LAST WEEK'S REPORT HELD UP

For the first time in many, many months members of the NAB did not receive a weekly report from NAB headquarters last week. The issue was held up from day to day in anticipation that President Roosevelt would appoint the members of the new Communications Commission which takes office Monday and that we would be among the first to inform our members of these appointments. We hope those who have missed last week's report, and have written us of the omission, were not inconvenienced in any way. We are proud to know that members still think enough of our reports to raise hell when they arrive late. Forgive us, please!

FEDERAL RADIO COMMISSION PASSES

The Federal Radio Commission, which was created seven years ago under the provisions of the Radio Act of 1927, will pass out of existence just as soon as President Roosevelt appoints a majority of the newly created Federal Communications Commission.

At his press conference Friday afternoon, the President announced that he will make public his appointments to the new Commission either Saturday or Sunday. The new act becomes effective July 1, 1934.

The President signed the communications commission bill last week and just as soon as public law prints are available copies will be sent to all NAB members appropriately punched to fit into the NAB HANDBOOK.

The Federal Radio Commission went into its final session on Friday and recessed over night to resume its consideration of applications on Saturday. Scores of pending applications were granted at the closing session in an effort to clear the commission records as far as possible before giving way to the new commission. Only applications which would create undue interference were not acted upon finally by the commission at its final session. Daytime power increases were granted in nearly every case and in many cases night time power increases also were awarded. Shifts in frequencies were also granted in a number of cases and many applications which in earlier weeks might have been subjected to hearings were granted entirely upon the recommendations of the commission's own divisions. In some cases applications acted upon were filed only a short time before the grants were made. All of the grants, however, are subject to protest within the 20-day period provided by the commission's regulations.

Under the new law all records of the radio commission and the personnel in the classified service are automatically transferred to the new commission.

Just as soon as the new commission is named and qualified it will give consideration to organizing its administrative machinery.

CONGRESS GOES HOME JUNE 18

The Seventy-third Congress adjourned on Monday, June 18. While the Congress considered many measures affecting radio broadcasting, the only measure which was finally passed was the Federal Communications Commission Act of 1934 which places the regulation of all forms of communication under a single commission of seven men. As pointed out in previous reports, the new law does not materially affect the operation of broadcasting stations and makes few changes from the old law relating to broadcast licensing.

With the expiration of the Congress, all bills failing of final action die. The Seventy-fourth Congress will convene on January 1, 1935.

Among the measures to die with the close of the session was the bill to amend the Copyright Act of 1909 to enable the United States to enter the International Copyright Union. Hearings were held on this measure during the last weeks of the session.

At a later date NAB REPORTS will carry a complete review of all legislation affecting radio considered by the last Congress.

CROSLEY HEADS CONVENTION COMMITTEE

Powel Crosley, Cincinnati, Ohio, pioneer in the broadcasting and set manufacturing businesses, has accepted the chairmanship of the committee on local arrangements for the NAB Convention to be held at the Netherland-Plaza Hotel, Cincinnati, Ohio, September 16, 17, 18 and 19.

Announcement of the appointment was made this week by Ed. Spence, Atlantic City, N. J., chairman of the General Convention Committee.

Mr. Crosley, who was one of the founders of the NAB, will form a committee of Cincinnati station executives to handle local entertainment arrangements. He has been active in broadcasting since its inception and has done much pioneering in the art. One of his stations, WLW, is the most powerful in the world and the plant is one of the most interesting in the United States. He also operates WSAI, a regional station in Cincinnati.

Arrangements for the Convention were discussed with local station and hotel officials in Cincinnati at conferences called by Chairman Spence and the Managing Director. Many preliminary details have been worked out and it is the intention of the Convention Committee to complete all arrangements at an early date.

Indications are that the 1934 convention will be the largest from the standpoint of attendance ever held. The NAB membership stands at 365, the highest in the history of the Association, and it is estimated that between 400 and 500 people will attend the Cincinnati meeting.

MANAGING DIRECTOR LOSES RACE

In a hot and hectic 1,000-mile dash to Washington last week, the Managing Director was defeated by the stork by a margin of more than 12 hours.

