of this committee were Edgar Kobak, president, MBS; Niles Trammell, president, NBC; Clair R. McCullough, president, WGAL, Lancaster, Pa.; I. R. Lounsberry, executive vice president, WGR, Buffalo; Thomas D'A. Brophy, president, Kenyon and Eckhardt, Inc.; Sigurd S. Larmon, president, Young and Rubicam, Inc.; Robert F. Elder, vice president, Lever Bros.; Donovan B. Stetler, advertising director, Standard Brands.

Also named were two advisory committees. Fred-eric R. Gamble, president AAAA, (chairman), NAB President Justin Miller and Paul B. West, president, ANA will function as an advisory committee on association and industry relations.

The second advisory committee will function on legal questions. It is composed of Isaac W. Diggs, ANA, as chairman; George Link, AAAA; NAB General Counsel Don E. Petty; and A. L. Ashby, NBC; Julius F. Brauner, CBS; Joseph A. McDonald, ABC, for the networks.

Edgar Kobak, in accepting chairmanship of the organizing committee, told the group: "I am not so much interested in the various details of what this body might do—I am more interested in a broad approach to the one idea of rendering that service in such a way that the listener finds little about which to complain."

The Broadcasters' Advisory Council will work closely with the NAB Special Standards of Practice Committee and will send a representative to that committee's meeting on March 31.

News

Radio News Group Discusses Wire Services, Industry Coverage, Editorials, at Meeting

The NAB Radio News Committee, meeting in New York City, Monday, March 3, continued its practice of discussing fundamental issues which affect every broadcast station in one way or another. For purpose of brevity, subjects and results are reported under appropriate subheads below.

AP Associate Membership

This plan has been long in the making but slow in organization. Now, however, the contract, excepting for one or two important details, is ready for the printer. It is expected contracts will be presented to listening stations within a matter of weeks.

These are the main provisions of the contract according to Oliver S. Gramling, PA assistant general manager, and Tom H. O'Neil, radio news director, who sat in with the News Committee during a three-hour session:

1. *All AP Series Available.* The radio wire will be continued, not discontinued; it will become the basic service for radio stations. The newspaper wire and all other services will be available to associate Associated Press members on pro rata cost.

2. *Present Contracts to Be Completed.* At expiration of present PA contracts, new contracts with radio stations will be written on basis of associate AP membership.

a. In accordance with sound business procedure, AP will attempt to renegotiate present contracts without waiting for expirations.

3. *No Vote.* Associate membership in AP will not carry voting power for time being. As a final step in rearranging its affairs, it is logical to expect that AP eventually will offer straight AP membership to radio stations. No time has been projected for this move.

4. *Rates.* AP is searching for an equitable rate formula which will be fair to all classes of stations. It is as yet undetermined.

5. *Change of Rates.* AP will offer a continuous contract with provision to reopen for change in rates. Any increase agreed upon would not be retroactive. If station and AP cannot get together, station may drop service without penalty.

6. *Resignations.* With continuous contract, AP plans to insert resignation clause which would probably be "1 or 2 year on advance notice." Newspapers may now withdraw from AP membership on 2 years' advance notice.

7. *Announcement Soon.* Final announcement of the AP associate membership contract will be forthcoming in a matter of weeks.

Discretionary Slug on PA Copy Will Be Restored

Pointing to the possibility that all new stations may not have, at this time, a competent fulltime news editor, the News Committee suggested that PA restore the discretionary slug on copy which PA editors believe

(Continued on next page)

calls for individual station editorial judgment as to whether it should be used over the air.

UP Executives Present

The UP representatives with whom the Committee conferred were Phil Newsom, radio news manager; A. S. Harrison, radio sales manager; Edwin Moss Williams, vice president and general business manager; Jack Bisco, vice president and general sales manager. The following subjects were discussed with both groups:

Keeping News Clean

Committee members urged the press associations to continue to maintain the high standards of their radio wires. The Committee pointed out that while news judgment may change in certain quarters, radio would be doing listeners and itself an injustice if news copy failed to qualify for family listening in every home in the country.

Internship Plan for Press Association Executives

Some months ago Erle Smith, news director of KMBC, Kansas City, suggested to the Radio News Committee that "working" press association executives would be able to do a better job for stations as well as their employers if they underwent a period of internship in a radio news department.

At the morning and afternoon conferences the press association representatives went on record as being in agreement with the idea. The plan is for selected press association men to spend from two to three weeks in station news departments selected by NAB. Mr. Williams said that United Press would go along whenever the News Committee was ready. Mr. Gramling agreed with the proposition in principle and said that he would get into the matter as soon as the AP associate membership matter was disposed of.

More Industry News

The News Committee suggested that the press associations carry more industry news. It was explained that when used by broadcast stations this news would become a part of the industry's public relations activities. Mr. Gramling said: "Our method of presentation of industry news certainly could be improved." Among other things, an Associated Press representative will contact NAB daily.

Time did not permit discussing a similar arrangement with UP.

A second step in the "more industry news" plan will be for NAB to discuss with managers the advisability of using more of it. When managers explain to their news editors that the industry's continuing influence depends on the public's understanding of the industry, there should be no difficulty on this score. It has been called to the NAB Radio News Committee's attention that news editors, in many cases, have discarded such copy as has been received over the teletype because they thought using it would be nothing more than radio's blowing its own horn.

Mr. Gramling thought that perhaps one of the faults lay in the preparation of such copy by his writers; and it is for that reason that he said writers could do a

May 21-22	Board of Directors Meeting	Washington, D. C.

better job. A better written piece would tend to sell itself to the news editor.

Editorial Opinion

The Radio News Committee is already on record for the right of broadcast stations to voice editorial opinion. In the exercise of this right, the Committee pointed out, each station as well as the industry has a tremendous responsibility. Stations must have the capacity to do the job as well as the will and the right. This can only mean that each individual broadcaster must work out his own situation.

Attendance

E. R. Vadeboncoeur, vice president, WSYR, Syracuse, Radio News Committee Chairman; members, William B. Quarton, general manager, WMT, Cedar Rapids, and Paul Wagner, general manager, WCSI, Columbus, Indiana; C. E. Arney, Jr., NAB secretary-treasurer, and Arthur Stringer, NAB director of special services.

Legal Department

FCC Hears Testimony on Advisability Of Permitting 30 Kc Separation

The FCC held its 30 kc separation hearing on Friday (7). The purpose of the hearing was to take testimony regarding the advisability of permitting AM stations in the same general service area to operate only 30 kc apart.

The bulk of the testimony came from Commission engineers who reported on the results of their tests of this operation in Philadelphia and Washington. The conclusion the Commission engineers drew was

(Continued on next page)

that in so far as these tests showed there was no interference attributable to operation on the basis of 30 kc separation. However, they, as well as the Commission itself, indicated that further tests would be necessary before any standard or rule could be definitely established.

NAB filed an appearance and was represented by Bryce Rea, Jr., who was accompanied by Royal V. Howard, member of the Engineering Executive Committee.

Broadcast Advertising

NRDGA Cooperating with NAB in Television Study

The National Retail Dry Goods Association, in cooperation with the NAB's Department of Broadcast Advertising, is conducting a survey of retail stores in all cities where construction permits or licenses have been granted for television stations, to learn the extent of retailers' interests in this new advertising medium.

This action is one result of the joint committee meeting held in New York last month. Representing the NAB as members of the Sales Managers' Television subcommittee were Eugene Thomas, WOR, chairman; George L. Moskovics, CBS Television; Raymond R. Kraft, NBC Television Sales Manager; James V. McConnell, NBC Spot Sales; Samuel H. Cuff, Dumont Television, and Frank E. Pellegrin and Miss Lee Hart of the NAB. Others at the meeting included Howard Abrahams and Miss May Stern of the NRDGA Sales Promotion Division; Miss Helen T. Rhodes, WRGB Schenectady; Miss Irene Bender, AMC Stores, New York; George T. Shupert, Paramount Pictures, New York, and Dave Arons, Gimbel's, Philadelphia.