Make your plans now to attend the
TWELFTH ANNUAL NAB CONVENTION

NETHERLAND-PLAZA HOTEL . . . CINCINNATI, OHIO

SEPTEMBER 16, 17, 18 AND 19, 1934

The race was not entirely fair and the stork stands accused of double-crossing its vanquished opponent.

With Ed Spence, chairman of the NAB Convention Committee, the Managing Director was in Cincinnati, Ohio, hurrying through with preliminary arrangements for the September Convention when the surprise phone call from Washington announced that the stork race had started.

Well, the Managing Director arrived late, lost the race, and the Loucks household now consists of mother and Baby June (both doing splendidly), father, and a wire haired fox terrier puppy named Flash (the latter two being very unimportant these days).

LABOR DEMANDS 35-HOUR WEEK

A demand that the labor provisions of the Code of Fair Competition for the Radio Broadcasting Industry be revised to provide for a 35-hour work week with general increases in pay was contained in a written proposal laid before Deputy Administrator William P. Farnsworth by the NRA Labor Advisory Board during hearings held June 20 and 21 in Washington, D. C.

At the opening session of the hearings, James W. Baldwin, executive officer of the Code Authority, stated that his body had made a complete study of wages, hours and working conditions of broadcast technicians and it was the recommendation of the Code Authority that no change be made in the present labor provisions of the broadcasters' code. He supported his recommendations by showing that on December 16, 1933, employment of technicians had increased 11.9 per cent; that hours of labor had been reduced 9.8 per cent; and that weekly payrolls had increased 21.1 per cent, over July 1, 1933. He also pointed out that during that period the weekly wage rate of technicians had increased 8.26 per cent as compared with an average increase in the cost of living during a corresponding period of 5.2 per cent.

Philip G. Loucks, managing director of the NAB, appeared and supported the recommendations of the Code Authority on behalf of the broadcasting industry.

Both Baldwin and Loucks strenuously objected to the hearing being opened to any issue other than that relating to broadcast technicians. Their objection, however, was overruled with leave to file briefs.

By far a majority of the two days devoted to the hearings was taken up by labor representatives who urged drastic changes in the labor provisions of the code, the effect of which would be to reduce hours 25 per cent and increase wages 10 per cent and establish minima for artists and performers ranging up to \$60 for a single performance.

Appearing for Actors Equity Association were Miss Emily Holt, associate counsel of the Association; Paul N. Turner, counsel; Frank M. Gilmore, president; and ——— Harding, editor. Edward D. Bieretz, assistant to the president; Thomas R. McLean, representative radio division; Louis Jurgensen, New York local No. —; Daniel Moley, Cleveland local No. 38; J. V. Fitzhugh, San Antonio local No. 60; and Marian H. Hedges, research director of the International Brotherhood of Electrical Workers. Louis Krouse, assistant president, appeared for the International Alliance of Theatrical Stage Employees and Moving Picture Machine Operators. Hoyt S. Haddock, president, appeared for the American Radio Telegraphists Association.

The demands of these organizations were set forth in the proposal of the Labor Advisory Board read into the record of the hearing by C. A. Wood, NRA labor advisor. This proposal follows in full text:

ARTICLE III

SECTION 1

"(a) No employee shall be permitted to work in excess of 35 hours in any one week or 7 hours in any 24 hour period or 5 days in any one week, except as herein provided.

"(b) An employee may be permitted to work in excess of the daily and weekly maximum hours fixed in Section 1 (a) of this Article provided that he is paid at the rate of time and one-half his normal rate of pay for all hours worked in excess of said maximum and provided further than such overtime shall not exceed 5 hours in any one week except as provided in paragraph (c) of this section.

"(c) In case of an emergency involving breakdown or protection of life or property such employees as are necessary may be permitted to work unlimited overtime; provided, however, that each such employee shall be paid at the rate of time and one-half his normal rate of pay for all hours worked in excess of the daily and weekly maximum hours provided in Section 1 (a) of this Article.

"(d) The provisions of this Article shall not apply to outside salesmen and persons employed in a managerial or executive capacity who are regularly paid \$35 per week or more; provided, however, that this exemption shall be strictly construed and shall in no case be so interpreted as to apply to skilled labor.

SECTION 2

"Time worked by each employee each day shall begin with the arrival of the employee on the employer's premises and shall be consecutive with the exception of not more than one hour for one meal period.

ARTICLE IV

SECTION 1

"(a) Broadcast technicians shall be paid not less than forty-four (\$44) dollars per week when employed at clear channel stations or high power regional stations, not less than thirty-three (\$33) dollars per week when employed at clear channel part time or low power regional stations, and not less than twenty-two (\$22) dollars per week when employed at low power regional, local unlimited, or local part time stations.

"(b) Announcers and program production employees shall be paid not less than twenty-two (\$22) dollars per week.

"(c) No other employee shall be paid less than \$16 per week; provided, however, that beginners, learners and apprentices without previous experience in the industry may be paid for a period of 60 days a sub-minimum wage not less than 80 per cent of the applicable minima set out in sub-section (a) and sub-section (b) of this section.

"(d) No artist or performer shall be engaged or permitted to broadcast for less than the rates of pay and upon the conditions set forth in the following subdivisions:

"1. Class A programs on network or independent stations whose advertising rate card is \$400 or more per hour

15 minimum for each 15 min. program over 5

Same prorata pay for retakes.

"No resale or broadcast of any audition record;

"No use of broadcast record except by station making same unless one-half pay is given artist for each performance by another station.

"8. Doubling

"One-half minimum additional for every part of 50 words or over doubled by an artist. No studio employee on Class A or Class B stations to play parts.

"Artists called to studio and reporting for broadcast or to dress rehearsal immediately preceding and ready for performance or rehearsal to be paid even if not permitted to broadcast.

SECTION 2

"Any employee other than an actor, singer, or instrumentalist, who works less than 75% of the basic weekly maximum number of hours specified in Article III, Section 1, shall be deemed a part time employee and shall be compensated at the rate of time and one-half his normal rate of pay. All time worked by any regular full time employee on Sundays and legal holidays shall be compensated at the rate of time and one-half his normal rate of pay.

SECTION 3

"This article establishes minima rates of compensation which shall apply irrespective of whether the employee is actually compensated on a time rate, piece rate, commission or other basis.

SECTION 4

"Female employees performing substantially the same work as male employees shall receive the same rate of pay as male employees. When they displace male employees they shall receive at least the same rate of pay as the male employees whom they displace.

SECTION 5

"No hourly, daily or full time weekly compensation for employees who are paid less than fifty (\$50.00) dollars per week shall be less than such compensation existing as of June 16, 1931, and no employee shall be paid a wage rate which will yield a lower wage for the shorter full time week herein established than he could have earned in the same class of work for the longer full time week existing as of June 16, 1931. Wages above the minimum shall be increased by an equitable adjustment of all pay schedules in order to maintain the differentials existing as of June 16, 1931; provided, further, that on or before September 1, 1934, a report of all wage adjustments shall be made to the Administrator.

SECTION 6

"Wages shall be paid weekly or semi-monthly in lawful money or by negotiable check payable on demand. Wages shall be exempt from fines, charges, rebates, commissions, deductions, or any other form of withholding wages except for contributions voluntarily made by the employee or required by law for pensions, insurance, or benefit funds. No employer shall withhold wages except upon service of legal process or other paper legally requiring such withholding. No employer or his agent shall accept a rebate directly or indirectly on such wages nor give anything of value or extend favors to any person for the

purpose of influencing rates of wages, hours, or the working conditions of his employees.

"No commission to be paid by artist to any subsidiary or affiliated artist or program bureau of any network or independent station or to any person, partnership or corporation unless they are in the sole business of representing artists and have no connection with any network, independent station, or advertising agency either direct or indirect; and in no event shall a commission be paid to any agent or representative who receives a lump sum for a program of artists employed or selected by said individual or agency.

SECTION 7

"Each employer shall bear the full cost of all transportation and traveling expenses of any regular employee while said employee is traveling in discharge of his duties; provided, further, that said full cost shall include the cost of operation of any vehicle owned and operated by such employee in the discharge of his duties.