"We have started this study now," Mr. Abrahams said, "fully aware that only eight cities are equipped with television facilities, although about 25 cities have construction permits. We want to have all possible information about television at our command so that we can assist stores with this new medium just as soon as they are ready."

Because of high costs, it was suggested to NRDGA that stores should secure manufacturer cooperation in preparing television commercials on film. This would assist in about the same manner that photographs or mats now provided by manufacturers are adapted into retailers' advertisements, or radio transcriptions are used locally.

A parallel survey will be conducted by the NAB among television stations, to learn which sponsors have used the medium to date. Future activities will be planned by the subcommittee after the survey findings are analyzed.

Research Department

Receiver Output Continues to Rise; Proportion of Console Sets Increases

The production of both AM-FM and television receivers continued its upward trend in January, according to the RMA, in the manufacturers' efforts toward maintaining the high production rate reached in the last three months of 1946.

RMA members turned out a total of 1,564,171 sets in January as compared with 1,454,687 in December.

AM-FM sets manufactured in January totalled 51,318 as compared with 40,903 in December. Television receivers numbered 5,437 during the month compared with 3,561 produced in December.

More than 5,000 of the January FM-AM sets were in the low-cost table model field. The remainder were consoles, most of which were radio-phonograph combinations.

Of the television sets turned out, 4,790 were table model type, the balance being consoles.

Greater availability of wooden cabinets was indicated in January since the proportion of radio consoles rose substantially.

Employee-Employer Relations

Supreme Court Agrees to Hear Petrillo Case; No Ruling Expected Until Late Spring

On Monday (3), the U. S. Supreme Court noted "probable jurisdiction" in the appeal taken by the Department of Justice from the ruling of Judge LaBuy, holding the Lea Act unconstitutional.

The next step is for the Government and counsel for Mr. Petrillo to file briefs with the Supreme Court, after which a date for oral argument will be set. Probabilities are that no final ruling will be issued until shortly before the Court recesses in June for the summer.

Employee-Employer Relations Chairmen Appointed in Ten NAB Districts

The following ten District Chairmen of the Employee-Employer Relations Department have, thus far, been appointed by their respective NAB District Directors: District 4, Harold Essex, WSJS, Winston-Salem, N. C.; District 5, Henry P. Johnston, WSGN, Birmingham, Alabama; District 6, Harry Stone, WSM, Nashville, Tennessee; District 7, R. A. Moody, WHIO, Dayton, Ohio; District 9, Harry R. LePoidevin, WRJN, Racine, Wisconsin; District 10; E. K. Hartenbower, KCMO, Kansas City, Missouri; District 11, Austin E.

(Continued on next page)

Joscelyn, WCCO, Minneapolis, Minnesota; District 12, Kenyon Brown, KOMA, Oklahoma City, Oklahoma; District 13, O. L. Taylor, KGNC, Amarillo, Texas; District 17, Robert E. Priebe, KRSC, Seattle, Washington.

Engineering Department

Denny, Speaking at Engineers Convention, Cites Vast Growth of Frequency Allocations

Pointing out the many advances in radio engineering, and stressing the continued need for research in the field, Chairman Charles R. Denny, of the FCC, addressed the National Convention of the Institute of Radio Engineers in New York on Wednesday (5).

Citing the vast expansion in the radio field, Mr. Denny stated that "the radio engineer, the radio industry and the Commission must work together, closely and cooperatively."

He went on to say "Even before the war ended, it was evident that in order to be prepared for the expansion which was bound to come there would have to be important changes in the basic plan which allocates bands of frequencies to the various radio services."

Referring to the World Telecommunications Conference which convenes in Atlantic City on May 15, Mr. Denny stated that "Sixty-eight nations will be represented at that Conference and one of the principal tasks before the Conference will be to agree upon a world-wide plan for allocating frequencies to the various radio services. Our proposed plan will be thrown on the table for consideration along with the proposals of the other nations. And, we already know that several nations have prepared over-all frequency allocation plans which are just as complete and just as detailed as the United States proposal."