ARTICLE V

SECTION 1

Definition of Employee

"Employee, as used herein means any person engaged in the industry and employed by a broadcaster or network at a regular hourly, daily, weekly, or monthly salary or wage, or a professional person performing services in a broadcasting studio who is paid by the job or performance, as distinguished from an independent contractor.

SECTION 2

"No employee under 16 years of age shall be employed in this industry. In any state an employer shall be deemed to have complied with this provision as to age if he shall have on file a certificate or permit duly issued by the authority in such state empowered to issue employment or age certificates, or permits, showing that the employee is of the required age. No person under 18 years of age shall be employed at operations or occupations hazardous by nature or dangerous to health; provided, further, that the Code Authority shall submit to the Administrator for approval on or before September 1, 1934, a list of such operations and/or occupations.

SECTION 3

"(a) Employees shall have the right to organize and bargain collectively through representatives of their own choosing, and shall be free from the interference, restraint, or coercion of employers of labor, or their agents, in the designation of such representatives or in self-organization or in other concerted activities for the purpose of collective bargaining or other mutual aid or protection.

"(b) No employee and no one seeking employment shall be required as a condition of employment to join any company union or to refrain from joining, organizing, or assisting a labor organization of his own choosing, and

"(c) Employers shall comply with the maximum hours of labor, minimum rates of pay, and other conditions of employment, approved or prescribed by the President.

SECTION 4

"No provision in this code shall supersede any State law which imposes on employers more stringent requirements than are imposed by this code as to age of employee, wages, hours of work, or as to safety, health, sanitary, general working conditions, insurance or fire protection.

SECTION 5

"Where the rates of pay and maximum hours of labor for any of the various classifications of workers in this industry are established or regulated by virtue of a contract entered into by collective bargaining between employees and employers, or by virtue of regional or area agreements or State codes, such minimum rates of pay and maximum hours of labor shall be maintained; provided, however, that the minimum rates of pay in

such contracts, agreements or codes are not less than, nor the maximum hours more than, the minimum rates of pay and the maximum hours of labor, respectively, established in this code.

SECTION 6

"The Code Authority shall submit to the Administrator on or before September 1, 1934, standards for the safety and health of employees in this industry which standards if not disapproved by the Administrator within 30 days after submission to him shall forthwith become binding upon all members of the industry.

SECTION 7

"No employee shall be discharged without notice or the equivalent in pay; provided, further, that each employee must be given 1¼ days notice of discharge for each month of service.

SECTION 8

"Each employee shall be granted 1¼ days vacation with pay for each month of service; such vacation time may be accumulated by the employee and vacation taken at the mutual convenience of the employer and the employee at any time within the calendar year.

SECTION 9

"No employee shall be dismissed, demoted, or discriminated against for making a complaint or giving evidence with respect to an alleged violation of this code.

SECTION 10

"No employer shall avoid or evade the labor provisions of this code by contracting his work to any persons not subject to labor provisions and/or regulations, or subject to labor provisions and/or labor regulations less stringent than those prescribed in this code. No broadcaster shall contract with or broadcast for any sponsor or independent contractor not complying with the conditions of this code in so far as they affect the wages or working conditions of any persons employed in or about any broadcasting studio.

SECTION 11

"No employer shall, temporarily or otherwise, reclassify any part-time, full time or special program employee, nor the duties of occupations performed, nor engage in any other subterfuge so as to defeat the purpose of provisions of the Act or of this code.

SECTION 12

"All employers shall post complete copies of this code in conspicuous places accessible to all employees; provided further, that authorized changes in Articles III, IV and V shall be posted within ten days."

Philip I. Merryman, national vice president of the Association of Technical Employees of the National Broadcasting Company, Harry Spears, president of the Associated Columbia Broadcasting Technicians, appeared for their respective company labor organizations.

Developing the history of the formation of his organization, Merryman stoutly contended that "at the time they undertook the organization of their Association there was then in existence no other labor organization adequately qualified in their opinion either by experience, knowledge or previous example to intelligently represent the employees of the National Broadcasting Company before the executives of the National Broadcasting Company.