Expressing confidence that a workable plan would be achieved, Mr. Denny told the engineers "that what is ultimately adopted will not be the present United States proposal or indeed that of any single nation. It will be a composite plan embodying the best possible way of the requirements of all the nations. . . ."

Small Market Stations

Commissions, Rate Structure, Co-Op Shows Are Important Factors in Program Sales

More information on how to place emphasis on sale of programs rather than announcements was contributed this week to the study currently under way by the NAB Small Market Stations Executive Committee (REPORTS, p. 97).

Simon Goldman, WJTN, Jamestown, N. Y., Small Market Chairman for NAB District 2 (New York and

New Jersey), reported to NAB that most stations in his district have focused attention on program sales, although their methods varied.

One station offered an additional commission on program sales during the early years of its operation; the differential was later eliminated after the policy of selling programs had been firmly established. Changing to a rate structure favorable to program sales was used by other stations. It was pointed out that if three or more announcements can be bought for less than a quarter-hour program, it would be difficult if not impossible to sell program time. However, some set up a plan whereby advertisers started with spot announcement campaigns, were gradually built up as heavy users of time, and then were converted partially to programs.

Stations reported that another factor which has helped program selling has been the advent of outstanding network co-op shows. These, outside of local news and "local flavor" features, have proved to be among the better vehicles for the local advertiser. The improvement of syndicated shows has also provided local radio salesmen with an incentive to sell programs, it was pointed out.

Station managers agreed that selling programs was best for the advertiser and the listener, and therefore, a thorough educational campaign via the salesmen to the advertiser was essential.

One manager stated: "Our sales representatives have found that the local advertiser takes pride in sponsoring his own program series. I believe the situation is true in every market, psychologically, and can be worked out most effectively if rates are in line and the sales department makes an honest and continuous effort in this direction. It certainly makes for better radio."

It was agreed, according to Chairman Goldman, that better programming and emphasis on program sales are the surest and soundest ways to build audiences and advertisers.

New Station Bases Presentation on Programs

The value of program sales emphasis for new stations is pointed out by James L. Howe, WCTC, New Brunswick, N. J., whose station has been on the air about ninety days.

"We opened this new station on December 12th. Thirty days prior to the opening we started a series of planned sales presentations. Everyone of these was on programs.

"We used routine programs without hooks or special formats, but planned the type of program according to the needs of the individual client, and spotted it at the time best suited for his needs, at the same time keeping in mind our overall program structure. We used the following tools:

"(1) A large two-by-three-foot, 18-page hand-drawn brochure in which we analyzed the market, the aims and plans of the station. This presentation was given by the sales manager and took about 20 minutes.

"(2) A letter-size brochure setting forth the merits of a program, time selected and package rate. Sufficient copies were printed so that each staff member of the potential client could have one.

(Continued on next page)

"(3) The program itself was recorded, client's commercial copy included, as it would sound on the air.

"(4) An appointment was made with the prospective client in which two hours of undivided attention was granted."

Mr. Howe, who is an experienced broadcaster, reported that this approach in opening the new station was very successful. The clients were impressed. All programs sold were across-the-board with three exceptions. Contracts on all sales were for 52 weeks. They could not be bought on less than a year's contract.

"The results of this planned campaign," he said, "using two salesmen as a team, and staging it with the timing and production of a radio presentation enabled us to sell twenty-one programs out of twenty-five presentations and put us on the air in black. The station is now on the air, but the same sales methods are still being used."

Potter, Small Market Leader in District 7, Succeeds Paul Wagner As Chairman

Hugh O. Potter, WOMI, Owensboro, Ky., has been appointed Small Market Stations Chairman for NAB District 7 (Ohio and Ky.) according to an announcement by James D. Shouse, District Director. Mr. Potter succeeds Paul Wagner.

Number 6 of Management Series Mailed; Available to All Stations

NAB Radio Management Study No. 6 was mailed to member stations in the Small Market classification last week. The study will be sent to larger stations upon request.