Harry Shaw of Waterloo, Iowa, government representative on the broadcasters' code, attended the hearings and noted the testimony given by all witnesses. He plans to make a report to the NRA on the basis of the testimony offered during the hearings.

Serving with Deputy Administrator Farnsworth were the following: Of the Industrial Advisory Board—W. L. Walker and F. M. Russell; of the Labor Advisory Board—C. A. Wood and E. M. Nockels; of the Consumers Advisory Board—Eugene

Culver; of the Planning and Research Division—David M. Kendall; of the Legal Division—Tyree Dillard; and William S. Hennings, aide to the Deputy Administrator.

At the conclusion of the hearing, Deputy Administrator Farnsworth took the matters presented under advisement.

136 ATTEND NAB COMMERCIAL SESSION

One hundred and thirty-six broadcasters, advertising agency executives and advertisers attended the third annual meeting of the NAB Commercial Section held at Hotel Pennsylvania, New York, June 19 and 20. The meeting was presided over by Arthur B. Church, Kansas City, chairman of the NAB Commercial Committee.

Addresses covering nearly every important commercial problem were delivered during the two-day session. The proceedings will be published as a supplement of NAB REPORTS and summaries of the addresses therefore will not be printed here.

The Commercial Committee adopted a motion recommending that members of the NAB standardize units of sale as follows: one hour, one-half hour, quarter hour, five minutes, one-minute transcription, 100 words, half-minute transcription, 50 words or less.

It was expressed as the sense of the Commercial Committee that field strength measurements made by competent engineers form the basis for establishing station coverage. It is the definite recommendation of the committee that in view of the lack of any better standards the NAB approve the present Federal Radio Commission standards for primary and secondary coverage and it was recommended that the NAB proceed toward setting up some bureau to supervise and approve establishment of primary and secondary coverage areas on member stations based upon these standards.

The Commercial Section voted that copies of the report on station relations with networks be furnished to the national networks with a request that they take steps to harmonize network and affiliated station trade practices which are reported in this study and that the committee report at the Cincinnati convention on any new developments.

The Committee adopted a motion to the effect that all quantity discounts be given within a period of one year, with discounts retroactive to the first broadcast within that year and discounts shall apply within the same time classifications.

Operating companies or holding companies operating more than one subsidiary (such as General Motors) shall be permitted to buy under a group plan allowing discounts for each of the separate companies under a blanket order to apply even if more than one agency is involved in placing the time, was the text of another resolution.

The Committee recommended that all stations put on their rate cards, in addition to the regular standard units of time, under a separate heading called "special service features," such features as time signals, weather reports, sports events, participation programs and any other service features, with an adequate description of what the individual station allows.

The Commercial Committee held a joint meeting with the Radio Committee of the American Association of Advertising Agencies on Tuesday noon. Mutual problems were discussed but no definite action was taken. It was agreed that in the future these two committees should hold joint meetings with a view to solving problems common to the agencies and stations.

Among those who attended the meetings were the following:

Herb Hollister, WLBF, Kansas City, Kansas; E. C. Eibell, Beneficial Management Corp., New York, N. Y.; Mary J. Whelan, American Academy of Political & Social Science, Philadelphia; C. A. TIME WIRE SERVICE HELD TAXABLE

The Bureau of Internal Revenue has ruled that payments made by broadcasting stations to telegraph and telephone companies

for time wire services are taxable under Section 701 of the Revenue Act of 1932. The ruling of the Bureau is as follows:

"Section 701.—Telegraph, Telephone, Radio, and Cable Facilities. "REGULATIONS 42, ARTICLE 3: Basis and rate of tax. XIII-25-6861, S. T. 744.

"Taxability of payments by a radio broadcasting station for 'time wire service.'

"The question is presented whether payments made to a telegraph or telephone company by a radio broadcasting station for 'time wire service' are taxable under section 701 of the Revenue Act of 1932.