Number Six Study outlines the actual operations of a 250-watt full-time ABC outlet located in a Northeastern city of 38,000 to 42,000 population. The station is newspaper owned.

Public Interest Programming

Navy Seeks Radio Cooperation in Meeting Requirements for Nurses

Early in January, the Navy Department received the cooperation of the country's radio stations in announcing the need for return to active duty of 200 Navy nurses.

Referring to this cooperation, Commander H. H. Holton, officer-in-charge of the Navy's Radio-Television Section, said in a letter to NAB President Justin Miller: "The response we obtained from radio stations was heartening and their power in disseminating information in the public interest was positively demonstrated. . . ."

Though the response was gratifying, and one hundred nurses are already back on active duty, with additional applications pending, the Navy Department

has requested station cooperation in obtaining additional applications from ex-Navy nurses to meet requirements.

Accordingly, station management was sent a new series of spot announcements from the Navy Department last week.

Ad Council Network Campaigns

The following public interest campaigns have been given top priority on Network and National Spot Allocation Plans during the week of March 17-23, 1947 by The Advertising Council and the Advertising Liaison Division of the Office of Government Reports (formerly OWMR). Copies of individual Fact Sheets and Schedules showing exactly what messages will be carried daily by the programs of the network with which your station is affiliated may be obtained on request from George P. Ludlam, Radio Director, The Advertising Council, 11 West 42nd Street, New York 18, New York.

1947 Red Cross Fund

During the month of March, the American people will be asked to contribute \$60,000,000 to carry out the vast 1947 Red Cross program of service to the Armed Forces, to veterans, to victims of disaster and to the community: 1. **SERVICE TO VETERANS** (a) For Able-Bodied Veterans: When the discharged veteran returns home he may need assistance in many things, such as personal and family problems or financial aid while claims are pending or delayed. Though many communities have public, tax-supported relief agencies to which veterans can turn, Red Cross chapters need financial support so they can stand ready to help, because of the extreme variations in these local public resources, especially where no general public relief is available. (b) For Hospitalized Veterans: There are now in veterans hospitals 80,000 patients who served in World War II and World War I. They will require all the skill and attention which a grateful nation can give. Red Cross Field Directors in the hospitals coordinate the volunteer efforts of the community with the needs of the hospital. Without these volunteers, the need for whom has been emphasized by the Veterans Administration, patients would miss among other things: the therapeutic recreation and training given by the Arts and Skills Corps; entertainment, assistance with letter-writing, shopping and library service; comfort articles and supplies; trips and tours with the Motor Corps to cities and industries near the veterans hospitals and to sports and athletic events. 2. **SERVICE TO THE ARMED FORCES** (a) In Military Hospitals: The Red Cross is requested by the military to handle hospital social service work. When a patient in a military hospital is to be discharged because of a disability, the Red Cross hospital worker discusses with him his post-discharge plans, explains resources available to him in his adjustment to civilian life, and will help him file his pension claim. (b) At Army Posts and Naval Stations: To maintain the morale of servicemen, many of whom are away from home for the first time, the Red Cross continues to provide recreation of various kinds through clubs and other facilities throughout the world. 3. **DISASTER SERVICE**. In time of disaster the resources and personnel of the Red Cross are immediately available. When fire, flood, tornado, hurricane, epidemic or wreck occurs, the Red Cross immediately makes available to anyone affected the basic needs of shelter, food, clothing, medical care, and auxiliary relief personnel of all types. 4. **SERVICE TO THE COMMUNITY**. Among normal peacetime services of Red Cross to Americans in their home towns are: (1) Nursing services, which consist of public health nursing; enrollment of nurses for disaster, epidemic and other services where needed; instruction of volunteer nurses' aides; and

(Continued on next page)

training women of the community in home nursing. (2) Nutrition service. (3) Safety services, which give training in first aid, water safety and accident prevention. (4) Junior Red Cross and college units. Urge your listeners to give to the Red Cross as generously as they can. By giving to the Red Cross they are giving directly to their relatives and friends, in the Armed Forces and here at home. (Fact Sheet No. 14-A)

Group Prejudice—A Post War Menace

Stress the reasons why we cannot afford divisive prejudice in America. 1. Division at home weakens the United States on the international scene—group strife here lowers the prestige of the United States among the nations of the world, hampers our country in its efforts towards world peace, promotes the belief that democracy has failed, encourages aggression in the hope of easy conquests. 2. Division at home hampers production—discrimination against fellow employees or business associates because of race, religion, or national origin, annually robs the United States of millions of hours of productive labor and the best skill and talents of countless workers. In a prejudice-filled America, no one would be secure—in his job, his business, his church, his home. Point out that the problem is especially acute now because of the many real difficulties that confront the American people—such as housing, jobs for servicemen, shortages, strikes, rising costs of living. We must not let ourselves be diverted from serious efforts to overcome these post-war difficulties by the “scapegoat” technique that blames them on some racial, religious, or national group. Recall that slandering an entire group of fellow citizens because of the behavior of individuals violates the American tradition of fair play. We should judge our neighbors by the character of their own lives alone and not on the basis of their race or religion. Racial and religious antagonisms are exploited, as a means for gaining political favor and easy money, by quacks and adventurers whose followers make up the irresponsible “lunatic fringe” of American life. Show that every individual citizen can help keep America strong by: 1. Isolating and quarantining group antagonism. (If someone runs down a neighbor's race or religion, remind him that this is bad business for America both at home and abroad.) 2. Alertly guarding himself and his family against infection by racial and religious prejudice. (Don't spread prejudice now, any more than you would have spread enemy rumors during the war. Through your own behavior and otherwise, encourage respect in your children for neighbors of different races and religions—remind them that these very differences among Americans have resulted in a variety of contributions that have made our country great and kept her free.) 3. Work in your community—your church, your business, your trade union, your school—to promote the American principles of racial and religious freedom. (Fact Sheet No. 31)

Federal Communications Commission Docket

HEARINGS

The following hearings are scheduled to be heard before the Commission in Washington, D. C., unless otherwise indicated, during the week beginning Monday, March 10. They are subject to change.

Monday, March 10

Further Hearing

NEW—Pynchon Broadcasting Corp., Springfield, Mass.—For FM facilities.

FCC ACTIONS

GENERAL

The Commission adopted a policy of permitting amendments to applications in hearing, to reflect changes in antenna design agreed to in engineering conferences after channel studies made pursuant to the expediting procedure on standard broadcast applications, such amendments to be applied for by petition upon which Motions Commissioner will act.

AMPLITUDE MODULATION

AM—Docket Cases

790 KC.

Announced adoption of a proposed decision (B-335) looking to a grant of the application of **Northern States Broadcasting Co.**, for a new station in **Fargo, N. Dak.**, to operate on 790 kc., with 5 KW, unlimited time, using a directional antenna at night (BP-4527; Docket 7664), and denial of the application of **KVOX Broadcasting Co., Moorhead, Minn.**, to change facilities of station KVOX from 1340 kc., 250 watts, unlimited time, to 790 kc., 5 KW, unlimited time (BP-4895; Docket 7663). (Commissioner Jett voted for a proposed grant of KVOX application and denial of Northern States Broadcasting Co. application.)

1070 KC.

Adopted on order granting application of **Monona Broadcasting Company** (BP-4404; Docket 7351), for a new station in **Madison, Wisconsin**, to operate on 1070 kc., with power of 10 KW, unlimited time, using directional antenna at night.

1230 KC.

Adopted a proposed decision (B-337) looking to a grant of the application of **Pueblo Radio Co., Inc.**, (BP-4175; Docket 7092) for a new station in **Pueblo, Colo.**, to operate on the frequency 1230 kc., 250 watts, unlimited time, and denial of application of **Dorrance B. Roderick** (BP-4037; Docket 7091), for identical facilities.

1300-1400 KC.