"The X Broadcasting Station receives news items daily over the facilities of the Y Telegraph Co. and the Z Telephone Co. The charges for each type of service are based upon the actual time the service is in use.

"Section 701 of the Revenue Act of 1932 imposes a tax upon payments for the transmission of telegraph, telephone, cable, or radio dispatches, messages, and conversations originating within the United States. The only exemption applicable to radio broadcasting stations or networks is that contained in section 701(a)2, which relates only to amounts paid for so much of a leased wire or talking circuit special service furnished to such stations or networks as is utilized in the conduct of their business as such.

"It is clear that neither the service furnished by the Y Telegraph Co. nor the Z Telephone Co. is a leased wire or talking circuit special service. Consequently, the exemption provided by section 701(a)2 does not apply.

"The exemption provided in section 701(b) with respect to payments for services or facilities utilized in the collection of news for, or in the dissemination of news through, the public press is applicable only to payments made by newspapers or press associations for messages from one newspaper or press association to another newspaper or press association, or to or from their bona fide correspondents which deal exclusively with the collection of news for the public press, or with the dissemination of news through the public press. (Article 20 of Regulations 42; S. T. 646, C. B. XII-1, 422.) The payments in question are not made for services or facilities utilized for any of the purposes specified in section 701(b). Accordingly, the exemption therein provided is not applicable.

"In view of the foregoing, it is held that the payments made by the X Broadcasting Station to the Y Telegraph Co. and the Z Telephone Co. for the facilities referred to are taxable under section 701 of the Revenue Act of 1932."

ROOSEVELT FAVORS RADIO FREEDOM

President Roosevelt, in a special message sent to the Radio Manufacturers Association on June 13, declared emphatically for maintenance of radio on an equality with the traditional "freedom of the press". The text of the President's letter follows:

"I take pleasure in extending greetings and best wishes to the radio industry as represented at your banquet given in celebration of the tenth anniversary of the founding of the Radio Manufacturers Association.

"Your manufacturing ingenuity and your agencies of distribution have been so exercised that, I am glad to say, radio today is enjoyed in the humble as well as the palatial home and contributes greatly to the enrichment of life.

"Radio is a new and potent American industry. Reports of the United States Department of Labor show that employment in your factories has doubled since April, 1933. Unemployed have found work in your factories and I am advised that as business has improved within your industry your workers have received increased wage rates.

"You have had many evidences of my interest in radio. In cooperation with the Government, radio has been conducted as a public agency. It has met the requirements of the letter and spirit of the law that it function for 'public convenience and necessity.'

"To permit radio to become a medium for selfish propaganda of any character would be to shamefully and wrongfully abuse a great agent of public service. Radio broadcasting should be maintained on an equality of freedom similar to that freedom which has been and is the keystone of the American press."

COURT BANS SPEECH CENSORING

Federal Judge Akerman granted an injunction ordering Station WFLA, Clearwater, Fla., to allow Morris Givens, candidate for state attorney, or someone designated by him, to speak over the

station four nights previous to the primary election of June 26 without censoring the speeches. The court order reads, in part:

"This cause coming on to be heard on this day upon the sworn bill of complaint herein, and the court being advised in the premises and finding that the injury to restrain which his order is prayed is irreparable damage to the plaintiff's political campaign and the right of uncensored use of defendant's broadcasting station and probably loss of political office; that the loss of elective or appointive office cannot be compensated for and is irreparable. 'It is ordered, adjudged and decreed that the defendant hereto, Florida West Coast Broadcasting Company, Inc., a corporation, its agents, officers and employees, be, and they are hereby jointly and severally ordered, directed and commanded to allow the plaintiff, or someone designated by the plaintiff, to use the broadcasting radio station or studio operated by said corporation in Tampa, Fla., with said broadcasting station or studio duly operating as a radio broadcasting station or studio for broadcasting political addresses thereover, on Monday, June 11, 1934, from 7:35 to 7:45 p. m.; on Monday, June 18, from 7:30 to 7:45 p. m.; on Friday, June 22, from 7:30 to 7:45 p. m., and on Monday, June 25, from 7:30 to 7:45 p. m., without requiring plaintiff to submit any address to be made by him or someone designated by him to defendant or to anyone else for censoring.'"

STATIONS SEND IN ANNOUNCEMENTS

The Federal Trade Commission is expecting all radio stations to begin with the first week of July to send in copies of commercial announcements. The response to the Commission's letter has been highly satisfactory and the Commission is pleased with the promised cooperation of broadcasting stations. In several instances stations have promised to send in all commercial announcements with the understanding that about August 1 a new system less burdensome to both the Commission and the stations will be worked out.

URGE PRESS DISPATCH SECRECY

The State Department has received the following free translation of the text of a resolution adopted at the recent International Conference on Industrial Property Rights held at London:

"The conference expresses the desire that countries of the Union should study the question of the introduction into their respective legislatures of measures for effective protection against the unauthorized divulging of press information during the period of its commercial value and against such divulging without an indication of its source."

MUTER NEW RMA PRESIDENT

The new president of the Radio Manufacturers Association for the ensuing year is Mr. Leslie F. Muter of Chicago, president of The Muter Company, 1255 South Michigan Avenue, and for many years an officer and director of the Association. He has served two years as chairman of the RMA Parts, Cabinet and Accessory Division, also as vice president and treasurer, and is now the NRA Code Supervisory Agency for radio parts and accessories.

Mr. Muter succeeds Fred D. Williams of Indianapolis as president of the RMA following his election on June 13 by the Board of Directors. Mr. Williams, however, remains in the RMA organization having been elected treasurer following two years of service at the head of the Association.

The vice presidents of the RMA are Arthur T. Murray of Springfield, Mass., now NRA Code Supervisory Agency for receiving sets; S. W. Muldowny of New York, NRA Code Supervisory Agency for tubes; Arthur Moss of New York and Richard A. O'Connor of Fort Wayne, Indiana. They also are respectively the chairmen of the RMA Set; Tube; Parts, Cabinet and Accessory, and Amplifier and Sound Equipment Divisions.

New members elected to the RMA Board of Directors are Benjamin Abrams of New York; Dr. W. R. G. Baker of Camden, N. J., and Paul V. Galvin of Chicago, newly elected by the RMA Set Division; Ben G. Erskine of New York and J. C. Warner of Harrison, N. J., newly elected from the RMA Tube Division, and N. P. Bloom of Louisville, Ky., newly elected from the RMA Parts, Cabinet and Accessory Division.

Directors Arthur Moss, Arthur T. Murray, Richard A. O'Connor, James M. Skinner and Captain William Sparks were re-elected. Retiring directors include E. T. Cunningham, LeRoi J. Williams, J. Clarke Coit, George Lewis and G. K. Throckmorton.

Bond Geddes was reelected executive vice president and general manager and also secretary of the Association, and John W. Van Allen of Buffalo, New York, general counsel.

TRADE ASSOCIATION AND CODE AUTHORITY

The NRA has just announced the following for the purpose of defining the distinction between a trade association, such as the NAB, and a code authority, such as the Code Authority for the Radio Broadcasting Industry:

"A Trade Association is a voluntary organization of business men joined together for the development of their particular industry. Membership in a Trade Association, and financial contributions to its activities are voluntary. Trade Associations existed before the NRA and have made a large contribution to self-government in industry.

"A Code Authority is an agency of limited powers and functions established under the NIRA and by the code which it administers. Membership thereon is a public trust. Its chief function is to plan for the industry and insure equitable administration of and compliance with the Code of Fair Competition. The functions of a Code Authority as such do not extend beyond the scope of the Code. The Code Authority is an entity, separate and distinct from a Trade Association and its governing body.

"Code Authorities may not use funds collected from members of the industry for the promotion of the industry. Such monies raised as contribution to the Code Authorities are to be expended solely in the administering of the Code."

MAY STATION MEASUREMENTS

The Division of Field Operations of the Radio Commission reports that in May 548 station broadcasting measurements were made, with no measurements made for 35 stations.

Of this number 344 showed a maximum deviation within 0-10 cycles; 146, within 11-25 cycles; 51 within 26-50 cycles and 7 over 50 cycles.