Adopted an order setting aside the order of January 23, 1947, which granted applications of **Newnan Broadcasting Co.** (BP-4487; Docket 7442), for a new station at **Newnan, Ga.**, to operate on 1400 kc., 250 watts, unlimited time, conditions; and application of **Volunteer State Broadcasting Co., Inc.** (BP-4531; Docket 7443), for a new station at **Nashville, Tenn.**, to operate on 1300 kc., 5 KW, unlimited time, DA night, and reopened the hearing upon issues of interference to **Stations WATL, Atlanta, Ga.**, and **WJHO, Opelika, Ala.**, which may be caused by operation of **Newnan Broadcasting Co.** on 1400 kc.; said hearing to be held on March 10 in Washington.

1340 KC.

The Commission announces its final action (B-318) granting the application of **Clarence Beaman, Jr., d/b as East Tennessee Broadcasting Co.**, for a new station in **Knoxville, Tenn.**, to operate on 1340 kc., 250 watts, unlimited time (BP-4127; Docket 6906), and denying application of **Smoky Mountain Broadcasting Co.** (BP-3777; Docket 6905) for the same facilities; also denied petitions of **Smoky Mountain Broadcasting Co.** requesting postponement of oral argument and reopening of the record.

The Commission adopted final decision (B-274) granting application of the **Cleveland Broadcasting Co., Inc.**, for a new station in **Cleveland, Ohio** (BP-4058; Docket 6917), to operate on 1300 kc., with 5 KW, unlimited time, DA, conditions.

The mutually exclusive application of **Scripps-Howard Radio, Inc.** (BP-4118; Docket 6916) for the same facilities, and its petition to reopen the hearing, were denied.

1490 KC.

The Commission announces a proposed decision (B-336) looking towards the grant of the application of **Torrington Broadcasting Co., Inc.**, for a new station at **Torrington, Conn.**, to operate on 1490 kc., 250 watts, unlimited time. (BP-4154; Docket 6895)

At the same time the application of **Berkshire Broadcasting Corp.** (BP-4153; Docket 6897), for the same facilities in **Danbury, Conn.**, is proposed to be denied.

Adopted supplemental proposed decision (B-299, B-291), looking towards grant of the following applications:

Beloit Broadcasting Company, (BP-4161; Docket 6964) for a new station in **Beloit, Wisc.**, to operate on 1490 kc., 100 watts, unlimited time;

Village Broadcasting Company, (BP-4075; Docket 6963), for a new station in **Oak Park, Ill.**, to operate on 1490 kc., 250 watts, unlimited time;

Radio Wisconsin, Inc., (BP-3809; Docket 6940), for a new station in **Madison, Wisconsin**, to operate on 1490 kc., 250 watts, unlimited time. (A petition of **Radio Wisconsin, Inc.**, for leave to amend its application was denied).

The following applications for the same facilities are proposed to be denied:

The Elgin Broadcasting Co., Elgin, Ill. (BP-3833; Docket 6962).

Vincent G. Cofey, Elgin, Ill. (BP-4381; Docket 7154).

Community Broadcasting Co., Oak Park, Ill. (BP-4382; Docket 7155).

Edwin Mead, Rockford, Ill. (BP-4729; Docket 7599).

AM—New CP's Granted

1400 KC.

Loys Marsdon Hawley, Bennettsville, S. C.—The Commission on its own motion, removed from the hearing docket and granted application (BP-4943; Docket 7975) for a new station to operate on 1400 kc., 250 watts, unlimited time.

(Continued on next page)

Remote Pickup

WJSM—United Broadcasting Company, Cleveland, Ohio—License to cover construction permit (B2-PRE-477) which authorized installation of new transmitter.

Federal Trade Commission Actions

ORDER RESCINDING VACATING ORDER

American Drug Corp.—The Commission reinstated a 1934 cease and desist order against American Drug Corp., St. Louis, by rescinding its action of two years ago vacating and setting it aside.

The order, which prohibited the drug corporation from misrepresenting a medicinal preparation designated "Sinasiptec" as a cure for sinus trouble, was vacated and set aside by the Commission, over the objections of the respondent, in January 1945. (2170)
